Purpose of Evasion Greg Dinallo,2014-07-01 Greg Dinallo's blockbuster Rockets' Red Glare earned rave reviews for its ingenious use of the Cuban Missile Crisis and detailed knowledge of current military technology. Now, with Purpose of Evasion, Dinallo proves he's a master of the techno-thriller genre. Seven Americans languish in captivity somewhere in the Middle East. Soon they will begin to die. In desperation, CIA Director Bill Kiley authorizes the shadowy air force colonel Richard Larkin to carry out a shocking plan: Under the cover of a punitive air raid on Libya, Larkin will deliver two highly sophisticated F-111 bombers to Libyan dictator Muammar el-Qaddafi. The reason? Qaddafi claims that he knows where the hostages are and that he can deliver them safely into American hands. The catch? Larkin must kill two American pilots to make the plan work. In Beirut, a brilliant and handsome Saudi named Saddam Moncrieff, secretly working for the CIA, arranges a meeting with an old lover. She is Katifa, passionate, flawlessly beautiful, and completely committed to the vicious Palestinian terrorist Abu Nidal, who had hidden the hostages somewhere in the Middle East. For the sake of the hostages, Moncrieff must somehow turn Katifa against her master. As Larkin's cynical plot is executed, he makes one crucial mistake: Major Walter Shepherd, one of the American pilots marked for death, escapes. As long as Shepherd lives, the operation can be exposed. Kiley and Larkin make a decision: Shepherd must be found—and killed. A team of assassins is dispatched to locate and terminate the fiercely independent air force pilot. Shepherd sets out on a heart-stopping journey to save his honor and his life—unaware that, at the very same moment, a crack navy SEAL team has been sent on a mission to rescue the hostages. The tension mounts to unbearable levels as Nidal's deadline for killing the hostages draws near, and Shepherd finds himself caught in the violent madness that is the Middle East. Purpose of Evasion is a stunning triumph, an eerily plausible "what if?" techno-thriller set in a world where deception is a way of life and death haunts every moment.

The Foundations of Behavioral Economic Analysis Sanjit Dhami,2016-12-01 This is the first definitive introduction to behavioral economics aimed at advanced undergraduate and postgraduate students. Authoritative, cutting edge, yet accessible, it guides the reader through theory and evidence, providing engaging and relevant applications throughout. It is divided into nine parts and 24 chapters: Part I is on behavioral economics of risk, uncertainty, and ambiguity. The evidence against expected utility theory is examined, and the behavioral response is outlined; the best empirically supported theory is prospect theory. Part II considers other-regarding preferences. The evidence from experimental games on human sociality is given, followed by models and applications of inequity aversion, intentions based reciprocity, conditional cooperation, human virtues, and social identity. Part III is on time discounting. It considers the evidence against the exponential discounted utility

model and describes several behavioral models such as hyperbolic discounting, attribute based models and the reference time theory. Part IV describes the evidence on classical game theory and considers several models of behavioral game theory, including level-k and cognitive hierarchy models, quantal response equilibrium, and psychological game theory. Part V considers behavioral models of learning that include evolutionary game theory, classical models of learning, experience weighted attraction model, learning direction theory, and stochastic social dynamics. Part VI studies the role of emotions; among other topics it considers projection bias, temptation preferences, happiness economics, and interaction between emotions and cognition. Part VII considers bounded rationality. The three main topics considered are judgment heuristics and biases, mental accounting, and behavioral finance. Part VIII considers behavioral welfare economics; the main topics are soft paternalism, and choice-based measures of welfare. Finally, Part IX gives an abbreviated taster course in neuroeconomics.

Linear Dynamical Quantum Systems Hendra I Nurdin,Naoki Yamamoto,2017-05-11 This monograph provides an in-depth treatment of the class of linear-dynamical quantum systems. The monograph presents a detailed account of the mathematical modeling of these systems using linear algebra and quantum stochastic calculus as the main tools for a treatment that emphasizes a system-theoretic point of view and the control-theoretic formulations of quantum versions of familiar problems from the classical (non-quantum) setting, including estimation and filtering, realization theory, and feedback control. Both measurement-based feedback control (i.e., feedback control by a classical system involving a continuous-time measurement process) and coherent feedback control (i.e., feedback control by another quantum system without the intervention of any measurements in the feedback loop) are treated. Researchers and graduates studying systems and control theory, quantum probability and stochastics or stochastic control whether from backgrounds in mechanical or electrical engineering or applied mathematics will find this book to be a valuable treatment of the control of an important class of quantum systems. The material presented here will also interest physicists working in optics, quantum optics, quantum information theory and other quantum-physical disciplines.

Rating Law and Valuation Frances A.S. Plimmer,2016-02-04 Following the introduction of the uniform business rate in 1990, local property taxation changed dramatically, whilst retaining many of its historical and familiar characteristics. Rating Law and Valuation details the existing, non-domestic rating system from the principles of rate liability and the definition of hereditament, the rateable value, to the procedure for compiling and altering the rating lists. The book also discusses how the methods of valuation are used by rating valuers to produce rateable values for the more common property types. The text concludes with a similar treatment of Council Tax which is levied on domestic property. Rating Law and Valuation is written primarily for those studying property valuation as part of their course, and is an indispensable reference book for those taking professional courses of The Royal Institution of Chartered Surveyors (RICS), Incorporated Society of Valuers and Auctioneers (ISVA), and Institute of Revenue and Rating Valuation (IRRV). It is also a useful resource for practitioners who are required to deal with rating law and valuation but who do not do so on a regular basis.
