The Demand for International Football Telecasts in the United States Georgios Nalbantis, Tim Pawlowski, 2017-02-06 This book provides a comprehensive overview and economic analysis of US consumer demand for televised football (soccer). Accounting for transnational demand, research is focused on the US consumers demand for the English Premier League, Spanish La Liga, Italian Serie A, German Bundesliga, French Ligue 1 and the UEFA Champions League, which represent the most popular and marketable football competitions worldwide, and have recently sealed lucrative media rights contracts in many large markets, including the US. The study also takes account of North American Major League Soccer (MLS) in order to provide a more comprehensive overview of the country's football market and to allow for direct comparisons with the aforementioned European competitions. These findings offer valuable insights for US broadcasters, European league organizers and managers to adjust existing strategies and/or develop new strategies in conquering the US football market.

Globalized Sport Management in Diverse Cultural Contexts James J. Zhang, Brenda G. Pitts, 2019-04-05 Cross-cultural management is an important facet of the globalized sport industry. Sport managers must be skilled at working with individuals from diverse cultures and aware of the key issues affecting sport on a global level. This book brings together cutting-edge research from leading sport scholars from around the world, to illuminate some of those important issues and to demonstrate what cross-cultural management looks like in a sporting context. Presenting case studies from countries as diverse as the US, Brazil, Poland and Venezuela, and across a range of sports from football to basketball, the book presents new empirical material derived from a range of inquiry protocols, including both qualitative and quantitative methods. It offers critical analyses of cross-cultural and managerial issues in key areas such as group cohesiveness, group communications, and misperception and misinterpretation. Making an important contribution to our understanding of both theory and practice in sport management, this book is fascinating reading for any student, researcher or practitioner with an interest in global and international sport.

Blue Skies Patrick Parsons, 2008-04-05 Cable television is arguably the dominant mass media technology in the U.S. today. Blue Skies traces its history in detail, depicting the important events and people that shaped its development, from the precursors of cable TV in the 1920s and '30s to the first community antenna systems in the 1950s, and from the creation of the national satellite-distributed cable networks in the 1970s to the current incarnation of info-structure that dominates our lives. Author Patrick Parsons also considers the ways that economics, public perception, public policy, entrepreneurial personalities, the social construction of the possibilities of cable, and simple chance all influenced the development of cable TV. Since the 1960s, one of the pervasive visions of cable has been of a ubiquitous, flexible, interactive communications system capable of providing news, information, entertainment, diverse local programming, and even social services. That set of utopian hopes became known as the Blue Sky vision of cable television, from which the book takes its title. Thoroughly documented and carefully researched, yet lively, occasionally humorous, and consistently insightful, Blue Skies is the genealogy of our media society.
