The Black Butterfly Lawrence T. Brown,2021-01-26 The best-selling look at how American cities can promote racial equity, end redlining, and reverse the damaging health- and wealth-related effects of segregation. Winner of the IPPY Book Award Current Events II by the Independent Publisher The world gasped in April 2015 as Baltimore erupted and Black Lives Matter activists, incensed by Freddie Gray's brutal death in police custody, shut down highways and marched on city streets. In *The Black Butterfly*—a reference to the fact that Baltimore's majority-Black population spreads out like a butterfly's wings on both sides of the coveted strip of real estate running down the center of the city—Lawrence T. Brown reveals that ongoing historical trauma caused by a combination of policies, practices, systems, and budgets is at the root of uprisings and crises in hypersegregated cities around the country. Putting Baltimore under a microscope, Brown looks closely at the causes of segregation, many of which exist in current legislation and regulatory policy despite the common belief that overtly racist policies are a thing of the past. Drawing on social science research, policy analysis, and archival materials, Brown reveals the long history of racial segregation's impact on health, from toxic pollution to police brutality. Beginning with an analysis of the current political moment, Brown delves into how Baltimore's history influenced actions in sister cities such as St. Louis and Cleveland, as well as Baltimore's adoption of increasingly oppressive techniques from cities such as Chicago. But there is reason to hope. Throughout the book, Brown offers a clear five-step plan for activists, nonprofits, and public officials to achieve racial equity. Not content to simply describe and decry urban problems, Brown offers up a wide range of innovative solutions to help heal and restore redlined Black neighborhoods, including municipal reparations. Persuasively arguing that, since urban apartheid was intentionally erected, it can be intentionally dismantled, *The Black Butterfly* demonstrates that America cannot reflect that Black lives matter until we see how Black neighborhoods matter.

Chefs on the Farm Shannon Borg,Lora Lea Misterly,Karen Jurgensen,2008 * The perfect treat for foodies, organic gardeners, cookbook addicts, and sustainable practitioners alike * Sustainability is an accelerating trend in the food world With the rising interest in organic and locally grown food, there

is also an increasing interest in connecting the farm to the table. Chefs on the Farm describes the seasonal workings of Quillisascut Goat Cheese Farm, a small, family-run business in northeastern Washington state. There, owners Lora Lea and Rick Misterly started a Farm School for the Domestic Arts where every summer, professional chefs, culinary students, food writers, and others live and work on the farm. Cooking only with ingredients they find on the farm, students learn to be connected to the food they work with. Learn more about the Quillisascut Goat Cheese Farm at Quillisascut.com.

Dirt to Soil Gabe Brown,2018-10-11 A regenerative no-till pioneer.—NBC News We need to reintegrate livestock and crops on our farms and ranches, and Gabe Brown shows us how to do it well.—Temple Grandin, author of *Animals in Translation* See Gabe Brown—author and farmer—in the Netflix documentary *Kiss the Ground* Gabe Brown didn't set out to change the world when he first started working alongside his father-in-law on the family farm in North Dakota. But as a series of weather-related crop disasters put Brown and his wife, Shelly, in desperate financial straits, they started making bold changes to their farm. Brown—in an effort to simply survive—began experimenting with new practices he'd learned about from reading and talking with innovative researchers and ranchers. As he and his family struggled to keep the farm viable, they found themselves on an amazing journey into a new type of farming: regenerative agriculture. Brown dropped the use of most of the herbicides, insecticides, and synthetic fertilizers that are a standard part of conventional agriculture. He switched to no-till planting, started planting diverse cover crops mixes, and changed his grazing practices. In so doing Brown transformed a degraded farm ecosystem into one full of life—starting with the soil and working his way up, one plant and one animal at a time. In *Dirt to Soil* Gabe Brown tells the story of that amazing journey and offers a wealth of innovative solutions to restoring the soil by laying out and explaining his five principles of soil health, which are: Limited Disturbance Armor Diversity Living Roots Integrated Animals The Brown's Ranch model, developed over twenty years of experimentation and refinement, focuses on regenerating resources by continuously enhancing the living biology in the soil. Using regenerative agricultural principles, Brown's Ranch has grown several inches of new topsoil in only twenty years! The 5,000-acre ranch profitably produces a wide variety of cash crops and cover crops as well as grass-finished beef and lamb, pastured laying hens, broilers, and pastured pork, all marketed directly to consumers. The key is how we think, Brown says. In the industrial agricultural model, all thoughts are focused on killing things. But that mindset was also killing diversity, soil, and profit, Brown realized. Now he channels his creative thinking toward how he can get more life on the land—more plants, animals, and beneficial insects. “The greatest roadblock to solving a problem,” Brown says, “is the human mind.”
