Synthesis And Applications In Chemistry And Materials (In 4 Volumes) Armando J L

Pombeiro,Kamran T Mahmudov,Maria De Fatima Costa Guedes Da Silva,2024-01-16 Chemistry and Material Sciences naturally depend greatly on Synthesis as the initial stage for the existence of compounds

and materials with desired behaviors, within the overall streamline of Design/Synthesis – Properties – Application/Function, and their relations. Such a general approach is of a too wide scope to be properly treated in a single set of publications, but this one on 'Synthesis and Applications in Chemistry and Materials' restricts itself by aiming to show the strength and international character of the current research in synthetic chemistry that is being developed in Portugal or abroad by teams that cooperate with this country. Hence, it gathers representative contributions of main Portuguese research groups and foreign collaborating ones. Nevertheless, the topic should be understood in a wide sense, being open to types of studies with significance on sustainable synthesis and applications in chemistry, materials and/or related sciences.
