**Preliminary Inventory of the Records of the United States Food Administration, 1917–1920 National Archives (U.S.),1943**

*Stock-taking report: food biotechnology communication materials in the world* Food and Agriculture Organization of the United Nations,2020-10-27 During the Global Community Meeting on the FAO GM Foods Platform, held in September 2019, many participants expressed the strong need for a set of impartial and science-based communication materials that would address the communication challenges at a national level around food biotechnologies. To address this need, FAO, in collaboration with Kenya's National Biosafety Authority and scientific and consumer education/communication experts, initiated the process of developing a communication toolkit on food biotechnologies. The toolkit is to be used by governmental agencies that assess the safety of foods derived from biotechnologies to better communicate with the general public. The toolkit will contain a series of guiding documents with various sample materials. The target users of the toolkit itself are the food safety and biosafety competent authorities in the government sector, whereas the sample materials are for the general public.A step-by-step approach has been planned to

develop the sample materials with the first steps being the analysis of existing consumer education and communication materials worldwide, the identification of gaps in the information that is needed for consumers to gain a better understanding, and the selection of consumer education and communication materials to be used as a basis to develop sample materials. This document summarizes these initial steps.

—Cooking Light

Deb Perelman loves to cook. She isn’t a chef or a restaurant owner—she’s never even waitressed. Cooking in her tiny Manhattan kitchen was, at least at first, for special occasions—and, too often, an unnecessarily daunting venture. Deb found herself overwhelmed by the number of recipes available to her. Have you ever searched for the perfect birthday cake on Google? You’ll get more than three million results. Where do you start? What if you pick a recipe that’s downright bad? With the same warmth, candor, and can-do spirit her award-winning blog, Smitten Kitchen, is known for, here Deb presents more than 100 recipes—almost entirely new, plus a few favorites from the site—that guarantee delicious results every time. Gorgeously illustrated with hundreds of her beautiful color photographs, *The Smitten Kitchen Cookbook* is all about approachable, uncompromised home cooking. Here you’ll find better uses for your favorite vegetables: asparagus blanketing

a pizza; ratatouille dressing up a sandwich; cauliflower masquerading as pesto. These are recipes you'll bookmark and use so often they become your own, recipes you'll slip to a friend who wants to impress her new in-laws, and recipes with simple ingredients that yield amazing results in a minimum amount of time. Deb tells you her favorite summer cocktail; how to lose your fear of cooking for a crowd; and the essential items you need for your own kitchen. From salads and slaws that make perfect side dishes (or a full meal) to savory tarts and galettes; from Mushroom Bourguignon to Chocolate Hazelnut Crepe Cake, Deb knows just the thing for a Tuesday night, or your most special occasion.
