Surveillance Futures Emmeline Taylor,Tonya Rooney,2016-08-05 From birth to adulthood, children now find themselves navigating a network of surveillance devices that attempt to identify, quantify, sort and track their thoughts, movements and actions. This book is the first collection to focus exclusively on technological surveillance and young people. Organised around three key spheres of children's day-to-day life: schooling, the self and social lives, this book chronicles the increasing surveillance that children, of all ages, are subject to. Numerous surveillance apparatus and tools are examined, including, but not limited to: mobile phones, surveillance cameras, online monitoring, GPS and RFID tracking and big data analytics. In addition to chronicling the steady rise of such surveillance practices, the chapters in this volume identify and problematise the consequences of technological surveillance from a range of multidisciplinary perspectives. Bringing together leading scholars working across diverse fields – including sociology, education, health, criminology, anthropology, philosophy, media and information technology – the collection highlights the significant socio-political and ethical implications of technological surveillance throughout childhood and youth.

**Mobile Communication** James E. Katz,2017-07-28 In the few short decades since their commercial deployment, 5 billion people—about three-quarters of all humanity, including children—have become mobile phone users. No technology has even approached the mobile phone's wildfire success. Effects of this success are apparent everywhere, ranging from accident scenes and earthquake rescue efforts to demeanor in the classroom and at dinner tables. No one interested in the next generation of issues provoked by the mobile communication revolution will want to miss this important new collection of essays. The mobile phone has given near-transcendent power to ordinary people. All aspects of social life have been touched by mobile technology. An ever-growing host of tracking, immersion, gaming, and commercial applications are becoming available. The community of mobile communication scholars has blossomed from a handful of pioneers a decade ago to a large and dynamic intellectual community that spans the globe. Area researchers have gained much insight into cultural, symbolic, and social interaction aspects of mobile communication as well as its relevance to commerce. To address the social policy dimension of the mobile communication revolution, this volume presents analyses by leading thinkers in the field. The volume offers novel and keen insights into the topic. Subjects include the role of mobiles in policy formation and evaluation in several areas including the mobile-digital divide and political campaigns. Also explored are processes and policy implications of mobiles in creating or alleviating social problems including social isolation and family dispersion. Other chapters analyze social policies for mobile devices, including attempts to regulate the use of the technology and to understand and moderate its potential harm to human health. The contributors' scope ranges across five continents and they address concerns at local, national, and international levels.

Fear: Critical Geopolitics and Everyday Life Susan J. Smith, 2016-04-22  
'Fear' in the twenty-first century has greater currency in western societies than ever before. Through scares ranging from cot death, juvenile crime, internet porn, asylum seekers, dirty bombs and avian flu, we are bombarded with messages about emerging risks. This book takes stock of a range of issues of 'fear' and presents new theoretical arguments and research findings that cover topics as diverse as the war on terror, the immigration crisis, stranger danger, global disease epidemics and sectarian violence. This book charts the association of fear discourses with particular spaces, times, social identities and sets of geopolitical relations. It examines the ways in which fear may be manufactured and manipulated for political purposes, sometimes becoming a tool of repression, and relates fear to political, economic and social marginalization at different scales. Furthermore, it highlights the importance and sometimes unpredictability of everyday lived experiences of fear - the many ways in which people recognize, make sense of and manage fear; the extent of resistance to fear; the relation of fear and hope in everyday life; and the role of emotions in galvanizing political and social action and change.

Everyday Surveillance William G. Staples, 2013-10-18 When we think of surveillance in our society, we usually imagine "Big Brother" scenarios with the government tracking our every move. The actual surveillance of our everyday lives is much more subtle, however, and may be more insidious. William G. Staples shows how our lives are tracked by both public and private organizations—sometimes with our consent, and sometimes without—through our internet use, cell phones, public video cameras, credit cards, license plates, shopping habits, and more. *Everyday Surveillance* is a provocative exploration of the myriad ways we are watched each day, and how this surveillance shapes our lives. Thoroughly revised, the second edition considers new topics, such as the rise of social media, and updates research throughout. *Everyday Surveillance* introduces students to concepts of social control and incites classroom discussion about how surveillance impacts the ways we understand people and our lives at home, work, school, or in the community.

Indefensible Space Michael Sorkin, 2008 *Indefensible Space* explores the increasing envelopment of public space and life by an architecture of security/paranoia, from the most literal level, barriers in front of buildings, to more abstract levels, enhanced surveillance of public spaces.

Digital Evidence and Computer Crime Eoghan Casey, 2011-04-20 Though an increasing number of criminals are using computers and computer networks, few investigators are well versed in the issues related to digital evidence. **Routledge Handbook of Internet Politics** Philip N. Howard,2010 The politics of the internet has entered the social science mainstream. From debates about its impact on parties and election campaigns following momentous presidential contests in the United States, to concerns over international security, privacy and surveillance in the post-9/11, post-7/7 environment; from the rise of blogging as a threat to the traditional model of journalism, to controversies at the international level over how and if the internet should be governed by an entity such as the United Nations; from the new repertoires of collective action open to citizens, to the massive programs of public management reform taking place in the name of e-government, internet politics and policy are continually in the headlines. The Routledge Handbook of Internet Politics is a collection of over thirty chapters dealing with the most significant scholarly debates in this rapidly growing field of study. Organized in four broad sections: Institutions, Behavior, Identities, and Law and Policy, the Handbook summarizes and criticizes contemporary debates while pointing out new departures. A comprehensive set of resources, it provides linkages to established theories of media and politics, political communication, governance, deliberative democracy and social movements, all within an interdisciplinary context. The contributors form a strong international cast of established and junior scholars. This is the first publication of its kind in this field; a helpful companion to students and

scholars of politics, international relations, communication studies and sociology.

As any modern Jewish parent knows, balancing family traditions and the realities of contemporary culture can be incredibly challenging. Answering questions both old and new, Jewish and secular, internationally syndicated parenting columnist and award-winning Jewish educator and mother of four, Sharon Duke Estroff illuminates the ways that Jewish tradition can be used to form a lasting, emotional safety net for modern families. *Can I Have a Cell Phone for Hanukkah?* is an instant classic.

Edited Clean Version Raiford Guins, 2008-12-31 According to Guins, these new control technologies are designed to embody an ethos of neoliberal governance - through the very media that have been previously presumed to warrant management, legislation, and policing. Repositioned within a discourse of empowerment, security, and choice, the action of regulation, he reveals, has been relocated into the hands of users.--BOOK JACKET.

**Big Brother** Mark Dice, 2011-01 In *Big Brother: The Orwellian Nightmare Come True*, Mark Dice details actual NSA high-tech spy systems, mind-reading machines, secret government projects, and emerging artificial intelligence

programs that seem as if they came right out of George Orwell's novel Nineteen Eighty-Four. Orwell's famous book was first published in 1949, and tells the story of a nightmarish future where citizens have lost all privacy and are continuously monitored by the omniscient Big Brother surveillance system which keeps them obedient to a totalitarian government. The novel is eerily prophetic as many of the fictional systems of surveillance described have now become a reality. Mark Dice shows you the scary documentation that Big Brother is watching you, and is more powerful than you could imagine. - The National Security Agency - Facial Recognition Scanners - Mind Reading Machines - Neural Interfaces - Psychotronic Weapons - Orwellian Government Programs - The Nanny State - Orwellian Weapons - Artificial Intelligence - Cybernetic Organisms - A Closer Look at 1984 - Our Social Structure - The Control of Information - Perpetual State of War - The Personification of the Party - Telescreens - A Snitch Culture - Relationships in Shambles - A Heartless Society - Foreign Countries Painted as Enemies - Power Hungry Officials - An Erosion of the Language - Double Think - And More!
