Bunk Kevin Young,2017-11-14 Traces the history of the hoax as a distinct American phenomenon, exploring the roles of stereotype, suspicion, and racism as factors that have shaped fraudulent activities from the heyday of P.T. Barnum through the fake news activities of Donald Trump.

Post-Charismatic Robby McAlpine,2023-08-14 “Our weekly Charismatics Anonymous meeting is about to begin. Join me, will you?” It’s like we’re caught between a rock and a hard place. We’re “continuationists.” We believe all the gifts of the Holy Spirit are alive and well and essential for today. But we’ve also been burned by unbiblical teachings, spiritual abuse, and the gaslighting subculture of pneuma-fomo (fear of missing out on the next great move of the Spirit). We yearn for the Spirit’s

presence and power in our lives. We don't want to "throw the baby out with the bathwater," but the water's teeming with spiteful pathogens. It's time to roll up our sleeves and take responsibility for disinfecting the tub. Toxic beliefs have produced spiritual casualties among Pentecostals and charismatics for far too long. Our Kairos moment has arrived. Let's hone the charismata of discernment.

The Lady from Burma Allison Montclair, 2023-07-25 In Allison Montclair's *The Lady from Burma*, murder once again stalks the proprietors of The Right Sort Marriage Bureau in the surprisingly dangerous landscape of post-World War II London... In the immediate post-war days of London, two unlikely partners have undertaken an even more unlikely, if necessary, business venture - The Right Sort Marriage Bureau. The two partners are Miss Iris Sparks, a woman with a dangerous - and never discussed - past in British intelligence and Mrs. Gwendolyn Bainbridge, a war widow with a young son entangled in a complicated aristocratic family. Mostly their clients are people trying to start (or restart) their lives in this much-changed world, but their new client is something different. A happily married

woman has come to them to find a new wife for her husband. Dying of cancer, she wants the two to make sure her entomologist, academic husband finds someone new once she passes. Shortly thereafter, she's found dead in Epping Forest, in what appears to be a suicide. But that doesn't make sense to either Sparks or Bainbridge. At the same time, Bainbridge is attempting to regain legal control of her life, opposed by the conservator who has been managing her assets - perhaps not always in her best interest. When that conservator is found dead, Bainbridge herself is one of the prime suspects. Attempting to make sense of two deaths at once, to protect themselves and their clients, the redoubtable owners of the Right Sort Marriage Bureau are once again on the case.

Gender and Communication in Euripides' Plays J.H. Kim On Chong-Gossard,2008-08-31 In Greek tragedy, women constantly struggle to control language. This book shows how aspects of women's communication—song, silence and secret-keeping as female verbal genres, and the challenges of speaking out of place—constitute a decisive factor in Euripides' portrayal of gender.

Emotional Amoral Egoism Nayef Al-Rodhan,2021-09-30 The enduring assumption that human behaviour is governed by innate morality and reason is at odds with the persistence of human deprivation, injustice, brutality, inequality and conflict. This book offers a fresh look at human nature and universal security by proposing a new general theory of human nature, emotional amoral egoism, and a specific theory of human motivation that draw on a wide range of philosophical, psychological and evolutionary approaches as well as neuroscientific research. It argues that human behaviour is governed primarily by emotional self-interest and that the human mind is a predisposed tabula rasa. The author argues that most human beings are innately neither moral nor immoral but rather amoral. Circumstances will determine the survival value of humankind's moral compass. This insight has profound implications for the re-ordering of governance mechanisms at all levels with a strong emphasis on the role of society and the global system. This book is essential reading for anyone interested in the substrates of human nature and its universal security implications in relation to

identity, conflict, ethnocentrism, xenophobia, morality and global governance.

Fake, Fact, and Fantasy Maire Messenger Davies, 2013-11-05 Based on a study examining the meaning of the term media literacy in children, this volume concentrates on audiovisual narratives of television and film and their effects. It closely examines children's concepts of real and unreal and how they learn to make distinctions between the two. It also explores the idea that children are protected from the harmful effects of violence on television by the knowledge that what they see is not real. This volume is unique in its use of children's own words to explore their awareness of the submerged conventions of television genres, of their functions and effects, of their relationship to the real world, and of how this awareness varies with age and other factors. Based on detailed questionnaire data and conversations with 6 to 11-year-old children, carried out with the support of a fellowship at the Annenberg School for Communication, University of Pennsylvania, the book eloquently demonstrates how children use their knowledge of real life, of literature, and of art, in intelligently evaluating the relationship between television's formats, and the real world in which they live.

Artificial Intelligence Planning Systems James Hendler, 2014-06-28 Artificial Intelligence Planning Systems documents the proceedings of the First International Conference on AI Planning Systems held in College Park, Maryland on June 15-17, 1992. This book discusses the abstract probabilistic modeling of action; building symbolic primitives with continuous control routines; and systematic adaptation for case-based planning. The analysis of ABSTRIPS; conditional nonlinear planning; and building plans to monitor and exploit open-loop and closed-loop dynamics are also elaborated. This text likewise covers the modular utility representation for decision-theoretic planning; reaction and reflection in tetris; and planning in intelligent sensor fusion. Other topics include the resource-bounded adaptive agent, critical look at Knoblock's hierarchy mechanism, and traffic laws for mobile robots. This publication is beneficial to students and researchers conducting work on AI planning systems.
