*Mass Murders* Sam Baltrusis,2020-05-01 Does a murder psychically imprint itself on a blood-stained crime scene? Sam Baltrusis revisits the haunts associated with the most horrific homicides in Massachusetts, including the Lady of the Dunes mystery in Provincetown to the Lizzie Borden case in Fall River. Using a paranormal lens, Baltrusis delves into the ghastly tales of murder and madness to uncover the truth behind some of the Bay State's most bone-chilling crimes.

*Demon Haunted* John Zaffis,Rosemary Ellen Guiley,2016-08-25 Leading paranormal experts John Zaffis and Rosemary Ellen Guiley plumb the depths of bizarre phenomena involving demonic spirits, the restless dead, demon boxes, dybbukim, Djinn, 9/11 World Trade Center disaster relics, and more. They explore haunted homes and landscapes teeming with spirits and entities who pester and terrorize both people and animals, and defiantly refuse to let go. In addition, the authors discuss exclusive, never-before-told stories deeply personal to John Zaffis about urgent messages he has received from his famous demonologist uncle, Ed Warren, who is on the Other Side. What is Ed saying about John, his work—and perhaps even the future of demonology? John and Rosemary take a unique look inside the world of phenomena that is sometimes downright frightening. Their views bring light on the dark, which opens the mind up to other possibilities in this universe of hauntings. I've looked up to John Zaffis for years and have learned new theories and tactics through his research. Let your mind wander in *Demon Haunted* and be a part of the experience to other happenings. --Nick Groff, star of *Paranormal Lockdown* John Zaffis and Rosemary Ellen Guiley are both vast treasure troves of knowledge on the subject of the paranormal. Together, their expertise and experience combine to deliver a book that informs, enlightens and in some instances, terrifies. You have been forewarned... --Brian J. Cano, star of *Haunted Collector*

**A Handbook for Paranormal Investigators** Shishir Kumar,2017-12-28 That unexpected thud in the middle of the night, that lone blinking light, the sudden hiss in the eerie quiet, when goosebumps spike and a chill runs down your spine ... is the fear unnecessary or should we be scared ... very, very scared? Spirits, hauntings, ghosts, demons—some believe in them, some don't. Some have even experienced them, some have safeguarded themselves with science. But whichever category you may fall into, one thing is certain—none of us fully understand the concept. Shishir Kumar, founder president and lead investigator of Team Pentacle, India's most sought-after paranormal research organization, brings to you a handbook with the key to sense, recognize, grasp and accept the unknown. Using a blended approach of scientific methods and religious beliefs, this book explains the true nature of spirits and types of sightings. Departing from the tradition of myths and chants, this book intelligently humanizes the concept and arms the reader with the requisite knowledge to unravel sounds and shadows which seem to have no source. It utilizes New Age tools like Electronic Voice Phenomena and digital cameras for identifying and resolving spirit possessions and familiar sources like Ouija boards for communicating with them. The author provides a comprehensive, engaging and easy-to-follow guidebook for quenching those chills we are all too familiar with but so far have been unequipped to deal with. The book bridges the gap between the human and the ethereal which helps in driving out the fear, and brings into focus the need to act confidently and fearlessly. So, spooked or stoked, let's unravel the mystery!

In addition to detailed histories of bizarre burials, ghastly murders, and the greatest concentration of haunted places in America, *Fear Dat* features a "bone watcher's guide" with useful directions of who's buried where, from Marie Laveau to Ruthie the Duck Girl. You'll also find where to buy the most authentic gris-gris or to get the best psychic reading. The Huffington Post tagged Michael Murphy's first book *Eat Dat*, about the city's food culture, the #1 "essential" book to read before coming to New Orleans. *New Orleans Living* called it "both reverent and irreverent, he manages to bring a sense of humor to serious eating—and that's what New Orleans is all about." In *Fear Dat*, Murphy brings similar insights and irreverence to New Orleans voodoo, vampires, graveyards, and ghosts.

*Medium Law* Daithí Mac Síthigh,2017-09-13 Why should anyone care about the medium of communication today, especially when talking about media law? In today's digital society, many emphasise convergence and seek new regulatory approaches. In *Medium Law*, however, the 'medium theory' insights of Harold Innis, Marshall McLuhan and the Toronto School of Communication are drawn upon as part of an argument that differences between media, and technological definitions, continue to play a crucial role in the regulation of the media. Indeed, Mac Síthigh argues that the idea of converged, cross-platform, medium-neutral media regulation is unattainable in practice and potentially undesirable in substance. This is demonstrated through the exploration of the regulation of a variety of platforms such as films, games, video-on-demand and premium rate telephone services. Regulatory areas discussed include content

regulation, copyright, tax relief for producers and developers, new online services, conflicts between regulatory systems, and freedom of expression. This timely and topical volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as Law, Policy, Regulation, Media Studies, Communications History, and Cultural Studies.

**Strategy and Management of Industrial Brands** Philippe Malaval,2012-12-06 Strategy and Management of Industrial Brands is the first book devoted to business-to-business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers, and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business-to-business companies, as well as new concepts such as brand `printability', `visibility', and `purchaseability'. Five major brand categories are dealt with in separate chapters: -entering goods brands; -intermediary equipment goods brands; -equipment goods brands; -business-to-business service brands; and -industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brands? What type of visual identity is appropriate? How to manage international brands? An analysis of 1,500 industrial brands as well as 40 case studies are included in this book. These brands are used in both the industrial (automotive, building, aeronautics, IT, etc.) and consumer sectors (clothing, electronics, food packaging, telecommunications, etc.). This book has been written for professors and students of universities and business schools, as well as managers and people working in industry or the service sector.

**Startup Cities** Peter S. Cohan,2018-02-07 This book offers a comprehensive model for explaining the success and failure of cities in nurturing startups, presents detailed case studies of how participants in that model help or hinder startup activity, and shows how to apply these lessons to boost local startup activity. Startup Cities explains the factors that determine local startup success based on a detailed comparison of regional startup cities—pairing the most successful and less successful cities within regions along with insights and implications from case studies of each of the model’s elements. The book compares local city pairs, highlighting factors that distinguish successful from less successful cities and presents implications for stakeholders that arise from these principles. Peter Cohan is a lecturer of Strategy at Babson College and one of the world’s leading authorities on regional startup ecosystems. Starting in 2012, he created and led Startup Strategy courses that explore four regional startup ecosystems—Hong Kong/Singapore, Israel, Paris, and Spain/Portugal. These courses are based on an original framework for evaluating why a few cities host most startup creation and the rest fail to do so. In running these courses, Peter has built a network of local policymakers, investors, entrepreneurs, and professors from which he draws practical insights for what distinguishes successful Startup Commons from their peers. The book provides vital benefits to these stakeholders. What You’ll Learn Local policymakers will know how to build a local team to set objectives for their local Startup Commons and develop a comprehensive strategy to realize those goals Entrepreneurs will know how to choose where to locate their startups based on factors such as the supply and quality of talent—from chief marketing and technology officers to coders and sales people; quality of life, access to capital, customers, and mentors; and costs such as salary and real estate expense University administrators and faculty will know how to take research out of their labs and house it in companies that can commercialize that research, create academic programs that will encourage more entrepreneurship among their students, and connect with local policymakers and capital providers to spur local startup activity Capital providers will know how to scout out emerging startup cities where they can get access to the best investment opportunities at more favorable valuations and have greater influence on how the local startup scene evolves Who This Book Is For All key startup stakeholders, including local policymakers (mayors, directors of economic development, treasurers, controllers, presidents of regional chamber of commerce), entrepreneurs (CEOs, chief marketing officers, chief financial officers, chief HR officers, chief technology officers), universities (presidents; deans of faculty; provosts; professors of finance, management, and entrepreneurship; directors of international education), and capital providers (venture capital partners and associates, angel investors, bank loan officers, managers of accelerator operations)
