Around the World in 175 Days Carroll V. Glines,2016-05-10 American military aviation reached a low point after World War I, lagging behind its European counterparts and facing a peacetime battle for survival. To raise the public profile of aviation, military leaders encouraged their pilots to enter air shows and vie for speed, endurance, and altitude records. As a result, U.S. Army airmen daringly accomplished the first flight around the world in 1924, three years before Charles Lindbergh's famous solo flight. In *Around the World in 175 Days*, Carroll V. Glines recounts this adventure from the golden age of aviation. After two years of planning, four Douglas World Cruisers, each carrying a pilot and a mechanic, took off from Seattle in April 1924, flying west to circle the globe; one additional plane was held in reserve. Four of the men and two of the planes completed the flight in September 1924 and, miraculously, all eight men survived, even though one plane had crashed in the Alaskan mountains and another had ditched in the Atlantic. The airmen had triumphed over the weather extremes of Arctic Alaska and the desert Middle East, numerous primitive landing sites in rough terrain, and maintenance and supply problems that persisted despite the coordinated efforts of land- and sea-based support personnel from the Army Air Service, U.S. Navy, and U.S. Coast Guard. Glines captures the drama of the journey, from the careful behind-the-scenes planning through the airmen's harrowing in-flight experiences to the mission's culmination in triumph. The success charted the future of the Army Air Service's worldwide aircraft deployment and paved the way for long-distance commercial air travel.

Fly by Wire William Langewiesche,2009-11-10 On January 15, 2009, a US Airways Airbus A320 had just taken off from LaGuardia Airport in New York when a flock of Canada geese collided with it, destroying both of its engines. Over the next three minutes, the plane's pilot, Chesley Sully Sullenberger, managed to glide it to a safe landing in the Hudson River. It was an instant media sensation, the Miracle on the Hudson, and Captain Sully was the hero. But how much of the success of this dramatic landing can actually be credited to the genius of the pilot? To what extent is the miracle on the Hudson the result of extraordinary—but not widely known, and in some cases quite controversial—advances in aviation and computer technology over the past twenty years? In *Fly by Wire*, one of America's greatest journalists takes us on a strange and unexpected journey into the fascinating world of advanced aviation. From the testing laboratories where engineers struggle to build a jet engine that can systematically resist bird attacks, through the creation of the A320 in France, to the political and social forces that have sought to minimize the impact of the revolutionary fly-by-wire technology, William Langewiesche assembles the untold stories necessary to truly understand the miracle on the Hudson, and makes us question our assumptions about human beings in modern aviation.

From the Flight Deck Doug Morris,2010-11-16 Imagine you're sitting next to a pilot on a flight and he's eager to answer all those nagging questions you have about air travel. Are those bumps and noises normal? Why are some take-offs delayed? What happens if there's a storm? How does this plane stay in the air, anyway? In *From the Flight Deck: Plane Talk and Sky Science*, pilot, meteorologist, and flight-school instructor Doug Morris lets you take the window seat on a trip around the world, giving you the scoop on everything from take-off to landing. He explains what you see looking out the window, what that window is made of, and how the plane is kept in rigorous flying condition. Perfect for informing the aviation enthusiast and calming the fearful flier, *From the Flight Deck* tells you everything you want to know about commercial airline travel: the physics of flight, how airplanes work and what they're made of, how pilots are trained, route planning and the importance of the ground crew, turbulence, flying in storms, what the flight crew gets up to on layovers, and much more. With facts, trivia, humour, and illuminating photos throughout, *From the Flight Deck* is the ultimate flight companion.

14 Days to Alaska Troy Hamon, 2012-04-01 Flying a small plane to Alaska is an adventure many pilots only dream of. In 2008, the author, a student pilot, and his brother, a flight instructor, embarked on this adventure in an airplane old enough to be their mother. On their journey, they examined how to fit twelve feet eight inches worth of grown men into one of the smallest cockpits on earth--for as many as eight hours a day. They visited places they had planned on going, to see friends and relatives, and made unintended stops in places they hadn't ever heard of. They waited out weather, waited on maintenance, and wrapped the whirlwind of learning to fly into one of the grandest cross-country trips imaginable. In the end, they covered in two weeks what takes commercial air carriers only a few hours to accomplish--but they had a lot more fun--and a much better view.

The Hallelujah Flight Phil Bildner, 2010-01-07 The extraordinary story of James Banning, the first African-American pilot to fly across country During the Great Depression, the ace black pilot James Banning decided to fly from coast to coast to serve as an inspiration to people everywhere. So with a little ingenuity and a whole lot of heart, he fixed up the dilapidated OXX6 Eagle Rock plane with his co-pilot and mechanic, Thomas Allen, earning them the derisive nickname, "The Flying Hobos." But with the help of friends and family along the way who signed their names on the wings of the plane in exchange for food, fuel and supplies, Banning and Allen made it through treacherous weather and overcame ruthless prejudice to receive a heroes' welcome upon landing in New York on October 9, 1932. This exceptional story of determination and pride, shown through John Holyfield's energetic flight scenes and sweeping landscapes, will put you in the cockpit right alongside Banning and Allen as they complete the journey of a lifetime.

Chasing Planes Gordon R. Page, 2015-12-03 Starting at an early age, Gordon Page was obsessed with anything that had to do with airplanes. Compelled to always look up to see what was flying overhead, he quickly developed the ability to identify anything with wings. Since then, Gordon has spent his life chasing planes. Gordon chronicles stories from his life as a pilot, consultant, broker, and aircraft appraiser that detail real life experiences and valuable lessons learned. Gordon's anecdotes reveal a variety of circumstances that include white-knuckle moments in the cockpit as he faced electrical failure in the skies over western Nebraska, survived an unforgettable helicopter tour of northern Israel as a passenger, and prepared to crash into a cornfield in a small plane in South Korea with a Top Gun obsessed pilot at the controls. Included are stories about how Gordon helped keep a giant bomber in the sky, assisted a film crew in recording a flight test of the G-II, and helped coordinate the sale of several Me 262s after a one-hour visit to Meacham, Texas, years earlier. Chasing Planes encapsulates the fascinating life journey of a pilot and airplane aficionado after he looked to the skies and found his true calling.

The B-25 in the Backyard Wally Soplata, 2020-07-06 Only in America could Walter A. Soplata, the son of penniless Czech immigrants, accomplish so much single-handedly saving historic aircraft from World War II and other periods.

After a childhood spent building model airplanes while dreaming about having his own airfield, Soplata worked in a large scrapyards taking apart hundreds of warplane engines. Shocked to see a rare engine or sometimes a complete warplane on its way to the recycling furnace, he began collecting whatever he could find and afford. He eventually collected nearly 20 complete airplanes and countless pieces of others. One of his Corsair fighters included the experimental F2G Corsair #74 that won the Cleveland National Air Races in 1947. Among other priceless airplanes he rescued was an experimental XP-82 Twin Mustang, an F-82E Twin Mustang, an X-prototype Skyraider, a stainless steel BT-12, and an F7U Cutlass--Soplata hauled the Cutlass fuselage home by stuffing it inside a junked school bus for its 600-mile journey. The story of a workaholic father and his aviation-obsessed son, this book records the accomplishments of a rare bird, just like the many airplanes he saved.
