The Yezidis John S. Guest,2023-01-27 First Published in 1987 *The Yezidis: A Study in Survival* traces the origin of Yezidi community's religion, describes the discovery of the people by Western travellers in the early nineteenth century and details the Yezidi community's traumatic history and their status in the 80s. The Yezidi religious group is spread out over Iraq, Turkey, Syria, and erstwhile USSR and have retained their identity for over 500 years. The Yezidi's believe that Lucifer, the fallen angel, has been forgiven by God and reinstated as chief angel: their history is, like their faith, characterized by dignity and survival in the face of great odds. Chapters also cover Sultan Abdul Hamid's cruel but vain efforts to force the Yezidis to embrace Islam, leading to the emergence of Mayan Khatun, a strong-willed Yezidi princess who ruled the community from 1913-1958. They include vivid account of her rivalry with her brother Ismail and the ill-fated marriage between her son and his daughter. The final chapter describes the community in Soviet Armenia and Georgia. This book is a must read for students of Middle East studies and Middle East history.

Mathematics Education in East Africa Anjum Halai, Geoff Tennant, 2016-03-08 *THIS BOOK WILL SOON BE AVAILABLE AS OPEN ACCESS BOOK* This book is a valuable resource for policymakers and practitioners as it brings insights mainly from developing countries where relatively less research activity takes place. It is also a valuable resource for courses in mathematics education in the teacher education colleges, and departments of education in the sub-Saharan Africa region. In the increasingly global and technological world mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility. Hence, countries and development agencies in the broader sub-Saharan Africa region are looking towards increasing access to relevant and high-quality secondary education as a lever towards economic development. Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform. In the East Africa region also a number of initiatives have been taken at the national level in the respective countries to improve the quality of mathematics education. This book provides an in-depth comparative analysis of the developments and issues in mathematics education in Kenya, Tanzania, Rwanda and Uganda, and advances our understanding of the state of secondary mathematics education in East Africa.
