The Everything Guide To Integrative Pain Management Traci Stein,2015-11-15 A guide intended to help those diagnosed with chronic pain--

Smart Health Xiaolong Zheng,Daniel Zeng,Hsinchun Chen,Yong Zhang,Chunxiao Xing,Daniel B. Neill,2014-07-05 This book constitutes the refereed proceedings of the International Conference for Smart Health, ICSH 2014, held in Beijing, China, in July 2014. The 21 papers presented together with 4 extended abstracts were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on information sharing, integrating and extraction; health data analysis and management; clinical and medical data mining; and clinical practice and medical monitoring.

Wireless Mobile Communication and Healthcare Konstantina S. Nikita,James C. Lin,Dimitrios I. Fotiadis,Maria-Teresa Arredondo Waldmeyer,2012-05-30 This book constitutes the refereed proceedings of the Second International ICST Conference on Wireless Mobile Communication and Healthcare, MobiHealth 2011, held on Kos Island, Greece, in October 2011. The 60 revised full papers presented were carefully reviewed and selected from more than 80 submissions. The papers are organized in 10 sessions and two workshops with topics covering intrabody communications, chronic disease monitoring and management, ambient assistive technologies, implantable and wearable sensors, emergency and disaster applications.

Design and Quality Considerations for Developing Mobile Apps for Medication Management: Emerging Research and Opportunities Yap, Kevin,Ali, Eskinder Eshetu,Chew, Lita,2020-07-31 Medication management is an essential component of therapeutic success in the treatment of chronic diseases. However, patients who do not regularly take their prescribed medications are a primary concern of health systems worldwide. A significant proportion of patients on chronic medications fail to adhere to their treatments, and suboptimal adherence leads to dire clinical and financial consequences on the personal level. Moreover, non-adherence can adversely impact public healthcare costs and the clinical outcomes of patients. Design and Quality Considerations for Developing Mobile Apps for Medication Management: Emerging Research and Opportunities is a collection of innovative research that combines theory and practice on optimizing strategies to improve medication adherence and overall health and wellbeing in patients through the design of usable and reliable mobile app-based systems. Highlighting a broad range of topics including pharmaceutical care, quality assessment, and health behavior frameworks, this book is ideally designed for clinicians, pharmacists, healthcare providers, programmers, software developers, researchers, academicians, and students.

Advances in Visual Informatics Halimah Badioze Zaman,Alan F. Smeaton,Timothy K. Shih,Sergio Velastin,Tada Terutoshi,Nazlena Mohamad Ali,Mohammad Nazir Ahmad,2019-11-12 This book constitutes the refereed proceedings of the 6th International Conference on Advances in Visual Informatics, IVIC 2019, held in Bangi, Malaysia, in November 2019. The 65 papers presented were carefully reviewed and selected from 130 submissions. The papers are organized into the following topics: Visualization and Digital Innovation for Society 5.0; Engineering and Digital Innovation for Society 5.0; Cyber Security and Digital Innovation for Society 5.0; and Social Informatics and Application for Society 5.0.

Smart Cities and Tourism: Co-creating experiences, challenges and opportunities Dimitrios Buhalis,Babak Taheri,Roya Rahimi,2022-10-01 Smart cities are cities which use different types of electronic methods and sensors to collect data. With international contributions from well-respected international academics, it brings state-of-art knowledge on marketing management (and related areas e.g., urban studies) from a new modern perspective within the smart cities.

Mobile e-Health Hannah R. Marston,Shannon Freeman,Charles Musselwhite,2017-12-01 This multi-disciplinary collection of essays captures discussion, thinking and research surrounding the recent surge of interest in how technology can help us as we age. A wide range of topics are covered, from investigations in the use of technology to improve health and well-being, to examinations of digital gaming, mobile health apps and the quantified self in relation to an ageing population. From multi-disciplinary perspectives, this collection highlights the role of a more social approach to technology. As such, a variety of social research methods are used throughout the chapters. The benefits and issues with different approaches are highlighted both in terms of further research, but also so the reader can judge the value of the research for themselves. This collection brings together the latest thinking and cutting edge contemporary research from leading thinkers and academics in the field of human computer interaction, health and gerontology. In taking a social approach, it highlights how technological practices fit within wider gerontological, political and cultural perspectives. It therefore has potential to influence those working in human computer interaction, digital humanities, sociology, psychology and gerontology. It can help change the practice of people working in the health and social care field, in computer and product design, and in the digital and creative industries.

IoT Projects with Bluetooth Low Energy Madhur Bhargava,2017-08-31 Use the power of BLE to create exciting IoT applications About This Book Build hands-on IoT projects using Bluetooth Low Energy and learn about Bluetooth 5 and its features. Build a health tracking system, and indoor navigation and warehouse weather monitoring projects using smart devices. Build on a theoretical foundation and create a practice-based understanding of Bluetooth Low Energy. Who This Book Is For If you're an application developer, a hardware enthusiast, or just curious about the Internet of Things and how to convert it into hands-on projects, then this book is for you. Having some knowledge of writing mobile applications will be advantageous. What You Will Learn Learn about the architecture and IoT uses of BLE, and in which domains it is being used the most Set up and learn about various development platforms (Android, iOS, Firebase, Raspberry Pi, Beacons, and GitHub) Create an Explorer App (Android/iOS) to diagnose a Fitness Tracker Design a Beacon with the Raspberry Pi and write an app to detect the Beacon Write a mobile app to periodically poll the BLE tracking sensor Compose an app to read data periodically from temperature and humidity sensors Explore more applications of BLE with IoT Design projects for both Android and iOS mobile platforms In Detail Bluetooth Low Energy, or Bluetooth Smart, is Wireless Personal Area networking aimed at smart devices and IoT applications. BLE has been increasingly adopted by application developers and IoT enthusiasts to establish connections between smart devices. This book initially

covers all the required aspects of BLE, before you start working on IoT projects. In the initial stages of the book, you will learn about the basic aspects of Bluetooth Low Energy—such as discovering devices, services, and characteristics—that will be helpful for advanced-level projects. This book will guide you through building hands-on projects using BLE and IoT. These projects include tracking health data, using a mobile App, and making this data available for health practitioners; Indoor navigation; creating beacons using the Raspberry Pi; and warehouse weather Monitoring. This book also covers aspects of Bluetooth 5 (the latest release) and its effect on each of these projects. By the end of this book, you will have hands-on experience of using Bluetooth Low Energy to integrate with smart devices and IoT projects. Style and Approach A practical guide that will help you promote yourself into an expert by building and exploring practical applications of Bluetooth Low Energy.

Blockchain Technology in Healthcare Applications Bharat Bhushan,Nitin Rakesh,Yousef Farhaoui,Parma Nand,Bhuvan Unhelkar,2022-04-18 Tremendous growth in healthcare treatment techniques and methods has led to the emergence of numerous storage and communication problems and need for security among vendors and patients. This book brings together latest applications and state-of-the-art developments in healthcare sector using Blockchain technology. It explains how blockchain can enhance security, privacy, interoperability, and data accessibility including AI with blockchains, blockchains for medical imaging to supply chain management, and centralized management/clearing houses alongside DLT. Features: Includes theoretical concepts, empirical studies and detailed overview of various aspects related to development of healthcare applications from a reliable, trusted, and secure data transmission perspective. Provide insights on business applications of Blockchain, particularly in the healthcare sector. Explores how Blockchain can solve the transparency issues in the clinical research. Discusses AI with Blockchains, ranging from medical imaging to supply chain management. Reviews benchmark testing of AI with Blockchains and its impacts upon medical uses. This book aims at researchers and graduate students in healthcare information systems, computer and electrical engineering.

e-Patients Live Longer Nancy B. Finn,2011-08-16 e-Patients Live Longer, The Complete Guide to Managing Health Care Using Technology is a comprehensive guidebook on using e-tools to facilitate the complexities of our health care system. The book illustrates how the communication tools that consumers use every day: digital records, email, the Internet, and smartphones are enabling technologies that help patients empower themselves to take charge of their health care, communicate with their clinicians, monitor their chronic conditions and collaborate with their health care team for better outcomes. "This 2014 update to the original 2011 edition reflects changes to the Affordable Care Act and underscores the breakneck pace of change in both healthcare and technology. It is a comprehensive, accurate and useful healthcare guide, chock full of statistics, surveys, anecdotal stories including a list of key points and documented sources that close each chapter." Kirkus Indie Review, June 2014 "The book's eleven chapters cover everything from managing healthcare costs and records to understanding how preparing for a doctor's visit has changed over the years and what your legal rights are as a self-advocating patient. The concepts in each chapter are introduced and reinforced with real-life stories that are appropriately suited to each topic. These illustrative stories make the concepts memorable and empowering." Forward Clarion Review, Sara Budzik, June, 2014

Health Informatics: Practical Guide for Healthcare and Information Technology Professionals (Sixth Edition) Robert E. Hoyt,Ann K. Yoshihashi,2014 Health Informatics (HI) focuses on the application of Information Technology (IT) to the field of medicine to improve individual and population healthcare delivery, education and research. This extensively updated fifth edition reflects the current knowledge in Health Informatics and provides learning objectives, key points, case studies and references.

Digital Conversion on the Way to Industry 4.0 Numan M. Durakbasa,M. Güneş Gençyılmaz,2020-10-25 This book presents the proceedings from the International Symposium for Production Research 2020. The cross-disciplinary papers presented draw on research from academics and practitioners from industrial engineering, management engineering, operational research, and production/operational management. It explores topics including: · computer-aided manufacturing; Industry 4.0 applications; simulation and modeling big data and analytics; flexible manufacturing systems; decision analysis quality management industrial robotics in production systems information technologies in production management; and optimization techniques. Presenting real-life applications, case studies, and mathematical models, this book is of interest to researchers, academics, and practitioners in the field of production and operation engineering.

Impact Analysis of Solutions for Chronic Disease Prevention and Management Mark Donnelly,Cristiano Paggetti,Chris Nugent,Mounir Mokhtari,2012-05-28 This book constitutes the refereed proceedings of the 10th International Conference on Smart Homes and Health Telematics, ICOST 2012, held in Artiminio, Tuscany, Italy, June 12- 15, 2012. The 25 revised full papers presented together with 22 short papers were carefully reviewed and selected from 74 submissions. The papers are categorized into a number of sessions that include: User Engagement for Improved Adoption of Assistive Technologies, Self-Management and Tele-Rehabilitation, Advances in Remote Monitoring and Activity Recognition, Sensor Networks for Unobstrusive Monitoring Solutions, and Real World "Aware" Systems.

PHealth 2012 B. Blobel,P. Pharow,F. Sousa,2012-06-12 Microsystems, smart textiles, telemedicine, smart implants and sensor-controlled medical devices have become important enablers for monitoring and treatment in both inpatient and outpatient care. Indeed, micro and nano technologies have tremendous potential for increasing access to care whilst managing healthcare costs. They are set to be at the heart of evolutionary and revolutionary changes in healthcare, and are crucial, not only for the future of medicine, but also for the improvement of health care and welfare processes today and tomorrow. This book presents the proceedings of the 2012 pHealth conference, held in Porto, Portugal, in June 2012. The pHealth conference has emerged as the leading international meeting on wearable micro and nano technologies for personalized medicine, attracting scientists from various disciplines, clinicians, as well as policy makers from the healthcare industry, hospital administration and allied professionals. The book includes keynotes, invited speeches and selected submitted contributions. The areas covered include: the pHealth approach, new approaches to diagnosis and therapy, monitoring special diseases, system architecture, design and implementation, wearable sensor systems, smartphone applications and ambient assisted living. Over the years, pHealth has given visibility to the tremendous potential of micro and nano technologies, not only for the future of medicine, but also for the improvement of healthcare processes today. This book will be of interest to all those involved with the provision of health and welfare services, and also to companies engaged in the development of micro and nano technologies.

Mobile Crowdsensing Cristian Borcea,Manoop Talasila,Reza Curtmola,2016-12-01 Mobile crowdsensing is a technology that allows large scale, cost-effective sensing of the physical world. In mobile crowdsensing, mobile personal devices such as smart phones or smart watches come equipped with a variety of sensors that can be leveraged to collect data related to environment, transportation, healthcare, safety and so on. This book presents the first extensive coverage of mobile crowdsensing, with examples and insights drawn from the authors' extensive research on this topic as well as from the research and development of a growing community of researchers and practitioners working in this emerging field. Throughout the text, the authors provide the reader with various examples of crowdsensing applications and the building blocks to creating the necessary infrastructure, explore the related concepts of mobile sensing and crowdsourcing, and examine security and privacy issues introduced by mobile crowdsensing platforms.

Public Health and Informatics J. Mantas,L. Stoicu-Tivadar,C. Chronaki,2021-07 For several years now, both eHealth applications and digitalization have been seen as fundamental to the new era of health informatics and public health. The current pandemic situation has also highlighted the importance of medical informatics for the scientific process of evidence-based reasoning and decision making at all levels of healthcare. This book presents the accepted full papers, short papers, and poster papers delivered as part of the 31st Medical Informatics in Europe Conference (MIE 2021), held virtually from 29-31 May 2021. MIE 2021 was originally due to be held in Athens, Greece, but due to the continuing pandemic situation, the conference was held as a virtual event. The 261 papers included here are grouped into 7 chapters: biomedical data, tools and methods; supporting care delivery; health and prevention; precision medicine and public health; human factors and citizen centered digital health; ethics, legal and societal aspects; and posters. Providing a state-of-the-art overview of medical informatics from around the world, the book will be of interest to all those working with eHealth applications and digitalization to improve the delivery of healthcare today.

Advanced Sensing in Image Processing and IoT Rashmi Gupta,Arun Kumar Rana,Sachin Dhawan,Korhan Cengiz,2021-03-26 The book provides future research directions in IoT and image processing based Energy, Industry, and Healthcare domain and explores the different applications of its associated technologies. However, the Internet of Things and image processing is a very big field with a lot of subfields, which are very important such as Smart Homes to improve our daily life, Smart Cities to improve the citizens' life, Smart Towns to recover the livability and traditions, Smart Earth to protect our world, and Industrial Internet of Things to create safer and easier jobs. This book considers very important research areas in Energy, Industry, and Healthcare domain with IoT and image processing applications.The aim of the book to highlights future directions of optimization methods in various engineering and science applications in various IoT and image processing applications. Emphasis is given to deep learning and similar models of neural network-based learning techniques employed in solving optimization problems of different engineering and science applications. The role of AI in mechatronics is also highlighted using suitable optimization methods. This book considers very important research areas in Energy, Industry, and Healthcare. It addresses major issues and challenges in Energy, Industry, and Healthcare and solutions proposed for IoT-enabled cellular/computer networks, routing/communication protocols, surveillances applications, secured data management, and positioning approaches. It focuses mainly on smart and context-aware implementations. Key sailing Features: The impact of the proposed book is to provide a major area of concern to develop a foundation for the implementation process of new image processing and IoT devices based on Energy, Industry, and Healthcare related technology. The researchers working on image processing and IoT devices can correlate their work with other requirements of advanced technology in Energy, Industry, and Healthcare domain. To make aware of the latest technology like AI and Machine learning in Energy, Industry, and Healthcare related technology. Useful for the researcher to explore new things like Security, cryptography, and privacy in Energy, Industry, and Healthcare related technology. People who want to start in Energy, Industry, and Healthcare related technology with image processing and IoT world.

Communication and Learning Paul Witt,2016-09-12 In this volume, leading scholars from the fields of communication, educational psychology, and international education address what is known about the strategic role of interpersonal communication in the teaching/learning process. Instruction often involves spoken communication that carries information from teacher to learner, and in these instances the teacher's skillful and strategic use of language has a measurable impact on learning outcomes. Thus, the cumulative findings of instructional communication research are instrumental in maximizing the efficiency and effectiveness of both teaching and learning. Major sections of this volume include: Historical and Theoretical Foundations Instructor Characteristics and Behaviors Student Characteristics and Outcomes Pedagogy and Classroom Management Teaching and Learning Communication Across the Life-span This handbook serves researchers, professors, and graduate students by surveying the collective findings of research and experience concerning the intentional activity of teaching and learning.

Naturally Supporting Cancer Treatment Jenny Graves,2021-10-25 Evidence-based help on your cancer journey from someone who has travelled it herself. Cancer can leave you feeling disempowered. While doctors usually focus on chemotherapy, radiation and surgery, helpful lifestyle changes are often overlooked. Adopting these changes puts you in control, which fosters a more optimistic outlook. Research shows that this helps to boost good health and longevity. Naturally Supporting Cancer Treatment shows you the evidence for: · the foods that help, those to avoid, and the best cancer diets · why stress reduction is valuable and the best ways to achieve it · the importance of exercise and the types that might suit you · the links between insomnia and cancer, and how to sleep better · how some toxins can cause cancer, and ways to avoid them · which supplements and herbs can help prevent cancer, support chemotherapy and radiation, and reduce side effects. 'What an inspired read. Jenny offers the perfect combination of patient and clinician's perspective. Confidently guiding you through the evidence based use of diet, lifestyle and complementary medicine. An empowering read for all oncology patients and their carers. I will be recommending this to patients in my care.' Naturopath Carla Wrenn (Oncology Support) Jenny Graves was diagnosed with leukaemia in 2009. After a stem cell transplant in 2010 and her subsequent recovery, she spent 4 years studying for an Advanced Diploma in Naturopathy. Here she shares what she learned to stay well.
