[FISHEYE](#) Trish Thorpe,2012-10 Set in the post-hippie/proto-disco Me Decade of the 1970s - when an imperiled 200-year-old America sought escape after such debacles as Vietnam, Watergate, and Nixon's resignation - FISHEYE chronicles Trish Thorpe's shocking adolescent double life and the traumatic adult years that followed. Trish starts her double life as a uniform-skirt, saddle-shoe wearing straight-A student, team captain of every sport at an elite girl's school. But by night and weekends, she is a chronic drug user and experienced sex partner of both men and women. In Trish's world, sex is random and rampant, none of it meaningful; and cocaine abounds, bought and sold by parents and teens alike. With her famous TV producer father, leaving her and her siblings in the unsteady hands of their despondent, alcoholic mother, a former minor star/dancer, Trish clings even tighter to the only love she knows from her few pals on the street. She copes by keeping her school lunch thermos full of Tequila Sunrise-and, most important, by hanging out with her best friend and lover, Linda, every chance she gets. Trish's harrowing coming-of-age exemplifies a worst of times in our society, a time in which parents were so busy playing out their own narcissistic, adolescent fantasies that many kids were left to fend for themselves, living by their own warped moral code. Some historians call the 70s the decade better forgotten; in the world of FISHEYE, Trish and her gang were the forgotten generation. As we follow the aftermath of Trish's coming-of-age, we learn about the effects of the Me Decade as they reverberate throughout her adult years. FISHEYE is a candid look at the lives of baby boomers; how many of them were shaped and how they progressed.

[FISHEYE PHOTOGRAPHY", THIRD EDITION](#) Bob Rewick,2020-07 Fisheye photography produces distorted images similar to how we envision fish might view the outside world from they underwater perspective. As such, fisheye images are highly abstract and distorted to the extent that a viewer may not know what he/she is looking at. This is my Third Edition of a book on fisheye photography. The First Edition has not been published. Th Second Edition was published by Amazon.Kindle.Selfpublishing .com in 2017. The reasons for the Third publication are to: (1) improve the readability of the previous editions, (2) to show my fisheye photogaphs, (3) employ fisheye conversion software instead of fisheye lenses, and (4) propose a theory that suggests fisheye vision may be our initial mode of vision.

[HUMAN ASPECTS OF VISUALIZATION](#) Achim Ebert,Alan Dix,Naum D. Gershon,Margit Pohl,2011-03-11 This book constitutes the referred proceedings of the First IFIP WG 13.7 International Workshop on Human Aspects of Visualization, HCIV 2009, held in Uppsala, Sweden, in August 2009, as a satellite workshop of INTERACT 2009. The 11 revised full papers presented were carefully reviewed and selected from numerous submissions. These articles in this book give an overview of important issues concerning human-computer interaction and information visualization. They highlight the research required to understand what aspects of analysis match human capabilities most closely and how interactive visual support should be designed and adapted to make optimal use of human capabilities in terms of information perception and processing.

[FISHEYE PHOTOGRAPHY , SECOND EDITION](#) Bob Rewick,2017-07-12 This is the Second Edition of a book on Fisheye Photography that I published in an earlier edition with Createspace.com, Title ID no. 6511542. Several corrections and additions have been made to the First Edition, which I think add to the interest and quality of the subject: Fisheye Photography. In both Editions, I show you how to photograph common subjects, using a modified fisheye lens software program, to create unique, abstract, and artistic configurations you may have never seen before. I also suggest that fisheye photography may show the world as it actually exists, or least in part, and then our brains convert this vision to a more acceptable rectilinear perspective, just as we subconsciously do when we reverse and invert the images we normally see.

[GRAPHICAL FISHEYE VIEWS OF GRAPHS](#) Manojit Sarkar,Marc H. Brown,1992 Abstract: A fisheye lens is a very wide angle lens that shows places nearby in detail while also showing remote regions in successively less detail. This paper describes a system for viewing and browsing planar graphs using a software analog of a fisheye lens. We first show how to implement such a view using solely geometric transformations. We then describe a more general transformation that allows hierarchical, structural information about the graph to modify the views. Our general transformation is a fundamental extension to the early efforts in fisheye views.

[PATTERN RECOGNITION](#) Walter Kropatsch,Robert Sablatnig,Allan Hanbury,2005-09-14 It is both an honor and a pleasure to hold the 27th Annual Meeting of the German Association for Pattern Recognition, DAGM 2005, at the Vienna U- versity of Technology, Austria, organized by the Pattern Recognition and Image Processing (PRIP) Group. We received 122 contributions of which we were able to accept 29 as oral presentations and 31 as posters. Each paper received three reviews, upon which decisions were made based on correctness, presentation, technical depth, scienti?c signi?cance and originality. The selection as oral or poster presentation does not signify a quality grading but re?ects attractiveness to the audience which is also re?ected in the order of appearance of papers in these proceedings. The papers are printed in the same order as presented at the symposium and posters are integrated in the corresponding thematic session. In putting these proceedings together, many people played signi?cant roles which we would like to acknowledge. First of all our thanks go to the authors who contributed their work to the symposium. Second, we are grateful for the dedicated work of the 38 members of the Program Committee for their e?ort in evaluating the submitted papers and in providing the necessary decision support information and the valuable feedback for the authors. Furthermore, the P- gram Committee awarded prizes for the best papers, and we want to sincerely thank the donors. We were honored to have the following three invited speakers at the conference: - Jan P.

[COMPUTER VISION - ECCV 2004](#) Tomas Pajdla,Jiri Matas,2004-05-10 Welcome to the proceedings of the 8th European Conference on Computer - sion! Following a very successful ECCV 2002, the response to our call for papers was almost equally strong - 555 papers were submitted. We accepted 41 papers for oral and 149 papers for poster presentation. Several innovations were introduced into the review process. First, the n- ber of program committee members was increased to reduce their review load. We managed to assign to program committee members no more than 12 papers. Second, we adopted a paper ranking system. Program committee members were asked to rank all the papers assigned to them, even those that were reviewed by additional reviewers. Third, we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers. Fourth, thereports,thereviews,andtheresponsesweremadeavailabletotheauthorsas well as to the program committee members. Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not re?ected in the ?nal decision. Finally, we reduced the length of reviewed papers from 15 to 12 pages. The preparation of ECCV 2004 went smoothly thanks to the e?orts of the - ganizing committee, the area chairs, the program committee, and the reviewers. We are indebted to Anders Heyden, Mads Nielsen, and Henrik J. Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST/TSI who kindly provided his GestrFIA conference software. We thank Jan-Olof Eklundh and Andrew Zisserman for encouraging us to organize ECCV 2004 in Prague.

[APPLIED PHOTOGRAPHIC OPTICS](#) Sidney Ray,2002-02-20 Selected by the American Library Association's 'Choice' magazine as best technical book, the first edition of this book soon established itself as the standard reference work on all aspects of photographic lenses and associated optical systems. This is unsurprising, as Sidney Ray provides a complete, comprehensive reference source for anyone wanting information on photographic lenses, from the student to the practitioner or specialist working with visual and digital media worldwide. This third edition has been fully revised and expanded to include the rapid progress in the last decade in optical technology and advances in relevant electronic and digital forms of imaging. Every chapter has been revised and expanded using new figures and photographs as appropriate, as well as extended bibliographies. New chapters include details of filters, measurements from images and the optical systems of digital cameras. Details of electronic and digital imaging have been integrated throughout. More information is given on topics such as aspherics, diffractive optics, ED glasses, image stabilization, optical technology, video projection and new types of lenses. A selection of the contents includes chapters on: optical theory, aberrations, auto focus, lens testing, depth of field, development of photographic lenses, general properties of lenses, wide-angle lenses, telephoto lenses, video lenses, viewfinder systems, camera movements, projection systems and 3-D systems.

 **FISHEYE PHOTOGRAPHY** BOB REWICK,2016-08-20 THIS IS A BOOK ABOUT HOW FISHEYE LENSES DISTORT IMAGES OF THE WORLD. THE TOPICS I DISCUSS ARE: (1) SELECTING SUITABLE FISHEYE SUBJECTS, (2) REPLACING AN EXPENSIVE LENS WITH A CHEAPER ALTERNATIVE, (3 CREATING ARTISTIC AND ABSTRACT FISHEYE IMAGES, AND (4) SHOWING YOU A SELECTION OF FISHEYE SUBJECTS I PHOTOGRAPHED. MOREOVER, I RAISE THE POSSIBILITY THAT WE SUBCONSCIOUSLY FIRST SEE THE WORLD IN A FISHEYE DEPICTION, WHICH OUR MINDS THEN AUTOMATICALLY RE-ORIENT. YOU MAY EVEN DISCOVER THAT THE RECTILINEAR VIEWPOINT WE SEE IN MOST PHOTOGRAPHS MAY BECOME SOMEWHAT BORING, AND PERHAPS FISHEYE PHOTOGRAPHY CAN PROVIDE SOME WELCOME DIVERSION.
