One Desert Jet Turner is an aviation book introduction to USAF fighter jet culture written by a F-4/F-16 fighter mechanic who shares all. This aviation career book provides information from the same perspective about the USAF Thunderbirds, and accident investigation as observed by the author at Nellis AFB, near both Las Vegas, NV and Area 51. Earl Heron also details the sensational transition from F-16 mechanic to C-130 flight engineer. One Desert Jet Turner is illustrated, but unlike many books about fighters that are primarily pictorial, this work concentrates on the realities behind the images.

Mr. Mig Paul T. Entrekin,2012-07-11 As indicated by the subtitle, "The Real Story of the First MiGs in America", this is a collection of stories that offer, for the first time, a concise depiction of many first-hand accounts of how these jets were acquired. In addition to historical facts and figures dating to the inception of the Russian Mikoyan-Gurevich design bureau, substantial effort has been taken to expose myths and bring to light facts that are significant and important regarding how, where, when and why the MiG aircraft were obtained and who obtained them. In addition to the history of the MiG jet's inception, the modern day stories of the people in America that acquired them are no less intriguing. As a bonus, you'll learn of the experiences of the first person to own and operate a MiG in the United States and the free world including a peek into the arena of airshow flying.

Dare to Fly Martha McSally, 2020-05-26 "Like the A-10 aircraft she flew in combat, retired colonel and fighter pilot Martha McSally is a gritty individual who loves our Air Force and personified its core values of excellence, integrity, and service before self, while standing up to make it a better institution for everyone who serves. How to be resolute, do the right thing, persevere, find gratitude, and learn compassion are just some of the lessons in her inspirational life story." –Ron FOGLEMAN, General (ret.), U.S. Air Force; former Air Force Chief of Staff Combining the soulful honesty of *Make Your Bed* with the inspiring power of *You Are a Badass*, America's first female combat jet pilot and Arizona Senator Martha McSally shows you how to clear the runway of your life: embrace fear, transform doubt, succeed when you are expected to fail, and soar to great heights in this motivational life guide. Martha McSally is an extraordinary achiever whose inner strength and personal principles have helped her overcome adversity throughout her life. Initially rejected from Air Force flight school because she was too short, she refused to give up, becoming the first female fighter pilot to fly in combat and the first to command a combat fighter squadron in United States history. During her twenty-six-year military career, she fought to free American servicewomen stationed in the Middle East from restrictions requiring them to don full-body, black abayas and ride in the backs of cars – and won. McSally has continued to serve America, first in the House of Representatives, and now as a U.S. Senator from Arizona. McSally is also a survivor. She shares how her experiences propelled her to become a fighter for justice in and out of the cockpit. In this powerful, uplifting book, McSally reflects on her successes and failures, shares key principles that have guided her, and reveals invaluable lessons to break barriers, thrive through darkness, and make someone proud in your life. "Courage isn't magic or genetics. It is a choice. By choosing to do things afraid, you discover your own power to overcome." Filled with fresh stories and insights, *Dare to Fly* will help each of us find the courage inside to break our barriers, endure turbulence, and keep flying high.

Lavi John W. Golan, 2016-01-01 The Lavi fighter program, the largest weapons-development effort ever undertaken by the State of Israel, envisioned a new generation of high-performance aircraft. In a controversial strategy, Israel Aircraft Industries intended to develop and manufacture the fighters in Israel with American financial support. The sophisticated planes, developed in the mid-1980s, were unique in design and intended to make up the majority of the Israeli air force. Though considerable prestige and money were at stake, developmental costs increased and doubts arose as to whether the Lavi could indeed be the warplane it was meant to be. Eventually the program became a microcosm for the ambitions, fears, and internal divisions that shaped both the U.S.-Israeli relationship and Israeli society itself. But the fighter never made it to operational service, and until now, the full breadth and significance of the Lavi story have never been examined and presented. *Lavi: The United States, Israel, and a Controversial Fighter Jet* traces the evolution of the Lavi fighter from its genesis in the 1970s to its scrapping in August 1987. John W. Golan examines the roles of Israeli military icons and political leaders such as Ezer Weizman, Ariel Sharon, Menachem Begin, and Yitzhak Rabin in the program and in relation to their counterparts in the United States. On the American side, Golan traces the evolution of government policy toward

the program, detailing the complex picture of the U.S. foreign policy apparatus and of U.S.-Israeli relations in general—from President Reagan's public endorsement of the program on the White House lawn to Defense Secretary Caspar Weinberger's unremitting attempts to cancel it in succeeding years.

Wind Tunnel Investigation of Aerodynamic Loads on Weapons Separated from Carriage Under the Wing of a Tactical Fighter Aircraft at Supersonic Speeds J. C. Donaldson, 1973 Exploratory static-stability tests were made on models of the MK-84 weapon and a modular weapon configuration during simulated weapon separation from the wing of the F-4C Tactical Fighter Aircraft at freestream Mach numbers 1.76, 2.0, and 2.5. Data were obtained with the parent aircraft at zero angle of attack and the weapon at the carriage incidence angle of -1 deg. Supplementary data were obtained for weapon angles of attack of + or - deg. Unit Reynolds number ranged from 4.6 million per ft at M free stream mach number = 1.76 to 6.2 million per ft at M free stream mach number = 2.5. Selected results are presented which show the effects on the weapon aerodynamic loads of free-stream Mach number, weapon angle of attack, weapon axial position, and the presence of other stores. Representative shadowgraph and schlieren photographs of the interference flow field are also presented. (Author).
