Multimedia-based Instructional Design William W. Lee,Diana L. Owens,2004-04-26 Multimedia-Based Instructional Design is a thoroughly revised and updated second edition of the best-selling book that provided a complete guide to designing and developing interactive multimedia training. While most training companies develop their training programs in many different technological delivery media—computer-based, web-based, and distance learning technologies—this unique book demonstrates that the same instructional design process can be used for all media. Using just one process reduces cycle time for course development—and also reduces costs.

The Expulsion of the Other Byung-Chul Han,2018-01-08 The days of the Other are over in this age of excessive communication, information and consumption. What used to be the Other, be it as friend, as Eros or as hell, is now indistinguishable from the self in our narcissistic desire to assimilate everything and everyone until there are no boundaries left. The result is a 'terror of the Same', lives in which we no longer pursue knowledge, insight and experience but are instead reduced to the echo chambers and illusory encounters offered by social media. In extreme cases, this feeling of disorientation and senselessness is compensated through self-harm, or even harming others through acts of terrorism. Byung-Chul Han argues that our times are characterized not by external repression but by an internal depression, whereby the destructive pressure comes not from the Other but from the self. It is only by returning to a society of listeners and lovers, by acknowledging and desiring the Other, that we can seek to overcome the isolation and suffering caused by this crushing process of total assimilation.
