The Whole Story Behind Blind Adaptive Equalizers/ Blind Deconvolution

Monika Pinchas, 2012 It is well known that Intersymbol (ISI) Interference is a limiting factor in many communication environments where it causes an irreducible degradation of the bit error rate (BER) thus imposing an upper limit on the data symbol rate. In order to overcome the ISI problem, an equalizer is implemented in those systems. Among the three types of equalizers - non-blind, semi-blind and blind - the blind equalizer has the benefit of bandwidth saving and there is no need of going through a training phase. Blind equalization algorithms are essentially adaptive filtering algorithms designed such that they do not require the external supply of a desired response to generate the error signal in the output of the adaptive equalization filter. The algorithms generate an estimate of the desired response by applying a nonlinear transformation to sequences involved in the adaptation process. This nonlinearity is designed to minimize a cost function that is implicitly based on higher order statistics (HOS) according to one approach, or calculated directly according to the Bayes rules. *The Whole Story behind Blind Adaptive Equalizers/ Blind Deconvolution* gives the readers a full understanding on the blind deconvolution. The e-book covers a variety of blind deconvolution/equalization methods based on both cost functions and Bayes rules where simulation results are supplied to support the theory. These include the Maximum Entropy density approximation technique and the Edgeworth Expansion approach used in various blind equalizers. It also describes the relationship between the cost function approach and the approach taken according to Bayes rules. The e-book deals also with the effect of various system parameters (such as the step-size parameter or the equalizer's tap length) have on the obtained equalization performance. This e-book will be of particular interest to advanced communications engineering undergraduate students, graduate students, university instructors and signal processing researchers.

Colby Vs. Colby Debra Webb, 2007-06-01 With their reputations and Sunday dinner in jeopardy, Victoria Colby-Camp and her son Jim were not about to give in when it came to Sam Johnson. He was Jim Colby's newest Equalizer—but a mystery to everyone else. Until the past caught up to him when Officer Lisa Smith was called in to drag him back to the City of Angels to clear his name. Hired by the Colby Agency, Lisa was by the book in every way, except when it came to Sam. After all this time, she couldn't forget him—and she had tried. With Sam framed for three gangland killings, Lisa found herself unraveling a man who trusted no one. But Sam would have to let Lisa in if they were ever going to expose a brutal killer before it was too late for the next victim...and the Colbys.

Neuro-Fuzzy Equalizers for Mobile Cellular Channels K.C.

Raveendranathan, 2017-11-22 Equalizers are present in all forms of communication systems. *Neuro-Fuzzy Equalizers for Mobile Cellular Channels* details the modeling of a mobile broadband communication channel and designing of a neuro-fuzzy adaptive equalizer for it. This book focuses on the concept of the simulation of wireless channel equalizers using the adaptive-network-based fuzzy inference system (ANFIS). The book highlights a study of currently existing equalizers for wireless channels. It discusses several techniques for channel equalization, including the type-2 fuzzy adaptive filter (type-2 FAF), compensatory neuro-fuzzy filter (CNFF), and radial basis function (RBF) neural network. *Neuro-Fuzzy Equalizers for Mobile Cellular Channels* starts with a brief introduction to channel equalizers, and the nature of mobile cellular channels with regard to the frequency reuse and the resulting CCI. It considers the many channel models available for mobile cellular channels, establishes the mobile indoor channel as a Rayleigh fading channel, presents the channel equalization problem, and focuses on various equalizers for mobile cellular channels. The book discusses conventional equalizers like LE

and DFE using a simple LMS algorithm and transversal equalizers. It also covers channel equalization with neural networks and fuzzy logic, and classifies various equalizers. This being a fairly new branch of study, the book considers in detail the concept of fuzzy logic controllers in noise cancellation problems and provides the fundamental concepts of neuro-fuzzy. The final chapter offers a recap and explores venues for further research. This book also establishes a common mathematical framework of the equalizers using the RBF model and develops a mathematical model for ultra-wide band (UWB) channels using the channel co-variance matrix (CCM). Introduces the novel concept of the application of adaptive-network-based fuzzy inference system (ANFIS) in the design of wireless channel equalizers Provides model ultra-wide band (UWB) channels using channel co-variance matrix Offers a formulation of a unified radial basis function (RBF) framework for ANFIS-based and fuzzy adaptive filter (FAF) Type II, as well as compensatory neuro-fuzzy equalizers Includes extensive use of MATLAB® as the simulation tool in all the above cases

CMOS Continuous-Time Adaptive Equalizers for High-Speed Serial Links Cecilia

Gimeno Gasca,Santiago Celma Pueyo,Concepción Aldea Chagoyen,2014-09-22 This book introduces readers to the design of adaptive equalization solutions integrated in standard CMOS technology for high-speed serial links. Since continuous-time equalizers offer various advantages as an alternative to discrete-time equalizers at multi-gigabit rates, this book provides a detailed description of continuous-time adaptive equalizers design - both at transistor and system levels-, their main characteristics and performances. The authors begin with a complete review and analysis of the state of the art of equalizers for wireline

applications, describing why they are necessary, their types, and their main applications. Next, theoretical fundamentals of continuous-time adaptive equalizers are explored. Then, new structures are proposed to implement the different building blocks of the adaptive equalizer: line equalizer, loop-filters, power comparator, etc. The authors demonstrate the design of a complete low-power, low-voltage, high-speed, continuous-time adaptive equalizer. Finally, a cost-effective CMOS receiver which includes the proposed continuous-time adaptive equalizer is designed for 1.25 Gb/s optical communications through 50-m length, 1-mm diameter plastic optical fiber (POF).

Their journey to love is never an easy one, but when they meet - their hearts beat only for one another. Kyle Chancellor is a hero, an honest to God hero. After winning the Heisman, he turns down a lucrative career as a professional football player to fight in Afghanistan. Not many know he enlisted because his heart was broken. When his time is up, Kyle comes home to form the Equalizers with the members of former Seal Team 7, they band together to fight battles for those who cannot fight for themselves. Hannah Montenegro is a woman who has sacrificed her life to help her family, never knowing the joys and freedom a young girl should enjoy. She lives in constant fear of being discovered in a country where she has no citizenship and no hope for the future. But fate has a plan...the night Kyle comes back to Texas, they meet in a bar where he is drowning his sorrows and she is spreading her wings to learn how to fly. From the moment they touch, the heat between them is undeniable. But unfortunate circumstances separate them and neither dares dream they will see one another again. Kyle is from a powerful Texas family. Because of his work with the Equalizers, his stance on stem-cell research and internet security, he is the only one surprised to find the people of the Lone Star state want him to run for Governor. Many get behind him, including the McCoys. But the one person he wants at his side eludes him. Hannah is always on his mind. From the beginning their relationship is complicated, but when she comes back into his life, he grabs onto her with both hands. Politics, a sex tape, immigration issues and a baby complicates their pathway to happiness. But Kyle is the Thunderbird and Hannah is his soulmate in the truest sense of the word. Their journey to love is one you'll never forget. A modern day Cinderella story with a twist... *Content Warning: Intended for 18+ audience. May not be suitable for all audiences.

A Successive Overrelaxation Iterative Technique for an Adaptive Equalizer Ostap S. Kosovych,1973 This study deals with an adaptive strategy for the equalization of pulse-amplitude-modulated signals in the presence of intersymbol interference and additive noise. The successive overrelaxation iterative technique is used as the algorithm for the iterative adjustment of the equalizer coefficients during a training period for the minimization of the mean square error. With 2-cyclic and non-negative Jacobi matrices

substantial improvement was demonstrated in the rate of convergence over the commonly used gradient techniques. The Jacobi theorems were also extended to non-positive Jacobi matrices. Numerical examples strongly indicate that the improvements obtained for the special cases are possible for general channel characteristics. The technique was analytically demonstrated to decrease the mean square error (norm) at each iteration for a large range of parameter values for light or moderate intersymbol interference and for small intervals for general channels. Again, numerical examples indicate that the norm-decreasing property is valid for a much larger parameter range for all types of intersymbol interference. Analytically, convergence of the relaxation algorithm was proven in a noisy environment and the coefficient variance was demonstrated to be bounded. Numerical simulations conducted indicate that the relaxation algorithm consistently converged much faster than the gradient techniques; hence, it requires much less time in the training period than do the gradients.

Equalization Control for Lithium-ion Batteries Jian Chen,Quan Ouyang,Zhisheng Wang,2023-04-05 This book provides readers with sufficient insight into battery equalization control technologies from both theoretical and engineering perspectives. Distinguished from most of the existing works that focus on the hardware design of active equalizers, this book intends to comprehensively introduce equalization control strategies for lithium-ion battery packs. The validity and reliability of the control strategies in this book have been verified by theory and experiments. This book summarizes the battery equalization technologies from the equalization system to the equalization control algorithm. From this book, readers who are interested in the area of battery management can have a broad view of cell equalization technologies. Readers who have no experience in the battery management area can learn the basic concept, analysis methods, and design principles of the cell equalization system for battery packs. Even for the readers who are occupied in this area, this book provides rich knowledge on engineering applications and future trends of battery equalization control.

No holiday in tiny Salt Lick, Texas, is more revered than January 8th—Elvis's birthday! To commemorate the grand occasion, Hogg's Drive-In—where the King enjoyed many a burger on the road to fame and fortune—is displaying an “actual” pair of Elvis's blue suede shoes. That is, until some heel without a soul swipes them right out of their display case. Debbie Sue Overstreet and Edwina Perkins-Martin—the shoe-loving Domestic Equalizers—are shocked that someone would perpetrate such a dastardly crime. So the plucky detecting duo agrees to help the town's inept sheriff track down the royal blue loafers. And being majestic multitaskers, the ladies might even be able to squeeze in some matchmaking as well. Mix-ups, mayhem, the threat of gunplay, and shocking octogenarian secrets revealed—it's all in a day's work for the Domestic Equalizers, the two best friends whose motto is: Don't get mad . . . get evidence!
