Eye Color Morgan Worthy,1999 Morgan Worthy, a research psychologist, presents a comprehensive picture of how eye color is related to the behavior of humans and animals. In humans, he used archival records of athletic performance to show the theoretical pattern which has light-eyed athletes performing at their best on self-paced tasks and dark-eyed athletes, on average, performing at their best on reactive tasks. This same general pattern is shown to hold true in animal behaviors such as hunting tactics of predators and escape tactics of prey. Whereas dark-eyed predators tend to rely on immediate, quick, reactions to catch prey, light-eyed predators tend to rely more on their ability to lie-in-wait or stalk prey. Various other behaviors such as perception and social interaction are discussed in the same theoretical framework.

This beautifully illustrated guide begins with the basics of color theory – why we see color, how to categorize and identify color, and relationships between colors – and relates these concepts to beauty and special effects make-up. The book provides a wealth of information, including how to mix flesh tones by using only primary colors, how these colors in paints and make-up are sourced and created, the reason for variations in skin colors and undertones, and how to identify and match these using make-up while choosing flattering colors for the eyes, lips, and cheeks. Colors found inside the body are explained for special effects make-up, like why we bruise, bleed, or appear sick. Ideas and techniques are also described for painting prosthetics, in addition to using color as inspiration in make-up designs. The book also discusses how lighting affects color on film, television, theater, and photography sets, and how to properly light a workspace for successful applications. The second edition features: A brand-new chapter on color inspiration in make-up and design Additional and updated diagrams More real-life application photos and demonstrations, including new examples of tattoo covering and prosthetic painting using optical mixtures, airbrush, and stippling Expanded discussion on undertones, skin variations, color correction, pigments, colored gels, and more Filled with stunning photography and practical information, Color Theory for the Make-up Artist provides guidance and inspiration for both professionals and beginners who wish to train their eye further to understand and recognize distinctions in color.
