The SAGE Encyclopedia of Contemporary Early Childhood Education Donna Couchenour,J. Kent Chrisman,2016-03-15 The general public often views early childhood education as either simply “babysitting” or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development - physical, cognitive, language, social, emotional, aesthetic - as well as comprehensive review of best educational practices with young children, effective preparation for early childhood professionals and policy making practices, and addresses such questions as: · How is the field of early childhood education defined? · What are the roots of this field of study? · How is the history of early childhood education similar to yet different from the study of public education? · What are the major influences on understandings of best practices in early childhood education?

Classification of Developmental Language Disorders Ludo Verhoeven,Hans van Balkom,2003-09-12 Chapters written by leading authorities offer current perspectives on the origins and development of language disorders. They address the question: How can the child's linguistic environment be restructured so that children at risk can develop important adaptive skills in the domains of self-care, social interaction, and problem solving? This theory-based, but practical book emphasizes the importance of accurate definitions of subtypes for assessment and intervention. It will be of interest to students, researchers, and practitioners in the field of developmental language disorders.

Acquired Language Disorders in Adulthood and Childhood Nicola Pitchford,Andrew W Ellis,2016-11-03 In the World Library of Psychologists series, international experts present career-long collections of what they judge to be their finest pieces - extracts from books, key articles, salient research findings, and their major practical theoretical contributions. Elaine Funnell has played an important role in the study of neuropsychology over the past 25 years. She has been at the forefront of groundbreaking research on individuals suffering with acquired disorders of written and/or spoken language resulting from brain damage. With commentary by Nicola Pitchford and Andrew Ellis, this volume presents Elaine’s most significant contributions in her two main specialist areas: adult neuropsychology of semantic disorders, with a focus on disorders of naming in dementia, and acquired language and literacy disorders in childhood. The publications included in this volume date back to 1988, where Elaine co-authored a major review of theories regarding the representation of meanings in the mind and brain. They then bring us right up-to-date with a previously unpublished paper from 2010, which has been recently edited by the co-author, Mike Kopelman, for this edition. Through her exceptional work, Elaine has greatly advanced our understanding of the brain processes behind written and spoken language, and this book represents an original and timely contribution to the field. Acquired Language Disorders in Adulthood and Childhood will be of great interest to researchers and postgraduate students in adult and child neuropsychology, specifically for those specialising in semantic and language disorders.

Psychology of Language Shelia M. Kennison,2018-10-18 This accessibly written and pedagogically rich text delivers the most comprehensive examination of its subject, carefully drawing on the most up-to-date research and covering a breadth of the central topics including communication, language acquisition, language processing, language disorders, speech, writing, and development. This book also examines an array of other progressive areas in the field neglected in similar works such as bilingualism, sign language as well as comparative communication. Based on her globally-orientated research and academic expertise, author Shelia Kennison innovatively applies psycholinguistics to real-world examples through analysing the heterogenous traits of a wide variety of languages. With its engaging easy-to-understand prose, this text guides students gently and sequentially through an introduction to the subject. The book is designed for undergraduate and graduate students taking courses in psycholinguistics.

Communication and Mental Illness Jenny France,Sarah Kramer,2001-01-15 Communication and Mental Illness is a comprehensive and practical textbook written by a multidisciplinary group of experts in the field of mental health which will be of interest to all those

interested in improving their understanding of individuals with mental illness. The book is divided into three parts. The first of these offers both student and experienced clinicians in the mental health field an improved theoretical knowledge of the methods of communication commonly adopted by individuals with a variety of diagnoses of mental illness. It also provides practical suggestions of how this information can improve the individual professional's management of patients. Part Two looks at how information about communication in mental illness can influence service provision, ending with suggestions for future policy and practice. Communication and Mental Illness concludes with a final part describing the state of current research into different facets of communication and mental illness, offering an insight into the variety of research methodology and points of interest to those involved in the field.
