**Digital Capital** Sora Park,2017-11-10 This book describes and understands the many factors that influence a person’s behavior towards digital technologies, and how that affects the person’s potential to benefit from digital society. The ability to adapt to these new technological environments - and the extent to which an individual embraces them - has become critical to an individual’s well-being and quality of life, the underlying assumption being that only by effectively engaging with digital technologies can the user accrue benefits from the experience. By introducing the concept “digital capital,” which refers to the conditions that determine how people access, use, and engage with digital technology, Park examines how the digital ecosystem of the user lead to new forms of digital inequality. Using numerous empirical studies on internet users and non-users, as well as recommending small localized solutions to the big global problem, a critical and alternative perspective of the digital divide is provided.

They zoom in on the kinds of assets you need to develop, and that will greatly influence the valuation, all supported with practical advice and real world examples. Discover a guide with practical advices and real world examples to build digital services and create relationship with users. EXTRAIT As any cookbook, this work contains recipes, ingredient descriptions and best practices. To us – both amateur chefs – a flaw of most kitchen guides is the focus on lists and the weak insight they bring about the basic mechanisms. The process behind a tricky recipe like sauce Hollandaise is an emulsion between an oil and an aqueous component: butter and lemon juice are bound by egg yolk, used as an emulsifier. Digital entrepreneurship (cook) books show the same weakness. They distill guide-lines without linking them to the root mechanisms in digital. We base our recipes on these mechanisms. To explain them, we tell the story through the arrival of three digital paradoxes. Paradoxes intrigue, trigger curiosity, and animate a discussion between peers. That's why they are excellent starting material to reason about a world in change. À PROPOS DE L'AUTEUR Peter Verhasselt coaches technology companies in optimizing their Product Management, Business Plan and Go-to-Market strategy. Before joining Sirris, Peter worked for industrial companies in Sales and Product Management, Field Service and R&D. Peter has degrees in Engineering, Law, Economics and Management. Nick Boucart is a mentor, coach and regular speaker on topics like Cloud, SaaS, Data Driven Product Management and Software Engineering. He's an interim CTO for a number of startups. Prior to working at Sirris, Nick was a software engineer at LMS International and EMC.
