Flash MX Application And Interface Design Connor McDonald,Paul Prudence,Gerald YardFace,Peter Aylward,Fay Rhodes,Robbie Shepherd,Ken Jokol,2013-11-27 The days of Flash as a creative luxury are long gone. After months of downsizing, Flash creativity has been on a huge rationalization program. It is no longer enough to present animation in millions of colors and a hundred transparencies. It is no longer sufficient to provide interactivity and dynamism for their own sake. The purpose of this collection is to show how designers have taken Flash and made it work for its supper. What we discover is a series of creations that place Flash at the hub of cutting edge web content. The end result is a snapshot of Flash as the ideal medium. In these amazing examples, we see the software pushed to its limits to create unbeatable applications—a collapsible family tree, an

interactive video learning system, and a drawing tool, capable of running online! Beyond this, we dip into the back-end capabilities to look at how to improve Flash still further. Some staple XML and PHP routines are brought in to add a bit of spice, while Flash's mysterious sharedObject command is hunted down and tamed to create a hybrid Tamagotchi houseplant—perfectly suited to lure surfers back to your website!
