Hooked Nir Eyal, 2014-11-04 Revised and Updated, Featuring a New Case Study How do successful

companies create products people can't put down? Why do some products capture widespread attention while others flop? What makes us engage with certain products out of sheer habit? Is there a pattern underlying how technologies hook us? Nir Eyal answers these questions (and many more) by explaining the Hook Model—a four-step process embedded into the products of many successful companies to subtly encourage customer behavior. Through consecutive “hook cycles,” these products reach their ultimate goal of bringing users back again and again without depending on costly advertising or aggressive messaging. Hooked is based on Eyal's years of research, consulting, and practical experience. He wrote the book he wished had been available to him as a start-up founder—not abstract theory, but a how-to guide for building better products. Hooked is written for product managers, designers, marketers, start-up founders, and anyone who seeks to understand how products influence our behavior. Eyal provides readers with:

- Practical insights to create user habits that stick.
- Actionable steps for building products people love.
- Fascinating examples from the iPhone to Twitter, Pinterest to the Bible App, and many other habit-forming products.

The Gameful World Steffen P. Walz, Sebastian Deterding, 2015-01-23 What if every part of our everyday life was turned into a game? The implications of “gamification.” What if our whole life were turned into a game? What sounds like the premise of a science fiction novel is today becoming reality as “gamification.” As more and more organizations, practices, products, and services are infused with elements from games and play to make them more engaging, we are witnessing a veritable ludification of culture. Yet while some celebrate gamification as a possible answer to mankind's toughest challenges and others condemn it as a marketing ruse, the question remains: what are the ramifications of this “gameful world”? Can game design energize society and individuals, or will algorithmic incentive systems become our new robot overlords? In this book, more than fifty

luminaries from academia and industry examine the key challenges of gamification and the ludification of culture—including Ian Bogost, John M. Carroll, Bernie DeKoven, Bill Gaver, Jane McGonigal, Frank Lantz, Jesse Schell, Kevin Slavin, McKenzie Wark, and Eric Zimmerman. They outline major disciplinary approaches, including rhetorics, economics, psychology, and aesthetics; tackle issues like exploitation or privacy; and survey main application domains such as health, education, design, sustainability, or social media.

Fitness, Technology and Society Brad Millington, 2017-09-18 The fitness industry is experiencing a new boom characterized by the proliferation of interactive and customizable

technology, from exercise-themed video games to smartphone apps to wearable fitness trackers. This new technology presents the possibility of boundless self-tracking, generating highly personalized data for self-assessment and for sharing among friends. While this may be beneficial – for example, in encouraging physical activity – the new fitness boom also raises important questions about the very nature of our relationship with technology. This is the first book to examine these questions through a critical scholarly lens. Addressing key themes such as consumer experience, gamification, and surveillance, *Fitness, Technology and Society* argues that fitness technologies – by ‘datafying’ the body and daily experience – are turning fitness into a constant pursuit. The book explores the origins of contemporary fitness technologies, considers their implications for consumers, producers, and for society in general, and reflects on what they suggest about the future of fitness experience. Casting new light on theories of technology and the body, this is fascinating reading for all those interested in physical cultural studies, technology, and the sociology of sport.

Gamification is fast emerging as a user engagement and behaviour change tool that succeeds where other tactics and strategies have failed. *How Gamification Can Help Your Business Engage in Sustainability* contains all the information businesses and other organizations need to make an informed decision about whether to adopt gamification as part of their own business and sustainability strategies – and the tools to get started.

The Diet Fix Yoni Freedhoff M.D., 2014-03-04 With *The Diet Fix*, weight loss expert Dr. Yoni

Freedhoff offers a groundbreaking, useable guide to begin living happily while losing weight permanently. It is time to break the cycle of traumatic dieting. Despite the success stories publicized by Atkins, South Beach, Weight Watchers, and others, 90% of all diets end in failure. How can we fix the way we lose weight so that we make results last? Whether used on its own or in conjunction with any other diet, Dr. Freedhoff's program shows how to replace a toxic dieting mindset with positive beliefs and behaviors. Dr. Freedhoff has uncovered the flawed thinking that sabotages even the most earnest weight loss efforts. The majority of dieting or weight loss programs call for regular sacrifice: Give up an entire food group; fight hunger day and night; undertake exhausting and grueling exercise regiments. These approaches are unrealistic, unhealthy, and make it nearly impossible to maintain results. Now, at last, there is hope. In *The Diet Fix*, Dr. Freedhoff offers a tested program for breaking down the negative thought patterns that prevent people from losing weight and keeping it off. Through the course of years of research and patient treatment, he has developed a 10-Day Reset that supports losing weight while maintaining a healthy, enjoyable lifestyle. This reset is designed to eliminate the habits that so often lead to weight gain: use it to shut down cravings, prevent indulgences from turning into binges, and break up with the scale once and for all. The 10-Day Reset can make any diet more effective, whether it's low-carb, low-fat, meal replacement, calorie tracking, or anything in between.
