Technology and Digital Media in the Early Years Chip

Donohue, 2014-08-07 A Co-Publication of Routledge and NAEYC
Technology and Digital Media in the Early Years offers early childhood teacher educators, professional development providers, and early childhood educators in pre-service, in-service, and

continuing education settings a thought-provoking guide to effective, appropriate, and intentional use of technology with young children. This book provides strategies, theoretical frameworks, links to research evidence, descriptions of best practice, and resources to develop essential digital literacy knowledge, skills and experiences for early childhood educators in the digital age. Technology and Digital Media in the Early Years puts educators right at the intersections of child development, early learning, developmentally appropriate practice, early childhood teaching practices, children's media research, teacher education, and professional development practices. The book is based on current research, promising programs and practices, and a set of best practices for teaching with technology in early childhood education that are based on the NAEYC/FRC Position Statement on Technology and Interactive Media and the Fred Rogers Center Framework for Quality in Children's Digital Media. Pedagogical principles, classroom practices, and teaching strategies are presented in a practical, straightforward way informed by child development theory, developmentally appropriate practice, and research on effective, appropriate, and intentional use of technology in early childhood settings. A companion website

(<http://teccenter.erikson.edu/tech-in-the-early-years/>) provides additional resources and links to further illustrate principles and best practices for teaching and learning in the digital age.

De los ordenadores a los dispositivos móviles Andrea Giráldez (coord.), Juanfra Álvarez Herrero, Diego García García, Ezequiel García Navarro, Antoni Miralpeix Bosch, Javier Monteagudo Galisteo, Adolf Murillo i Ribes, Manel Rives, Gemma Ufartes Ollé, Fernando Trujillo Sáez, 2015-04 Partiendo del área de música y desde una perspectiva interdisciplinar, este libro ofrece ideas para experimentar con lo sonoro y también para pensar en su aplicación en creaciones mixtas, audiovisuales y multimedia. Esta posible interconexión, que posibilita el trabajo interdisciplinar, se hace evidente a través de propuestas elaboradas por especialistas de música, todos ellos docentes en activo y en contacto permanente con el alumnado. Desde su propio ámbito, cada una de estas propuestas nos invita a integrar temas y contenidos de otras áreas rompiendo las fronteras entre las aulas y los espacios adjudicados a las distintas materias.

63 Ready-to-Use Maker Projects Ellyssa Kroski, 2018-12-13

This new compilation from editor and maker Kroski spotlights a

multitude of creative projects that you can tailor for your own library. Librarians and makers from across the country present projects as fun as an upcycled fashion show, as practical as Bluetooth speakers, and as mischievous as a catapult. Included are projects for artists, sewers, videographers, coders, and engineers. The handy reference format will help you quickly identify the estimated costs, materials, and equipment; and because several projects don't even require a dedicated makerspace, every library can join in. Inside you'll find how-to guidance for projects like a foam rocket launcher; stop-motion animation with 3D print characters; found-object robots; glowing ghost marionettes; Arduino eTextiles; magnetic slime; yarn painting; fidget flannels; an LED brooch; and cardboard sculpture. With takeaways like origami tea lights or a t-shirt tote bag, your patrons will be sure to remember how much fun your library can be.

Media Exposure During Infancy and Early Childhood Rachel

Barr, Deborah Nichols Linebarger, 2016-11-24 This book discusses the burgeoning world of young children's exposure to educational media and its myriad implications for research, theory, practice, and policy. Experts across academic disciplines and the media fill knowledge gaps and address concerns regarding apps, eBooks, and other screen-based technologies—which are being used by younger and younger children—and content delivery and design. Current research shows the developmental nuances of the child as learner in home, school, and mobile contexts, and the changes as parenting and pedagogy accommodate the complexities of the new interactive world. The book also covers methods for evaluating the quality of new media and prosocial digital innovations such as video support for separated families and specialized apps for at-risk toddlers. Highlights of the coverage: The role of content and context on learning and development from mobile media. Learning from TV and touchscreens during early childhood Educational preschool programming. How producers craft engaging characters to drive content delivery. The parental media mediation context of young children's media use. Supporting children to find their own agency in learning. Media Exposure During Infancy and Early

Childhood is an essential resource for researchers, clinicians and related professionals, and graduate students in diverse fields including infancy and early childhood development, child and school psychology, social work, pediatrics, and educational psychology.

Trapped Michael Northrop, 2011-02-01 The day the blizzard started, no one knew that it was going to keep snowing for a week. That for those in its path, it would become not just a matter of keeping warm, but of staying alive. . . .Scotty and his friends Pete and Jason are among the last seven kids at their high school waiting to get picked up that day, and they soon realize that no one is coming for them. Still, it doesn't seem so bad to spend the night at school, especially when distractingly hot Krista and Julie are sleeping just down the hall. But then the power goes out, then the heat. The pipes freeze, and the roof shudders. As the days add up, the snow piles higher, and the empty halls grow colder and darker, the mounting pressure forces a devastating decision. . . .Michael Northrop is the New York Times bestselling author of TombQuest, an epic book and game adventure series featuring the magic of ancient Egypt. He is also the author of Trapped, an Indie Next List Selection, and Plunked, a New York Public Library best

book of the year and an NPR Backseat Book Club selection. An editor at Sports Illustrated Kids for many years, he now writes full-time from his home in New York City. Learn more at www.michaelnorthrop.net.
