101 Windows Phone 7 Apps, Volume I Adam Nathan,2011-04-08 Full Color INCLUDES COMPLETE CODE AND ASSETS FOR EACH APP IN THIS VOLUME! Got a great idea for an app? There's a chapter for that! Calling all developers: Windows Phone 7 is starting to gain traction, and the opportunity is yours to sell the next killer app! 101 Windows Phone 7 Apps is a book series like no other—best-selling author and Microsoft developer Adam Nathan walks you through the process of building 101 real, robust, diverse, and marketplace-certified Silverlight applications. You not only get online access to the full source code and related assets, but the book is chock full of tips, warnings, and advice that can only come from Adam's experience of writing so many complete applications and selling them in the Windows Phone Marketplace. Imagine how long it would take you to develop and test 50 apps and how much you would learn from the experience. Rather than spending all that time starting from scratch, use this book to hit the ground running! Whether you simply make cosmetic changes to apps in this book (for example, creating kid-themed versions), repurpose apps (such as building a mortgage calculator based on Chapter 10's tip calculator), or build something completely unique, this book can greatly accelerate your development time and help you create high-quality apps. Sell your apps in the Windows Phone Marketplace and make this book pay for itself! Volume I contains the first 50 apps and covers the following: Everything you need to know about Silverlight Fully exploiting phone features such as the application bar, hardware/software keyboards, multi-touch, accelerometer, microphone, and more Using rich controls such as pivots, panoramas, and controls in free toolkits, such as date/time pickers, toggle switches, charts, and graphs Building your own custom controls, including popular ones missing from the platform, such as a checkable list box, multi-select picker box, and color picker Broadly applicable pages, such as a photo-cropping page and accelerometer-calibration page How to make your app look and feel like a first-party app Practical tips on a wide range of topics, even acquiring and creating sound effects, using custom fonts, and creating icons

The Wills Eye Manual Kalla Gervasio,Travis Peck,2021-04-29 A best-selling source of compact, authoritative guidance on the treatment of ocular disorders in a variety of settings, The Wills Eye Manual, 8th Edition, is the comprehensive, high-yield reference of choice for both trainees and seasoned practitioners. It provides highly illustrated information on more than 200 ophthalmic conditions along with proven clinical recommendations from initial diagnosis through extended treatment. The consistent, bulleted outline format makes it ideal for portability and quick reference.

Smart Resources in Ophthalmology Parul Ichhpujani,Sahil Thakur,2018-06-06 This book provides information on how to extract the most from mobile applications and easily adapt and integrate them into daily practice. Today mobile applications that can optimize patient flow, help in examinations, perform anterior/posterior segment imaging, offer differential diagnosis and therapeutic options and even serve as patient drug reminders and councilors are easily available. Most of them have been developed by individuals and as a result lack marketing, even though they are free to download and use. Ophthalmology has always been at the forefront of medicine when it comes to adopting the latest developments — be they lasers, off-label anti-VEGF drugs or biocompatible implants. Mobile phones and tablets have infiltrated our private and professional lives and they are here to stay. As such, this book explores the endless possibilities that mobile computing offers, and introduces the vista of opportunities for providing better care, one download at a time. As part of the series “Current Practices in Ophthalmology” this volume is intended for residents and fellows in-training, as well as general and specialist ophthalmologists.

Life in Five Seconds H-57,2013-10-01 Winner of the 2013 Cannes Bronze Book Design Lion and the Epica awards, Life in Five Seconds is a gift for anyone with a good sense of humor and a short attention span. H-57 is a design and advertising with two decades of award-winning work in advertising and the masterminds behind the online infographic History of... series, which has amassed worldwide popularity. Told in ingenious pictographs that are witty, provocative, and to the point, Life in 5 Seconds takes on 200 important events, inventions, great lives, wonders of the natural world, and cultural icons and boils away the useless details to give you the pure essence of knowledge in a bold and irreverent set of illustrations that speak to today's caffeine-charged, jet-fueled, information-overloaded society. You'll laugh out loud as you finally understand the differences between Satan and Santa Claus; explore the vibrancy of artists from Beethoven to Banksy; compare the masonry in the Great Wall of China to that of the Berlin Wall; weigh the importance of Elvis; deconstruct the genius of Ikea; play with the history of video games; and plumb other vitally important holes in your knowledge. From the Hardcover edition.

Safety with Lasers and Other Optical Sources D. H. Sliney,J. Mellerio,2013-11-11 Nearly a decade aga a general review article on the evaluation of optical radia tion hazards was published in Applied Optics (Sliney and Freasier, 1973). This arti cle received many favorable comments but also prompted many inquiries regarding specific optical hazard problems. From this it became evident that a monograph rather than a supplemental and expanded article was needed to fill this literature gap relating to laser and optical radiation hazards. The present work is designed to fill that gap, and is structured to permit either classroom or self-study use. Much of the material in this book was developed in econnection with short courses on laser safety and radiometry in which we have participated, as well as from our previous articles. In particular, the sequenee of chapters is based upon the experiences which we have had in lecturing in courses with different schedules. One of the great difficulties in developing a text of this nature is that a broad, multidisciplinary background must be included in order that the reader can comprehend all of the subject matter readily. For this reason, the material presented on anatomy and physiology is orien ted toward the engineer or physical scientist, while the review material on basic optical physics is intended more for the physician or life scientist.
