Discrete Choice Methods with Simulation Kenneth Train, 2009-07-06 This book describes the new generation of discrete choice methods, focusing on the many advances that are made possible by simulation. Researchers use these statistical methods to examine the choices that consumers, households, firms, and other agents make. Each of the major models is covered: logit, generalized extreme value, or GEV (including nested and cross-nested logits), probit, and mixed logit, plus a variety of specifications that build on these basics. Simulation-assisted estimation procedures are investigated and compared, including maximum simulated likelihood, method of simulated moments, and method of simulated scores. Procedures for drawing from densities are described, including variance reduction techniques such as antithetics and Halton draws. Recent advances in Bayesian procedures are explored, including the use of the Metropolis-Hastings algorithm and its variant Gibbs sampling. The second edition adds chapters on endogeneity and expectation-maximization (EM) algorithms. No other book incorporates all these fields, which have arisen in the past 25 years. The procedures are applicable in many fields, including energy, transportation, environmental studies, health, labor, and marketing.

Residential Exposure Assessment Scott R. Baker,Jeffrey Driver,David McCallum,2001-01-31 Residential Exposure Assessment: A Source Book is the result of a multiyear effort known as the Residential Exposure Assessment Project (REAP) which was initiated by the Society for Risk Analysis and the International Society of Exposure Analysis. This textbook is the primary product of the REAP and it contains contributions from over 30 professionals from a variety of disciplines such as chemistry, biology, physics, engineering, industrial hygiene, toxicology, pharmacology, and environmental law, reflecting the diverse knowledge and resources necessary to assess and manage potential exposures occurring in and around the home. Expert working groups were organized for each of the 13 chapters to address such issues as U. S. legislation relevant to products used in and around the residence, methods for measuring and modeling exposures across multiple pathways and routes, and distributional data available for key residential exposure factors. This volume is a compendium of information about predictive methods and tools, monitoring methods, data sources, and key variables that characterize exposures in the residential setting. It presents approaches for doing exposure assessments in and around all types of residences. The purpose of the Source Book is to provide a resource for use in educational programs and for practitioners of residential exposure assessment. Accordingly, this book is intended for risk assessors, exposure assessors, students, initi ates new to the concept of risk assessment, industrial hygienists assessing health hazards in the home, engineers, and monitoring specialists.

Like Brothers Mark Duplass,Jay Duplass,2018-05-08 The multitalented writers, directors, producers, and actors (as seen on The League, Transparent, and The Mindy Project) share the secrets of their lifelong partnership in this unique memoir. “A book that anyone will love . . . You can enjoy it even if you have no idea who the Duplass brothers are.”–Janet Maslin, The New York Times Whether producing, writing, directing, or acting, the Duplass Brothers have made their mark in the world of independent film and television on the strength of their quirky and empathetic approach to storytelling. Now, for the first time, Mark and Jay take readers on a tour of their lifelong partnership in this unique memoir told in essays that share the secrets of their success, the joys and frustrations of intimate collaboration, and the lessons they’ve learned the hard way. From a childhood spent wielding an oversized home video camera in the suburbs of New Orleans to their shared years at the University of Texas in early-nineties Austin, and from the breakthrough short they made on a three-dollar budget to the night their feature film Baghead became the center of a Sundance bidding war, Mark and Jay tell the story of a bond that’s resilient, affectionate, mutually empowering, and only mildly dysfunctional. They are brutally honest about how their closeness sabotaged their youthful romantic relationships,

about the jealousy each felt when the other stole the spotlight as an actor (Mark in *The League*, Jay in *Transparent*), and about the challenges they faced on the set of their HBO series *Togetherness*—namely, too much togetherness. But *Like Brothers* is also a surprisingly practical road map to a rewarding creative partnership. Rather than split all their responsibilities fifty-fifty, the brothers learned to capitalize on each other's strengths. They're not afraid to call each other out, because they're also not afraid to compromise. Most relationships aren't—and frankly shouldn't be—as intense as Mark and Jay's, but their brand of trust, validation, and healthy disagreement has taken them far. Part coming-of-age memoir, part underdog story, and part insider account of succeeding in Hollywood on their own terms, *Like Brothers* is as openhearted and lovably offbeat as Mark and Jay themselves. "Wright. Ringling. Jonas. I'm sure you could name a bunch of famous brother teams. They're all garbage compared to Mark and Jay. I can't wait for you to read this book."—from the foreword by Mindy Kaling

Production Economics: A Dual Approach to Theory and Applications Melvyn Fuss, Daniel McFadden, 2014-06-28 *Contributions to Economic Analysis: Production Economics: A Dual Approach to Theory and Applications, Volume 2* focuses on the theory of production from the standpoint of the dual, the relationships between economic observables which are dual to physical technology. The selection first ponders on duality, intermediate inputs and value-added, Hicks' aggregation theorem and the existence of a real value-added function, and homotheticity and real value-added in Canadian manufacturing. Discussions focus on real value-added and the production structure, estimation of the production structure, double deflation and real value-added, measurement of total productivity, and duality between direct and conditional indirect utility functions. The book then examines the estimation techniques for the elasticity of substitution and other production parameters and measurement of the elasticity of factor substitution and bias of technical change. The publication takes a look at the identification of technical change in the electricity generating industry, factor substitution in electricity generation, and the effectiveness of rate-of-return regulation. Topics include statistical tests of regulatory effectiveness, profit function for a regulated firm, tests of the structure of technology, identification problems in the measurement of technical change, and measurement of disembodied technical change. The selection is a valuable source of information for economists and researchers interested in production economics.

Electrophosphorescent Materials and Devices Mark Thompson, 2023-12-14 Organic LEDs (OLEDs) in mobile displays have been in large-scale production for over a decade, and OLED-based televisions are rapidly gaining traction in the marketplace. OLEDs are on the verge of entering the solid-state lighting market in a big way. The OLED technology gives higher color purity and is more efficient than any of the competing technologies. When produced at scale, OLEDs are also economical. A key limitation in the development of OLEDs was the efficient conversion of all of the electrical energy put into the device into light. Until the late 1990s, the maximum efficiency of OLEDs was limited to 25% (photons/electrons), but this limitation was removed and OLEDs with 100% efficiency were reported in the early 2000s. This advance in OLED technology was driven by the author of this book. He and his

collaborators developed electrophosphorescence, which is essential in reaching the 100% efficiency that is now commonplace in commercial devices.

Ecological Data William K. Michener, James W. Brunt, 2009-04-01 Ecologists are increasingly tackling difficult issues like global change, loss of biodiversity and sustainability of ecosystem services. These and related topics are enormously challenging, requiring unprecedented multidisciplinary collaboration and rapid synthesis of large amounts of diverse data into information and ultimately knowledge. New sensors, computers, data collection and storage devices and analytical and statistical methods provide a powerful tool kit to support analyses, graphics and visualizations that were unthinkable even a few years ago. New and increased emphasis on accessibility, management, processing and sharing of high-quality, well-maintained and understandable data represents a significant change in how scientists view and treat data. These issues are complex and despite their importance, are typically not addressed in database, ecological and statistical textbooks. This book addresses these issues, providing a much needed resource for those involved in designing and implementing ecological research, as well as students who are entering the environmental sciences. Chapters focus on the design of ecological studies, data management principles, scientific databases, data quality assurance, data documentation, archiving ecological data and information and processing data into information and knowledge. The book stops short of a detailed treatment of data analysis, but does provide pointers to the relevant literature in graphics, statistics and knowledge discovery. The central thesis of the book is that high quality data management systems are critical for addressing future environmental challenges. This requires a new approach to how we conduct ecological research, that views data as a resource and promotes stewardship, recycling and sharing of data. *Ecological Data* will be particularly useful to those ecologists and information specialists that actively design, manage and analyze environmental databases. However, it will also benefit a wider audience of scientists and students in the ecological and environmental sciences.

Learning Design Rob Koper, Colin Tattersall, 2005-02-18 E-learning is still in its infancy. This can be seen both in the limited pedagogical quality and lack of portability of e-learning content, and in the lack of user-friendly tools to exploit the opportunities offered by current technologies. To be successful, e-learning must offer effective and attractive courses and programmes to learners, while at the same time providing a pleasant and effective work environment for staff members who have the task to develop course materials, plan the learning processes, provide tutoring, and assess performance. To overcome these deficiencies, the IMS Global Learning Consortium Inc. released the Learning Design Specification in 2003. With Learning Design it is possible to develop and present advanced, interoperable e-learning courses embracing educational role and game playing methods, problem-based learning, learning community approaches, adaptivity and peer coaching and assessment methods. In this handbook Koper and Tattersall have

put together contributions from members of the Valkenburg Group, consisting of 33 experts deeply involved in e-learning and more specifically learning design. The result is a rich and lasting source of information for both e-learning course and tool developers, providing information about the specification itself, how to implement it in practice, what tools to use, and what pitfalls to avoid. The book not only reports first experiences, but also goes beyond the current state of the art by looking at future prospects and emerging applications.
