**Fisheye** Trish Thorpe,2012-10 Set in the post-hippie/proto-disco Me Decade of the 1970s - when an imperiled 200-year-old America sought escape after such debacles as Vietnam, Watergate, and Nixon's resignation - FISHEYE chronicles Trish Thorpe's shocking adolescent double life and the traumatic adult years that followed. Trish starts her double life as a uniform-skirt, saddle-shoe wearing straight-A student, team captain of every sport at an elite girl's school. But by night and weekends, she is a chronic drug user and experienced sex partner of both men and women. In Trish's world, sex is random and rampant, none of it meaningful; and cocaine abounds, bought and sold by parents and teens alike. With her famous TV producer father, leaving her and her siblings in the unsteady hands of their despondent, alcoholic mother, a former minor star/dancer, Trish clings even tighter to the only love she knows from her few pals on the street. She copes by keeping her school lunch thermos full of Tequila Sunrise-and, most important, by hanging out with her best friend and lover, Linda, every chance she gets. Trish's harrowing coming-of-age exemplifies a worst of times in our society, a time in which parents were so busy playing out their own narcissistic, adolescent fantasies that many kids were left to fend for themselves, living by their own warped moral code. Some historians call the 70s the decade better forgotten; in the world of FISHEYE, Trish and her gang were the forgotten generation. As we follow the aftermath of Trish's coming-of-age, we learn about the effects of the Me Decade as they reverberate throughout her adult years. FISHEYE is a candid look at the lives of baby boomers; how many of them were shaped and how they progressed.

*Fisheye Photography* , *Second Edition* Bob Rewick,2017-07-12 This is the Second Edition of a book on Fisheye Photography that I published in an earlier edition with Createspace.com, Title ID no. 6511542. Several corrections and additions have been made to the First Edition, which I think add to the interest and quality of the subject: Fisheye Photography. In both Editions, I show you how to photograph common subjects, using a modified fisheye lens software program, to create unique, abstract, and artistic configurations you may have never seen before. I also suggest that fisheye photography may show the world as it actually exists, or least in part, and then our brains convert this vision to a more acceptable rectilinear perspective, just as we subconsciously do when we reverse and invert the images we normally see.

Human Aspects of Visualization Achim Ebert,Alan Dix,Nahum D. Gershon,Margit Pohl,2011-03-11 This book constitutes the referred proceedings of the First IFIP WG 13.7 International Workshop on Human Aspects of Visualization, HCIV 2009, held in Uppsala, Sweden, in August 2009, as a satellite workshop of INTERACT 2009. The 11 revised full papers presented were carefully reviewed and selected from numerous submissions. These articles in this book give an overview of important issues concerning human-computer interaction and information visualization. They highlight the research required to understand what aspects of analysis match human capabilities most closely and how interactive visual support should be designed and adapted to make optimal use of human capabilities in terms of information perception and processing.

**Graphical Fisheye Views of Graphs** Manojit Sarkar,Marc H. Brown,1992 Abstract: A fisheye lens is a very wide angle lens that shows places nearby in detail while also showing remote regions in successively less detail. This paper describes a system for viewing and browsing planar graphs using a software analog of a fisheye lens. We first show how to implement such a view using solely geometric transformations. We then describe a more general transformation

that allows hierarchical, structural information about the graph to modify the views. Our general transformation is a fundamental extension to the early efforts in fisheye views.

**Pattern Recognition** Walter Kropatsch,Robert Sablatnig,Allan Hanbury,2005-09-14 It is both an honor and a pleasure to hold the 27th Annual Meeting of the German Association for Pattern Recognition, DAGM 2005, at the Vienna University of Technology, Austria, organized by the Pattern Recognition and Image Processing (PRIP) Group. We received 122 contributions of which we were able to accept 29 as oral presentations and 31 as posters. Each paper received three reviews, upon which decisions were made based on correctness, presentation, technical depth, scientific significance and originality. The selection as oral or poster presentation does not signify a quality grading but reflects attractiveness to the audience which is also reflected in the order of appearance of papers in these proceedings. The papers are printed in the same order as presented at the symposium and posters are integrated in the corresponding thematic session. In putting these proceedings together, many people played significant roles which we would like to acknowledge. First of all our thanks go to the authors who contributed their work to the symposium. Second, we are grateful for the dedicated work of the 38 members of the Program Committee for their effort in evaluating the submitted papers and in providing the necessary decision support information and the valuable feedback for the authors. Furthermore, the Program Committee awarded prizes for the best papers, and we want to sincerely thank the donors. We were honored to have the following three invited speakers at the conference: – Jan P.

**Computer Vision - ECCV 2004** Tomas Pajdla,Jiri Matas,2004-05-10 Welcome to the proceedings of the 8th European Conference on Computer Vision! Following a very successful ECCV 2002, the response to our call for papers was almost equally strong – 555 papers were submitted. We accepted 41 papers for oral and 149 papers for poster presentation. Several innovations were introduced into the review process. First, the number of program committee members was increased to reduce their review load. We managed to assign to program committee members no more than 12 papers. Second, we adopted a paper ranking system. Program committee members were asked to rank all the papers assigned to them, even those that were reviewed by additional reviewers. Third, we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers. Fourth, the reports, the reviews, and the responses were made available to the authors as well as to the program committee members. Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not reflected in the final decision. Finally, we reduced the length of reviewed papers from 15 to 12 pages. The preparation of ECCV 2004 went smoothly thanks to the efforts of the organizing committee, the area chairs, the program committee, and the reviewers. We are indebted to Anders Heyden, Mads Nielsen, and Henrik J. Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST/TSI who kindly provided his GestRFIA conference software. We thank Jan-Olof Eklundh and Andrew Zisserman for encouraging us to organize ECCV 2004 in Prague.
