**Celestia** Manuele Fior,2021-07-20 This highly anticipated new graphic novel from Manuele Fior (The Interview and 5,000 KM Per Second) showcases his singular talents as a once-in-a-generation visual artist and a deeply empathetic writer who uses science fiction to look to the future of humanity. The “Great Invasion” originated from the sea. It moved north across the mainland. Many fled, while some took refuge on a small concrete island called Celestia, built over a thousand years ago. Now cut off from the mainland, Celestia has become an outpost for criminals and other misfits, as well as a refuge for a group of young telepaths. Events push two of them, Dora and Pierrot, to flee the island and set sail to the mainland. There, they discover a world on the precipice of a metamorphosis, though also a world where adults are literally prisoners of their own fortresses, unintentionally preserving the “old world” at a time when a new generation could guide society towards a better humanity. Celestia is the most ambitious and successful graphic novel to date by one of the world’s most exciting storytellers.

*Media and the City* Simone Tosoni,Matteo Tarantino,Chiara Giaccardi,2013 The percentage of people living in cities and the adoption rates of communication technologies continue to grow across the planet. Our age has come to be defined as one of urbanism and communication; but how are those two intertwined? How do they shape each other? Where and in which ways do they diverge, support or fold into each other? As new tensions emerge and old ones find new solutions, social sciences are forced into a dialogue with media studies and urban studies in order to make sense of the new reality. New theoretical and methodological paradigms are urgently needed, and can be produced only through a fertile and eclectic dialogue. This volume presents some of the latest research in this exciting, cross-disciplinary field. Issues of conflict, mobility, crime, art, memory, ethnicity, identity, and city marketing and branding come under rigorous scrutiny in their mutual and constitutive relationship with urban space and communicative technologies and practices. The volume is divided into three broad sections. The first section deals with the role of media in the social production of urban space â that is, with how media interact with other forces in giving shape to the materiality of the city. The second section deals with how urban space acts as a context for a variety of media-related practices â especially in relation to the popularization of mobile geo-localization technologies which have given us mass phenomena such as Foursquare. The third and final section deals with how urban space is mediated and communicated through ICTs â or in other terms, how urban space is represented by specific media through specific discursive strategies.

90 Two (HB) Dastan Khalili,2022-02-23 90 Two (HB) By: Dastan Khalili DiaVerse, dia meaning “two” and verse for the poetic rhyme, is a brand-new style of poetry where the only rule is all stanzas must have a maximum of two words. Created by poet Dastan Khalili, the style of DiaVerse breathes new life into poetry. The restraint of DiaVerse forces poets to use the purest forms of expression. 90 Two is ninety of Khalili’s DiaVerse poems, written over the last five years. He combines his poetic verses with digital artwork and imagery, each conveying a sensation of inspiration that came to life with each poem.

**The Internet as Second Action Space** Aharon Kellerman,2014-07-11 One of the most significant and important advancements in information and communication technology over the past 20 years is the introduction and expansion of the Internet. Now almost universally available, the Internet brings us email, global voice and video communications, research repositories, reference libraries, and almost unlimited opportunities for daily activities. Bridging geographical distances in unprecedented ways, the Internet has impacted all aspects of our daily lives – from facilitating the running of businesses, the attainment of services and keeping in touch with friends and family. Accessible at any time and for many of us from our mobile phones, the Internet has opened up a world of knowledge and communication platforms that we cannot now imagine living without. This book explores the concept that the Internet has become a second action space for individuals. Coexisting with traditional and obvious real space, the Internet serves as a novel spatial platform and action space to its subscribers all over the world. Kellerman expertly discusses this notion and examines the practical integration of cyberspace with real space. Part I examines the Internet as a platform for action and presents its relations with physical space concerning a range of uses and applications which were traditionally performed in physical space only. It discusses the idea that the Internet has become a second space and explores theoretical perspectives surrounding this notion. The Internet has undeniably made humankind more efficient and connected. Part II explores the Internet as an action space for human life, considering basic human needs, curiosity, identity and social relations. It further considers instances whereby use and application of the Internet cannot be fully performed in real space, mainly regarding people’s presentation of identity. Part III explores daily actions over the Internet, such as work, shopping, banking and social interactions. Kellerman also briefly touches on the darker aspects that the expansion of the Internet has made possible – including its role in fraud and other crimes. The concluding chapter discusses people living across the two spaces and identifies potential future developments. The Internet as Second Actions Space will appeal to students across the social sciences, in particular those studying Geography, Sociology, Media Studies, Internet Studies, Business and related disciplines.

*The Stones of Venice* Lionello Puppi,Mark E. Smith,2002 It is the meeting of stone and water that creates much of the magic of Venice, the solidity and

permanence of the former and the evanescent fragility of the latter. Had Venice been built of wood, the incursions of sea water and the rugged climate would have destroyed the city centuries ago. What these elements have done, however, is to wear away exterior surfaces, making the simplest brick wall an object of contemplation, and giving a special patina to the expensive marbles used for anything from a staircase to a masterpiece of sculpture. The Venetians were great craftsmen and artists, and their use of stone is unparalleled in any other city. Following the Byzantine tradition, multi-coloured pieces of marble and semi-precious stone covered the floors of a religious building in a magic mosaic, while later on chips of marble of all possible hues were tossed into cement to carpet the floors of great palaces. During the middle ages and the Renaissance, multi-coloured marble tombs climbed up the walls of the city's churches and great artists such as Andrea Verrochio, Alessandro Vittoria or Tiziano Aspetti made magnificent stones statues in all sizes for church and state as well as for t

**The Last Mermaid** Shana Abé,2008-04-29 Shana Abé has entranced countless readers with her passion-filled novels of adventure, intrigue, and romance. Now the author of The Secret Swan delivers a gift from the sea: three hauntingly beautiful tales connected by a legend, a locket, and a love beyond time. 531 a.d.: The tiny island of Kell is said to be enchanted, inhabited by an extraordinary creature who comforts shipwrecked sailors passing into the next world. Prince Aedan of the Isles believes in no such nonsense—until he awakens on Kell itself and meets the sensuous siren who rescued him from the sea. 1721: Ronan MacMhuirich, Earl of Kell, is the target of an unlikely assassin: Leila, a mysterious woman from an exotic land. But his irresistibly beautiful would-be slayer is in just as much danger as Ronan when she falls for this man with a magic of his own. 2004: What do you do when you inherit a Scottish island you never knew existed—and find yourself pursued by a handsome stranger who wants to buy it from you? That’s what happens to Ruri Kell when she accepts Iain MacInnes’s invitation to visit her birthright, and listens to a proposition as sinfully tempting as everything else about him. Three seductive love stories, three passionate couples, all linked by one of the most romantic myths of all.

Global Geographies of the Internet Barney Warf,2012-08-01 Today, roughly 2 billion people use the internet, and its applications have flourished in number and importance. This volume will examine the growth and geography of the internet from a political economy perspective. Its central motivation is to illustrate that cyberspace does not exist in some aspatial void, but is deeply rooted in national and local political and cultural contexts. Toward that end, it will invoke a few major theorists of cyberspace, but apply their perspectives in terms that are accessible to readers with no familiarity with them. Beyond summaries of the infrastructure that makes the internet possible and global distributions of users, it delves into issues such as the digital divide to emphasize the inequalities that accompany the growth of cyberspace. It also addresses internet censorship, e-commerce, and e-government, issues that have received remarkably little scholarly attention, particularly from a spatial perspective. Throughout, it demonstrates that in cyberspace, place matters, so that no comprehensive understanding of the internet can be achieved without considering how it is embedded within, and in turn changes, local institutional and political contexts. Thus the book rebuts simplistic “death of distance” views or those that assert there is, or can be, a “one-size-fits-all, cookie-cutter” model of the internet applicable to all times and places.

Engineering Earth Stanley D. Brunn,2011-03-19 This is the first book to examine the actual impact of physical and social engineering projects in more than fifty countries from a multidisciplinary perspective. The book brings together an international team of nearly two hundred authors from over two dozen different countries and more than a dozen different social, environmental, and engineering sciences. Together they document and illustrate with case studies, maps and photographs the scale and impacts of many megaprojects and the importance of studying these projects in historical, contemporary and postmodern perspectives. This pioneering book will stimulate interest in examining a variety of both social and physical engineering projects at local, regional, and global scales and from disciplinary and trans-disciplinary perspectives.

**Permanent Obscurity** Dolores Santana,2010-04 Permanent Obscurity is a youthful bohemian satire, a story of alienated nonconformists, a Thelma & Louise story. This pulp epic could be labeled a black comedy. It could be labeled anticonsumer and subversive. Welcome to the psychosexual world of Permanent Obscurity. Inspired by the underground sexploitation films of the 1960s, this bold updating of the roughies subgenre largely takes place in New York City's East Village (ca. 2006), and it chronicles the rise and fall of a unique and intense friendship. Dolores and Serena, two chemically dependent, down-and-out artists set out to take control of their lives by making a fetish-noir/femdom movie. Of course, things don't exactly turn out as planned.

**The Philosophy of Welfare** Richard Morris Titmuss,1987  
*Truth and Fiction: Notes on (Exceptional) Faith in Art* Milcho Manchevski,2012 Reflecting upon his experience making his 2010 feature film Mothers, a cinematic triptych interweaving three narratives that are each, in their own way, about the often tenuous lines between truth and fiction, and one of which actually morphs into a documentary about the aftermath in a small Macedonian town where three retired cleaning women were found raped and killed in 2008 and the murderer turned out to be the journalist covering the story for a major Macedonian newspaper, the Oscar-nominated Macedonian-born and New York-based writer-director Milcho Manchevski writes that, “Most of us look at films differently or accept stories in a different way if we believe that they are true. We watch a documentary film in a different way from the way we watch a drama. We read a magazine article in a different way from the way in which we read a short story. Sometimes, we even treat a film that employs actors differently than a regular drama because we were told that it is based on something that really happened. We treat these works based on truth or reporting on the truth in different ways. “Why? “What is it in our relation to reality or in our relation to what we perceive to be reality that makes us value a work of artifice (an art piece) differently depending on our knowledge or conviction of whether that work of artifice is based on events that really took place?”
