*Upgrade* Blake Crouch, 2022-07-12 NEW YORK TIMES BESTSELLER • “If Michael Crichton had written a superhero novel, it would look a lot like *Upgrade*.”—The New York Times Book Review “You don’t so much sympathize with the main character as live inside his skin.”—DIANA GABALDON, #1 New York Times bestselling author of the Outlander series “Mysterious, fascinating, and deeply moving—exploring the very nature of what it means to be human.”—ALEX MICHAELIDES, #1 New York Times bestselling author of *The Silent Patient* and *The Maiden* ONE OF THE BEST BOOKS OF THE YEAR: Time, She Reads The mind-blowing new thriller from the New York Times bestselling author of *Dark Matter* and *Recursion*—currently in development as a motion picture at Steven Spielberg’s Amblin Partners “You are the next step in human evolution.” At first, Logan Ramsay isn’t sure if anything’s different. He just feels a little . . . sharper. Better able to concentrate. Better at multitasking. Reading a bit faster, memorizing better, needing less sleep. But before long, he can’t deny it: Something’s happening to his brain. To his body. He’s starting to see the world, and those around him—even those he loves most—in whole new ways. The truth is, Logan’s genome has been hacked. And there’s a reason he’s been targeted for this upgrade. A reason that goes back decades to the darkest part of his past, and a horrific family legacy. Worse still, what’s happening to him is just the first step in a much larger plan, one that will inflict the same changes on humanity at large—at a terrifying cost. Because of his new abilities, Logan’s the one person in the world capable of stopping what’s been set in motion. But to have a chance at winning this war, he’ll have to become something other than himself. Maybe even something other than human. And even as he’s fighting, he can’t help wondering: what if humanity’s only hope for a future really does lie in engineering our own evolution? Intimate in scale yet epic in scope, *Upgrade* is an intricately plotted, lightning-fast tale that charts one man’s thrilling transformation, even as it asks us to ponder the limits of our humanity—and our boundless potential.

Rethinking Research Methods in an Age of Digital Journalism Michael Karlsson, Helle Sjøvaag, 2018-10-18 The digital infrastructure of media production, dissemination and consumption is becoming increasingly complex, presenting the challenge of how we should research the digital journalism environment. Digital journalism takes many forms - we therefore need to revise, improve, adjust and even invent methods to understand emerging forms of journalism. In this book, scholars at the forefront of methodological innovations in digital journalism research share their insights on how to collect, process and analyse the diverse expressions of digital journalism, including online news, search results, hyperlinks and social media posts. As digital journalism content often comes in the form of big data, many of these new approaches depart from the traditional methods used in media research in significant ways. As we move towards new ways of understanding digital journalism, the methods developed for such purposes also need to be grounded in scientific rigour. This book aims to share some of the emerging processes by which these

methods, tools and approaches are designed, implemented and validated. As such, this book not only constitutes a benchmark for thinking about research methods in digital journalism, it also provides an entry point for graduate students and seasoned scholars aiming to do research on digital journalism. This book was originally published as a special issue of Digital Journalism.

**Transparency and Surveillance as Sociotechnical Accountability** Deborah G. Johnson, Priscilla M. Regan, 2014-07-11  
Surveillance and transparency are both significant and increasingly pervasive activities in neoliberal societies. Surveillance is taken up as a means to achieving security and efficiency; transparency is seen as a mechanism for ensuring compliance or promoting informed consumerism and informed citizenship. Indeed, transparency is often seen as the antidote to the threats and fears of surveillance. This book adopts a novel approach in examining surveillance practices and transparency practices together as parallel systems of accountability. It presents the house of mirrors as a new framework for understanding surveillance and transparency practices instrumented with information technology. The volume centers around five case studies: Campaign Finance Disclosure, Secure Flight, American Red Cross, Google, and Facebook. A series of themed chapters draw on the material and provide cross-case analysis. The volume ends with a chapter on policy implications.
