Seeing the Past with Computers Kevin Kee,Timothy J Compeau,2019-02-01 Recent developments in computer technology are providing historians with new ways to see—and seek to hear, touch, or smell—traces of the past. Place-based augmented reality applications are an increasingly common feature at heritage sites and museums, allowing historians to create immersive, multifaceted learning experiences. Now that computer vision can be directed at the past, research involving thousands of images can recreate

lost or destroyed objects or environments, and discern patterns in vast datasets that could not be perceived by the naked eye. *Seeing the Past with Computers* is a collection of twelve thought-pieces on the current and potential uses of augmented reality and computer vision in historical research, teaching, and presentation. The experts gathered here reflect upon their experiences working with new technologies, share their ideas for best practices, and assess the implications of—and imagine future possibilities for—new methods of historical study. Among the experimental topics they explore are the use of augmented reality that empowers students to challenge the presentation of historical material in their textbooks; the application of seeing computers to unlock unusual cultural knowledge, such as the secrets of vaudevillian stage magic; hacking facial recognition technology to reveal victims of racism in a century-old Australian archive; and rebuilding the soundscape of an Iron Age village with aural augmented reality. This volume is a valuable resource for scholars and students of history and the digital humanities more broadly. It will inspire them to apply innovative methods to open new paths for conducting and sharing their own research.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of

the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Semi-Obsessed Isabel Jordan, 2021-03-20 Marina Petrocelli's life is about as mundane as it gets for the sister of an infamous psychic/paranormal PI. Which is why she's pretty shocked when a couple of vampires try to kidnap her on her way home from work. And don't even get her started on the sexy-as-all-hell Irish dhampyre who gallantly (if somewhat drunkenly) rushes to her rescue out of nowhere, kisses the ever-lovin' crap out of her, then disappears without a trace. It's all too weird to comprehend! Quinn Connell's life

is anything but mundane. As an ex-convict with a shady past and an even shadier employment history, all he has to do is obey the terms of his parole, which are exceedingly simple: get a job, and stay out of trouble. Unfortunately, getting involved with Marina is the very definition of trouble for someone like him. And, as it turns out, her sister is the only employer in town willing to hire him. Quinn's head tells him Marina's officially off limits. Too bad his heart-and body, which can't seem to stop touching her-didn't get the memo. But when Quinn and Marina find themselves in the middle of a brutal life-or-death situation, Quinn knows keeping his distance and staying out of trouble is no longer an option. He'll do anything to keep Marina safe, even if it means relying on a few of his quirky (and sometimes scary) new coworkers and utilizing the very same dubious skills that landed him in prison in the first place. Nab the bad guys, stay out of prison, and (hopefully) get the girl. Easy, right? Yeah, not so much.

The Emergence of the Digital Humanities Steven E. Jones, 2013-08-15 The past decade has seen a profound shift in our collective understanding of the digital network. What was once understood to be a transcendent virtual reality is now experienced as a ubiquitous grid of data that we move through and interact with every day, raising new questions about the social, locative, embodied, and object-oriented nature of our experience in the networked world. In *The Emergence of the Digital Humanities*, Steven E. Jones examines this shift in our relationship to digital technology and the ways that it has affected humanities scholarship and the academy more broadly. Based on the premise that the network is now everywhere rather than merely out there, Jones links together seemingly disparate cultural events—the essential features of popular social media, the rise of motion-control gaming and mobile platforms, the controversy over the gamification of everyday life, the spatial turn, fabrication and 3D printing, and electronic publishing—and argues that cultural responses to changes in technology provide an essential context for understanding the emergence of the digital humanities as a new field of study in this millennium.
