2014 Li Yuming,Li Wei,2019-09-23 China, with the world's largest population, numerous ethnic groups and vast geographical space, is also rich in languages. Since 2006, China's State Language Commission has been publishing annual reports on what is called language life in China. These reports cover language policy and planning initiatives at the national, provincial and local levels, new trends in language use in a variety of social domains, and major events concerning languages in mainland China, Hong Kong, Macau and Taiwan. Now for the first time, these reports are available in English for anyone interested in Chinese language and linguistics, China's language, education and social policies, as well as everyday language use among the ordinary people in China. The invaluable data contained in these reports provide an essential reference to researchers, professionals, policy makers, and China watchers.

Communication Convergence in Contemporary China

Communication Convergence in Contemporary China Patrick Shaou-Wheia

Dodge,2020-11-01 In a speech opening the nineteenth Chinese Communist Party Congress meeting in October 2017, President Xi Jinping spoke of a “New Era” characterized by new types of communication convergence between the government, Party, and state media. His speech signaled that the role of the media is now more important than ever in cultivating the Party’s image at home and disseminating it abroad. Indeed, communication technologies, people, and platforms are converging in new ways around the world, not just in China. This process raises important questions about information flows, control, and regulation that directly affect the future of US-China relations. Just a year before Xi proclaimed the New Era, scholars had convened in Beijing at a conference cohosted by the Communication University of China and the US-based National Communication Association to address these questions. How do China and the United States envision each other, and how do our interlinked imaginaries create both opportunities for and obstacles to greater understanding and strengthened relations? Would the convergence of new media technologies, Party control, and emerging notions of netizenship in China lead to a new age of opening and reform, greater Party domination, or perhaps some new and intriguing combination of repression and freedom? Communication Convergence in Contemporary China presents international perspectives on US-China relations in this New Era with case studies that offer readers informative snapshots of how these relations are changing on the ground, in the lived realities of our daily communication habits.

HCI International 2022 - Late Breaking Posters Constantine Stephanidis,Margherita Antona,Stavroula Ntoa,Gavriel Salvendy,2022-11-24 Volume CCIS 1654 is part of the refereed proceedings of the 24th International Conference on Human-Computer Interaction, HCII 2022, which was held virtually during June 26 to July 1, 2022. A total of 5583 individuals from academia, research institutes, industry, and governmental agencies from 88 countries submitted contributions, and 1276 papers and 275 posters were included in the proceedings that were published just before the start of the conference. Additionally, 296 papers and 181 posters are included in the volumes of the proceedings published after the conference, as “Late Breaking Work” (papers and posters). The contributions thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas.

Types of Nonverbal Communication Xiaoming Jiang,2021-09-29 The use of nonverbal cues in social activities is essential for human daily activities. Successful nonverbal communication relies on the acquisition of rules of using cues from body movement, eye contact, facial expression, tone of voice, and more. As such, this book adds to our understanding of nonverbal behavior by examining state-of-the-art research efforts in the field. The book addresses the classification and training of nonverbal communication with advanced technologies, gives an overview on factors underlying the learning and evaluating of nonverbal communications in educational settings and in digital worlds, and characterizes the latest advancement that uncovers the psychological nature underlying nonverbal communication in conversations. We hope the book will reach a large audience for a variety of purposes, including students and professors in academic institutions for teaching and research activities as well as researchers in industries for the development of communication-related products, benefiting both healthy individuals and special populations.

Multilingualism Online Carmen Lee,2016-09-13 By the co-author of Language Online, this book builds on the earlier work while focusing on multilingualism in the digital world. Drawing on a range of

digital media – from email to chatrooms and social media such as Facebook, Instagram, and YouTube – Lee demonstrates how online multilingualism is closely linked to people's offline literacy practices and identities, and examines the ways in which people draw on multilingual resources in their internet participation. Bringing together central concepts in sociolinguistics and internet linguistics, the eight chapters cover key issues such as: language choice code-switching identities language ideologies minority languages online translation. Examples in the book are drawn from both all the major languages and many lesser-written ones such as Chinese dialects, Egyptian Arabic, Irish, and Welsh. A chapter on methodology provides practical information for students and researchers interested in researching online multilingualism from a mixed methods and practice-based approach.

Multilingualism Online is key reading for all students and researchers in the area of multilingualism and new media, as well as those who want to know more about languages in the digital world.

The Semiotics of Emoji Marcel Danesi, 2016-11-17 Shortlisted for the BAAL Book Prize 2017 Emoji have gone from being virtually unknown to being a central topic in internet communication. What is behind the rise and rise of these winky faces, clinking glasses and smiling poos? Given the sheer variety of verbal communication on the internet and English's still-controversial role as lingua mundi for the web, these icons have emerged as a compensatory universal language. The Semiotics of Emoji looks at what is officially the world's fastest-growing form of communication. Emoji, the colourful symbols and glyphs that represent everything from frowning disapproval to red-faced shame, are fast becoming embedded into digital communication. Controlled by a centralized body and regulated across the web, emoji seems to be a language: but is it? The rapid adoption of emoji in such a short span of time makes it a rich study in exploring the functions of language. Professor Marcel Danesi, an internationally-known expert in semiotics, branding and communication, answers the pertinent questions. Are emoji making us dumber? Can they ultimately replace language? Will people grow up emoji literate as well as digitally native? Can there be such a thing as a Universal Visual Language? Read this book for the answers.

Social Media and Society Qihao Ji, 2023-11-27 This book offers a detailed exploration of the role social media plays in our daily lives and across a variety of contexts, from social networking sites, messaging applications, and enterprise communication platforms to virtual reality. Offering readers an introduction to the uses, effects, and central debates surrounding the subject of social media, this text is organized into three sections, each with a distinct focus. Part I provides an overview of social media, defining it through communication characteristics and exploring both theoretical and practical approaches to understanding it; Part II examines the impact of social media on individual users, including its effects on expression, health, and relationship management; and Part III investigates the wider social implications of social media, including its impact on politics, entertainment, marketing, and information consumption. Featuring key contemporary case studies and learner-centered exercises throughout, this book offers a rich and engaging look at the most pertinent issues of the social media era on both an individual and societal level. This is an essential text for students of digital media, communication, journalism, and beyond, as well as a useful resource for researchers

and industry professionals interested in exploring the social and psychological effects of social media.

Cuteness Engineering Aaron Marcus,Masaaki Kurosu,Xiaojuan Ma,Ayako Hashizume,2017-10-30 This state of the art monograph presents a unique introduction to thinking about cuteness and its incorporation into modern, especially computer-based, products and services. Cuteness is defined and explored in relation to user-centered design concepts and methods, in addition to considering the history of cuteness and cuteness in other cultures, especially in relation to eastern Asia. The authors provide detailed analyses and histories of cuteness in Japan and in China, the rise of Kawaii and Moe cultural artifacts, and their relation to social, psychological, and design issues. They also attempt an initial taxonomy of cuteness. Finally, detailed interviews with leading designers of cute products and services, such as Hello Kitty, provide an understanding of the philosophy and decision-making process of designers of cuteness. *Cuteness Engineering: Designing Adorable Products and Services* will be of interest and use to a wide range of professionals, researchers, academics, and students who are interested in exploring the world of cuteness in fresh new ways and gaining insights useful for their work and studies.

The Nanjing Massacre and the Making of Mediated Trauma Hongtao Li,Shunming

Huang,2021-08-31 Drawing on cultural trauma theory, this book investigates how collective memory of the Nanjing Massacre is fashioned in China and how the mass media, political power and public praxis jointly shape the politics and culture of memory in contemporary China. Allowing for the dimensions of history and different mediating spaces, the authors first conduct textual analysis of news reports from traditional media since the event took place, revealing that the significance of the Massacre was initially portrayed as a local incident before its construction as a national trauma and finally a collective memory. In a study of physical and online memorial spaces, including the Memorial Hall, commemorative activities on the Internet and new media platforms, the book unveils the production and reproduction of trauma narratives as well as how these narratives have been challenged. The final part further studies the interactions between media and other institutional settings while exploring issues of global memory and reconciliation in East Asia. The title will be an essential read for anyone interested in memory studies, media and communication, and particularly the collective memory of the Nanjing Massacre.

The Japanese Self in Cultural Logic Takie Sugiyama Lebra,2004-09-30 The self serves as a universally available, effective, and indispensable filter for making sense of the chaos of the world. In her latest book, Takie Lebra attempts a new understanding of the Japanese self through her unique use of cultural logic. She begins by presenting and elaborating on two models (opposition logic and contingency logic) to examine concepts of self, Japanese and otherwise. Guided by these, she delves into the three layers of the Japanese self, focusing first on the social layer as located in four zones—omote (front), uchi (interior), ura (back), and soto (exterior)—and its shifts from zone to zone. New light is shed on these familiar linguistic and spatial categories by introducing the dimension of civility. The book expands the discussion in relation to larger constructions of the inner and cosmological self. Unlike the social self, which views itself in relation to the other, the inner layer involves a reflexivity in which self communicates with self. While the social self engages in dialogue or triologue, the inner self communicates through monologue or soliloquy. The cosmological layer, which centers around transcendental beliefs and fantasies, is examined and the analysis supplemented with comments on aesthetics. Throughout, Lebra applies her methodology to dozens of Japanese examples and makes relevant comparisons with North American culture and notions of self. Finally, she provides a spirited analysis of critiques of Nihonjinron to reinforce the relevancy of Japanese studies. This volume is the culmination of decades of thinking on self and social relations by one of the most influential scholars in the field. It will prove highly instructive to Japanese and non-Japanese readers alike in a range of disciplines, including anthropology, sociology, and social psychology.
