Advances in Intelligent Manufacturing and Service System Informatics Zekâi Şen,Özer Uygun,Caner Erden,2023-11-02 This book comprises the proceedings of the 12th International Symposium on Intelligent Manufacturing and Service Systems 2023. The contents of this volume focus on recent technological advances in the field of artificial intelligence in manufacturing & service systems including machine learning, autonomous control, bioinformatics, human-artificial intelligence interaction, digital twin, robotic systems, sybersecurity, etc. This volume will prove a valuable resource for those in academia and industry.

Beyond Quantity Andreas Sudmann,Anna Echterhölter,Markus Ramsauer,Fabian Retkowski,Jens Schröter,Alexander Waibel,2023-11-30 How do artificial neural networks and other forms of artificial intelligence interfere with methods and practices in the sciences? Which interdisciplinary epistemological challenges arise when we think about the use of AI beyond its dependency on big data? Not only the natural sciences, but also the social sciences and the humanities seem to be increasingly affected by current approaches of subsymbolic AI, which master problems of quality (fuzziness, uncertainty) in a hitherto unknown way. But what are the conditions, implications, and effects of these (potential) epistemic transformations and how must research on AI be configured to address them adequately?

Towards a Sociology of Selfies Maria-Carolina Cambre,Christine

Lavrence,2023-02-17 This book examines selfies as a relational and processual networked social practice, performed between people within digital contexts and that involve online/offline intersections and tensions. It offers an analysis of selfies through a rich and interdisciplinary framework, that explores the ritualized and affective engagements selfies provoke from others. Given that selfies by definition are shared and posted through networked platforms, they complicate notions of traditional photographic self-portraiture. As such, this book explores how selfies invoke broader, stratified patterns of looking that are occluded in discourses of empowerment and visibility, as well as the subjectivities these networked practices work to produce. Drawing on extensive qualitative research conducted over a period of three years, this book questions not only what selfies are but what they do, the worlds they create, the imaginaries that organize them, and the flows of desire, affect and normativity that underpin them, questions that can only be addressed through research that closely attends to the experience of selfie-takers. It will be of interest to those working in the fields of Sociology, Cultural studies, Communications, Visual Studies, Social Media studies, Feminist research and Affect Theory.

Disrupting Africa Olufunmilayo B. Arewa,2021-07-29 In the digital era, many African countries sit at the crossroads of a potential future that will be shaped by digital-era technologies with existing laws and institutions constructed under conditions of colonial and post-colonial authoritarian

rule. In *Disrupting Africa*, Olufunmilayo B. Arewa examines this intersection and shows how it encompasses existing and new zones of contestation based on ethnicity, religion, region, age, and other sources of division. Arewa highlights specific collisions between the old and the new, including in the 2020 #EndSARS protests in Nigeria, which involved young people engaging with varied digital era technologies who provoked a violent response from rulers threatened by the prospect of political change. In this groundbreaking work, Arewa demonstrates how lawmaking and legal processes during and after colonialism continue to frame contexts in which digital technologies are created, implemented, regulated, and used in Africa today.

Pattern Recognition, Computer Vision, and Image Processing. ICPR 2022 International Workshops and Challenges Jean-Jacques Rousseau, Bill Kapralos, 2023-08-09 This 4-volumes set constitutes the proceedings of the ICPR 2022 Workshops of the 26th International Conference on Pattern Recognition Workshops, ICPR 2022, Montreal, QC, Canada, August 2023. The 167 full papers presented in these 4 volumes were carefully reviewed and selected from numerous submissions. ICPR workshops covered domains related to pattern recognition, artificial intelligence, computer vision, image and sound analysis. The Selfie, Temporality, and Contemporary Photography Claire

Raymond, 2021-05-09 This book is a theoretical examination of the relationship

between the face, identity, photography, and temporality, focusing on the temporal episteme of selfie practice. Claire Raymond investigates how the selfie's involvement with time and self emerges from capitalist ideologies of identity and time. The book leverages theories from Katharina Pistor, Jacques Lacan, Rögnvaldur Ingthorsson, and Hans Belting to explore the ways in which the selfie imposes a dominant ideology on subjectivity by manipulating the affect of time. The selfie is understood in contrast to the self-portrait. Artists discussed include James Tylor, Shelley Niro, Ellen Carey, Graham MacIndoe, and LaToya Ruby Frazier. The book will be of interest to scholars working in visual culture, history of photography, and critical theory. It will also appeal to scholars of philosophy and, in particular, of the intersection of aesthetic theory and theories of ontology, epistemology, and temporality.

Liberal Education: Analog Dreams in a Digital Age Karim Dharamsi, David Clemis, 2023-09-12 The essays in this collection contemplate the various intersections and barriers between artificial intelligence along with the values and practices of liberal education. For the proponents of liberal education as a core component of undergraduate education, the study of literature, history, philosophy, and the social sciences, like their objects and their forms of practice, are perceived to be about what is essentially human. In spheres previously thought to be exclusively human domains, modern, digitally-constructed artificial intelligence has profound implications for

liberal studies, how they may be practiced, and why they are important. This collection explores the implications of AI and the world it is shaping as a potential threat and augmentation of liberal education. These essays also demonstrate how liberal studies illuminate the meaning and significance of AI and how they have shaped its development and character. The contributors to this volume write from the perspectives of philosophy, classical studies, political theory, fine art, curriculum development, and computing and information science. Several essays consider how the conventional concerns and agendas of liberal education have acquired a new urgency in the digital age. They reflect upon how the deployment of artificial intelligence confronts and problematizes what it means to be human, and how liberal education is needed to preserve and ensure what makes us humans thrive. Other essays consider how AI must be understood as an extension of our humanity and how the ethos must inform the further development and deployment of new technologies of liberal education. These challenging essays pose hard questions and the unflinching exploration of matters at the cutting edge of science, culture, and how they merge together with education.

Multimedia Forensics Husrev Taha Sencar,Luisa Verdoliva,Nasir

Memon,2022-04-02 This book is open access. Media forensics has never been more relevant to societal life. Not only media content represents an ever-increasing share of the data traveling on the net and the preferred communications means for most users, it has also become integral part of most innovative applications in the digital information ecosystem that serves various sectors of society, from the entertainment, to journalism, to politics. Undoubtedly, the advances in deep learning and computational imaging contributed significantly to this outcome. The underlying technologies that drive this trend, however, also pose a profound challenge in establishing trust in what we see, hear, and read, and make media content the preferred target of malicious attacks. In this new threat landscape powered by innovative imaging technologies and sophisticated tools, based on autoencoders and generative adversarial networks, this book fills an important gap. It presents a comprehensive review of state-of-the-art forensics capabilities that relate to media attribution, integrity and authenticity verification, and counter forensics. Its content is developed to provide practitioners, researchers, photo and video enthusiasts, and students a holistic view of the field.

Handbook of Research on Digital Violence and Discrimination Studies

Özşungur, Fahri,2022-04-08 Digital violence continues to increase, especially during times of crisis. Racism, bullying, ageism, sexism, child pornography, cybercrime, and digital tracking raise critical social and digital security

issues that have lasting effects. Digital violence can cause children to be dragged into crime, create social isolation for the elderly, generate inter-communal conflicts, and increase cyber warfare. A closer study of digital violence and its effects is necessary to develop lasting solutions. The Handbook of Research on Digital Violence and Discrimination Studies introduces the current best practices, laboratory methods, policies, and protocols surrounding international digital violence and discrimination. Covering a range of topics such as abuse and harassment, this major reference work is ideal for researchers, academicians, policymakers, practitioners, professionals, instructors, and students.

Human-Computer Interaction Masaaki Kurosu, Ayako Hashizume, 2023-07-08 The four-volume set LNCS 14011, 14012, 14013, and 14014 constitutes the refereed proceedings of the Human Computer Interaction thematic area of the 25th International Conference on Human-Computer Interaction, HCII 2023, which took place in Copenhagen, Denmark, in July 2023. A total of 1578 papers and 396 posters have been accepted for publication in the HCII 2023 proceedings from a total of 7472 submissions. The papers included in the HCI 2023 volume set were organized in topical sections as follows: Part I: Design and evaluation methods, techniques and tools; interaction methods and techniques; Part II: Children computer interaction; emotions in HCI; and understanding the user experience; Part III: Human robot interaction; chatbots and voice-based interaction; interacting in the metaverse; Part IV: Supporting health,

quality of life and everyday activities; HCI for learning, culture, creativity and societal impact.

Handbook of Digital Face Manipulation and Detection Christian Rathgeb, Ruben Tolosana, Ruben Vera-Rodriguez, Christoph Busch, 2022-01-31 This open access book provides the first comprehensive collection of studies dealing with the hot topic of digital face manipulation such as DeepFakes, Face Morphing, or Reenactment. It combines the research fields of biometrics and media forensics including contributions from academia and industry. Appealing to a broad readership, introductory chapters provide a comprehensive overview of the topic, which address readers wishing to gain a brief overview of the state-of-the-art. Subsequent chapters, which delve deeper into various research challenges, are oriented towards advanced readers. Moreover, the book provides a good starting point for young researchers as well as a reference guide pointing at further literature. Hence, the primary readership is academic institutions and industry currently involved in digital face manipulation and detection. The book could easily be used as a recommended text for courses in image processing, machine learning, media forensics, biometrics, and the general security area.

Handbook of Face Recognition Stan Z. Li, Anil K. Jain, Jiankang Deng, 2024-01-30 The history of computer-aided face recognition dates to the 1960s, yet the problem of automatic face recognition – a task that humans perform routinely and effortlessly in our daily lives – still poses great

challenges, especially in unconstrained conditions. This highly anticipated new edition provides a comprehensive account of face recognition research and technology, spanning the full range of topics needed for designing operational recognition systems. After a thorough introduction, each subsequent chapter focuses on a specific topic, reviewing background information, up-to-date techniques, and recent results, as well as offering challenges and future directions. Topics and features: Fully updated, revised, and expanded, covering the entire spectrum of concepts, methods, and algorithms for automated detection and recognition systems Provides comprehensive coverage of face detection, alignment, feature extraction, and recognition technologies, and issues in evaluation, systems, security, and applications Contains numerous step-by-step algorithms Describes a broad range of applications from person verification, surveillance, and security, to entertainment Presents contributions from an international selection of preeminent experts Integrates numerous supporting graphs, tables, charts, and performance data This practical and authoritative reference is an essential resource for researchers, professionals and students involved in image processing, computer vision, biometrics, security, Internet, mobile devices, human-computer interface, E-services, computer graphics and animation, and the computer game industry.

Faceupediting Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have

become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for

specific titles or browse through different categories. Another reliable platform for downloading Faceupediting free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows

researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Faceupediting free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated

platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Faceupediting free PDF files is convenient, it's important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but it's essential to be cautious and verify the authenticity of the source before downloading Faceupediting. In conclusion, the internet offers numerous platforms and websites that

allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Faceupediting any PDF files. With these platforms, the world of PDF downloads is just a click away.
