Sequences in Language and Text George K. Mikros,Ján Macutek,2015-04-24 The edited volume Sequences in Language and Text is the first collection of original research in the area of the quantitative analysis of sequentially organized linguistic data. Linguistic sequences are extremely useful textual structures in almost all areas of Language Technology. Character and word n-grams are by far the most successful features in text classification tasks such as authorship identification, text categorization, genre classification, sentiment analysis etc. Furthermore character linguistic sequences are the basis for linguistic modeling and subsequent applications such as speech recognition, language identification etc. In addition to the above language technology oriented research, the present volume aims to give insight to the theoretical value of linguistic sequences. Sequences in texts can be produced by a number of different factors, either external to the linguistic system or by its own grammatical structure. This volume hosts contributions which will analyze linguistic sequences using quantitative methods under the synergetic theoretical framework that can explain their role in the linguistic system.

Measuring and Visualizing Learning in the Information-Rich Classroom Peter Reimann,Susan Bull,Michael Kickmeier-Rust,Ravi Vatrapu,Barbara Wasson,2015-11-19 Integrated information systems are increasingly used in schools, and the advent of the technology-rich classroom requires a new degree of ongoing classroom assessment. Able to track web searches, resources used, task completion time, and a variety of other classroom behaviors, technology-rich classrooms offer a wealth of potential information about teaching and learning. This information can be used to track student progress in languages, STEM, and in 21st Century skills, for instance. However, despite these changes, there has been little change in the kind of data made available to teachers, administrators, students, and parents. Measuring and Visualizing Learning in the Information-Rich Classroom collects research on the implementation of classroom assessment techniques in technology-enhanced learning environments. Building on research conducted by a multinational and multidisciplinary team of learning technology experts, and specialists from around the globe, this book

addresses these discrepancies. With contributions from major researchers in education technology, testing and assessment, and education psychology, this book contributes to a holistic approach for building the information infrastructure of the 21st Century school.

artistiche nate spontaneamente in sperduti villaggi di montagna. Vecchie aziende agricole ed ex caserme diventate auditorium e spazi espositivi. Rifugi alpini che organizzano festival musicali. Centri sociali occupati che pulsano di feste e musica elettronica fino a notte fonda. Sono i nuovi centri culturali, una rete di realtà spesso lontane dai riflettori che unisce artisti, giovani antagonisti, attivisti, operatori del sociale, studenti. O semplicemente persone che amano il proprio quartiere e la propria comunità.Bagliore – progetto di cheFare in collaborazione con il Saggiatore – riunisce sei racconti di giovani scrittori che attraverso il loro sguardo, individuale, originale, sincero, si sono immersi nella vita quotidiana dei Bagni Pubblici di via Agliè a Torino, degli spazi del Cre.Zi. Plus a Palermo, dell'ExFadda a San Vito dei Normanni, dell'Ex Villaggio Eni a Borca di Cadore, delle Officine Culturali a Catania, di Pollinaria a Civitella Casanova.Attraverso le storie e le testimonianze di chi ha creduto nella possibilità di forme differenti di socialità e relazione tra gli individui, questi luoghi diventano molto più di quello che sembrano: una nuova via, più inclusiva e trasversale, di diffondere la cultura. Ecosistemi collaborativi che nel rispetto e nella valorizzazione del territorio hanno trovato una risposta alternativa alla crisi, trasformandosi in laboratori permanenti in cui immaginare nuovi, e migliori, futuri possibili.

Ai confini del cielo Carlo Santucci,2020-05-31 Il protagonista è Francesco, un uomo amareggiato e deluso dal mondo, che sceglie di abbandonare per sempre la sua vita in Occidente per dirigersi verso l'Oriente, fino a raggiungere per caso l'eremo di un asceta del Nepal, che lo ospita e che per lui si rivelerà un maestro di vita. Questa saggia figura condurrà Francesco in un mondo surreale, fornendogli, attraverso ben dodici racconti, lezioni e insegnamenti fondamentali per la sua esistenza. Mi chiamo Carlo Santucci, nasco a Roma il 27/12/1946. A sette mesi di vita, resto orfano di padre: figlio unico di madre vedova, sono condizionato dall'affettuosa figura materna, che preferisce affidarmi ad orfanotrofi e al semiconvitto salesiano, anziché farmi crescere nel quartiere della Garbatella, poco consono all'educazione, nell'Italia del dopoguerra. Amante delle materie classiche che seguo con profitto per poco tempo, mi ritrovo tuttavia a frequentare l'istituto tecnico industriale "G. Galilei" di Roma dove mi diplomo come perito meccanico, sempre influenzato da scelte di vita materne. Svolgo poi, prima nel Varesotto e quindi a Roma, l'attività di capotecnico presso le Ferrovie dello Stato. La mia fame di scienze umanistiche non si assopisce mai, tuttavia e quando posso, mi dedico volentieri alla lettura, alla scrittura e alla pittura. Ho pubblicato un primo libro di narrativa con Europa Edizioni: si tratta di una raccolta di sei racconti di natura "surreale", con il titolo "Oltre la realtà".

New Directions in Mobile Media and Performance Camille C. Baker,2018-09-03 New Directions in Mobile Media and Performance explores various performative projects and forms of expression that have emerged since the onset of the smartphone. It focuses mainly on new concepts and developments that have emerged in mobile media performance. It showcases the intimate and phenomenological mobile aesthetic that has been unfolding within networked performance and media art projects for over a decade and a half. This aesthetic utilises the potential and affordances with each iteration and update of modern smartphones. Themes of embodiment, presence, liveness and connection through mobile, networked, and remote technology are revisited in the context of HD mobile cameras, selfies and live video streaming from the phone, as well as the impact of peer production, opensource and Maker culture on mobile media performance practices. It explores the surge in development of wearable devices in performance, as well as how the 'quantified-self movement' has affected performance works. It deals with concepts and developments in intermedial performance that incorporate mobile and wearable devices, especially from the artist's, designer's or dramaturge's perspective as the creator and their creative process, working with

technology as a collaborator, not just a tool or guide. The book demonstrates how artists have repurposed the device – transforming it from merely a communication device, using voice and text only – to become a new collaborative medium, a full visual, synaesthetic, interactive and performative tool of deeper expression and social change. It discusses seminal works and the evolution of the medium, within intermedial digital art and performance practices as medium for artistic expression, creative process and staged performances. It focuses on projects and artists who have pushed mobile media performance beyond the conventional blackbox. Emerging visual, digital, interactive, tactile, gestural and theatrical or performance projects that incorporate mobile or wearable devices, used as vehicles for more challenging, experimental, experiential and immersive performative artworks are highlighted. The book also contextualises Baker's own media research and performance practice within the larger landscape with the field. It is bookended with interviews with the artists themselves on their creative process and intentions. It is the outcome of three years of research of artistic works around the world, interviews, in-person viewings of performances, as well as incorporating and reflecting on her own ongoing practice and projects in context.

Outsmarting Autism, Updated and Expanded Patricia S. Lemer,2019-03-19 Nautilus Award Winner, 2019--Silver in Parenting & Family A comprehensive resource for parents, therapists, caregivers, and educators, packed with lifelong strategies for Autism Spectrum Disorder (ASD) management and support Newly revised and updated, this user-friendly guide addresses autism identification, treatment, and prevention from pre-conception through adulthood. Outsmarting Autism describes more than 50 practical approaches with

proven efficacy, including lifestyle modification, dietary considerations, and boosting the immune system. After health improves, focus turns to developing the sensory foundations for communication, social skills, and learning. Patricia Lemer's approach is grounded in research on multifactorial causes, or Total Load Theory, which explains that developmental delays are caused not by one single factor, but by an overload of environmental stressors on genetically vulnerable individuals. Because every person with autism is unique, this book guides readers to the therapies that may be right for each individual, helping to make the difference between management and healing. New research on topics like stem cells, cannabis, and dentistry is now included.
