Mobile Apps for Kids Federal Tade Comion,2014-05-23 In February 2012, Federal Trade Commission (FTC) staff issued a report on a survey of mobile "apps" offered for children in Apple's App Store and Google's Android Market, the two largest U.S. app stores. The report, Mobile Apps for Kids:

Current Privacy Disclosures are Disappointing, found that little or no information was available to parents about the privacy practices and interactive features of the mobile apps surveyed prior to download. As a result, the report called on all members of the kids' app ecosystem – app stores, developers,and third parties that interact with the apps – to provide greater transparency about the data practices and interactive features of apps geared to children. The report stated that FTC staff would conduct a follow-up survey in six months to evaluate whether and how industry had addressed the concerns raised.FTC staff conducted its follow-up survey during the summer of 2012. Like the first survey, the new survey examined the disclosures that apps provided about their privacy practices and interactive features, such as links to social media. However, the new survey went a step further by testing the apps' practices and comparing them to the disclosures made. Specifically, the new survey examined whether the apps included interactive features or sharedkids' information with third parties without disclosing these facts to parents. The answer: Yes, many apps included interactive features or shared kids' information with third parties without disclosing these practices to parents.Since issuing the first kids' app report, the Commission has continued to promote consumer protections in mobile technologies by engaging in a host of policy, enforcement, and educational initiatives. Additionally, other government agencies, including the California Attorney General and the U.S. Department of Commerce, have launched efforts to increase transparency in the mobile marketplace, and several trade associations have issued selfregulatoryguidelines or launched initiatives regarding mobile app privacy and related issues. Likewise, Apple and Google recently announced changes to their app stores that may address concerns about the failure to post privacy policies and the transmission of personal information by apps.

Handbook of Research on Family Literacy Practices and Home-School Connections Fox, Kathy R.,Szech, Laura E.,2022-06-24 Research has shown that families and schools that partner together improve literacy outcomes for their students. Family literacy includes homework and shared book reading but goes beyond these school-to-home activities to encompass family-generated practices. Further study on the importance of the partnership between the home and school is required to implement best practices and provide students with the best possible education. The Handbook of Research on Family Literacy

Practices and Home-School Connections seeks to understand the connections made and new information learned during the COVID-19 pandemic surrounding family literacy and shares updated practices and new perspectives on what it means to partner with families and embrace diverse family literacies in this new world. The book also provides teachers⬜ perspectives on how future relationships between the school and home can be shaped through both narrative and research-based chapters. Covering key topics such as parenting, homework, and social distancing, this major reference work is ideal for administrators, school faculty, academicians, scholars, practitioners, instructors, and students.

Young People and Social Media: Contemporary Children's Digital Culture Steve Gennaro,Blair Miller,2021-10-05 'Young People and Social Media: Contemporary Children's Digital Culture' explores the practices, relationships, consequences, benefits, and outcomes of children's experiences with, on, and through social media by bringing together a vast array of different ideas about childhood, youth, and young people's lives. These ideas are drawn from scholars working in a variety of disciplines, and rather than just describing the social construction of childhood or an understanding of children's lives, this collection seeks to encapsulate not only how young people exist on social media but also how their physical lives are impacted by their presence on social media. One of the aims of this volume in exploring youth interaction with social media is to unpack the structuring of digital technologies in terms of how young people access the technology to use it as a means of communication, a platform for identification, and a tool for participation in their larger social world. During longstanding and continued experience in the broad field of youth and digital culture, we have come to

realize that not only is the subject matter increasing in importance at an immeasurable rate, but the amount of textbooks and/or edited collections has lagged behind considerably. There is a lack of sources that fully encapsulate the canon of texts for the discipline or the rich diversity and complexity of overlapping subject areas that create the fertile ground for studying young people's lives and culture. The editors hope that this text will occupy some of that void and act as a catalyst for future interdisciplinary collections. 'Young People and Social Media: Contemporary Children's Digital Culture' will appeal to undergraduate students studying Child and Youth Studies and—given the interdisciplinary nature of the collection— scholars, researchers and students at all levels working in anthropology, psychology, sociology, communication studies, cultural studies, media studies, education, and human rights, among others. Practitioners in these fields will also find this collection of particular interest.

Facebook Nation Newton Lee,2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

The Myth of the ADHD Child, Revised Edition Thomas Armstrong,2017-08-29 A fully revised and updated edition of the groundbreaking book on tackling the root causes of children's attention and behavior problems rather than masking the symptoms with medication. More than twenty years after Dr. Thomas Armstrong's Myth of the A.D.D. Child first published, he presents much needed updates and insights in this substantially revised edition. When The Myth of the A.D.D. Child was first published in 1995, Dr. Thomas Armstrong made the controversial argument that many behaviors labeled as ADD or ADHD are simply a child's active response to complex social, emotional, and educational influences. In this fully revised and updated

edition, Dr. Armstrong shows readers how to address the underlying causes of a child's attention and behavior problems in order to help their children implement positive changes in their lives. The rate of ADHD diagnosis has increased sharply, along with the prescription of medications to treat it. Now needed more than ever, this book includes fifty-one new non-drug strategies to help children overcome attention and behavior problems, as well as updates to the original fifty proven strategies.
