Digital Material Marianne van den Boomen, 2009 This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society. Three decades of societal and cultural alignment of new media yielded to a host of innovations, trials, and problems, accompanied by versatile popular and academic discourse. New Media Studies crystallized internationally into an established academic discipline, which begs the question: where do we stand now; which new issues have emerged now that new media are taken for granted, and which riddles remain unsolved; and, is contemporary digital culture indeed all about 'you', or do we still not really understand the digital machinery and how it constitutes us as 'you'. From desktop metaphors to Web 2.0 ecosystems, from touch screens to blogging to e-learning, from role-playing games to Cybergoth music to wireless dreams, this timely volume offers a showcase of the most up-to-date research in the field from what may be called a 'digital-materialist' perspective.

Music's Meanings Philip Tagg, 2013-03-03 "In addressing a pedagogical problem –how to talk about music as if it meant something other than itself – Philip Tagg raises fundamental questions about western epistemology as well as some of its strategically mystifying discourses. With an unsurpassed authority in the field, the author draws on a lifetime of critical reflection on the experience of music, and how to communicate it without resorting to exclusionary jargon. This is a must-read book for anyone interested in music, for whatever reason: students, teachers, researchers, performers, industry and policy stakeholders, or just to be able to talk intelligently about the musical experience." (Prof. Bruce Johnson)

Living My Life, Vol. 1: Autobiography Emma Goldman, 2019-07-11 You damn bitch of an anarchist, I wish I could get at you. I would tear your heart out and feed it to my dog. This was one of the less obscene messages received by Emma Goldman (1869-1940), while in jail on suspicion of complicity in the assassination of McKinley. The most notorious woman of her day, she was bitterly hated by millions and equally revered by millions. The strong feelings she aroused are understandable. She was an alien, a practicing anarchist, a labor agitator, a pacifist in World War 1, an advocate of political violence, a feminist, a proponent of free love and birth control, a communist, a street-fighter for justice - all of which she did with strong intellect and boundless passion. Today, of course, many of the issues that she fought over are just as vital as they were then. Her autobiography, written with vigor, ranks among the finest in the English language.

Marine Corps Band Manual Department of the Navy, 2013-09-21 Military history has established that musical units are an integral part of the Marine Corps (Appendix A). Marine Corps Bands are an important stimulus to morale and esprit de corps and provide the Commanding General, and the unit, a vital link to ceremonial traditions. In combat, musical units continue musical functions and augment security on a temporary basis during periods of heightened combat intensity when use of the band in its primary role is impractical.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Musical Instruments in the 21st Century Till Bovermann, Alberto de Campo, Hauke Egermann, Sarah-Indriyati Hardjowirogo, Stefan Weinzierl, 2016-12-09 By exploring the many different types and forms of contemporary musical instruments, this book contributes to a better understanding of the conditions of instrumentality in the 21st century. Providing insights from science, humanities and the arts, authors from a wide range of disciplines discuss the following questions: · What are the conditions under which an object is recognized as a musical instrument? · What are the actions and procedures typically associated with musical instruments? · What kind of (mental and physical) knowledge do we access in order to recognize or use something as a musical instrument? · How is this knowledge being shaped by cultural conventions and temporal conditions? · How do algorithmic processes 'change the game' of musical performance, and as a result, how do they affect notions of instrumentality? · How do we address the question of instrumental identity within an instrument's design process? · What properties can be

used to differentiate successful and unsuccessful instruments? Do these properties also contribute to the instrumentality of an object in general? What does success mean within an artistic, commercial, technological, or scientific context?

The Cambridge Companion to Sibelius Daniel M. Grimley,2004-02-26 Jean Sibelius has gradually emerged as one of the most striking and influential figures in twentieth-century music, yet his work is only just beginning to receive the critical attention that its importance deserves. This Companion provides an accessible and vivid account of Sibelius's work in its historical and cultural context. Leading international scholars, from Finland, the United States and the UK, examine Sibelius's music from a range of critical perspectives, including nationalism, eroticism and the exotic, music and landscape, reception and musical influence. Focus: Irish Traditional Music Sean Williams,2013-02 Focus: Irish Traditional Music is an introduction to the instrumental and vocal traditions of the Republic of Ireland and Northern Ireland, as well as Irish music in the context of the Irish diaspora. Ireland's size relative to Britain or to the mainland of Europe is small, yet its impact on musical traditions beyond its shores has been significant, from the performance of jigs and reels in pub sessions as far-flung as Japan and Cape Town, to the worldwide phenomenon of Riverdance. Focus: Irish Traditional Music interweaves dance, film, language, history, and other interdisciplinary features of Ireland and its diaspora. The accompanying CD presents both traditional and contemporary sounds of Irish music at home and abroad.

Organising Music Nic Beech,Charlotte Gilmore,2015-02-05 Organisational theorists have become increasingly interested in the creative industries, where practices that are commonplace are of particular interest to organisations in other sectors as they look for new ways to enhance performance. Focusing on the music industry, this book sets up a unique dialogue between leading organisational theorists and music professionals. Part I explores links between organisation theory and the creative industries literature, concentrating on practices of organising and knowledge mobilisation, followed by an in-depth discussion of key theoretical concepts by subject experts. Part II provides a diverse range of 'tales from the field', including examples from classical orchestras, folk, indie and punk. The concluding chapter examines the shared dialogue to reveal what practice in the musical field can learn from organisational theory, and vice versa. This innovative book will interest graduate students and researchers in the fields of organisation studies, music management and the creative industries.

The Art of Record Production Simon Zagorski-Thomas,Katia Isakoff,Serge Lacasse,Sophie Stévanche,2019-07-01 The playback of recordings is the primary means of experiencing music in contemporary society, and in recent years 'classical' musicologists and popular music theorists have begun to examine the ways in which the production of recordings affects not just the sound of the final product but also musical aesthetics more generally. Record production can, indeed, be treated as part of the creative process of composition. At the same time, training in the use of these forms of technology has moved from an apprentice-based system into university education. Musical education and music research are thus intersecting to produce a new academic field: the history and analysis of the production of recorded music. This book is designed as a general introductory reader, a text book for undergraduate degree courses studying the creative processes involved in the production of recorded music. The aim is to introduce students to the variety of approaches and methodologies that are currently being employed by scholars in this field. The book is divided into three sections covering historical approaches, theoretical approaches and case studies and practice. There are also three interludes of commentary on the academic contributions from leading record producers and other industry professionals. This collection gives students and scholars a broad overview of the way in which academics from the analytical and practice-based areas of the university system can be brought together with industry professionals to explore the ways in which this new academic field should progress.

Faking It: The Quest for Authenticity in Popular Music Hugh Barker,Yuval Taylor,2007-01-30 Traces the search for the elusive quality of authenticity in the music of the twentieth century, examining the roles of Kurt Cobain, John Lennon, Jimmie Rodgers, Donna Summer, Leadbelly, Neil Young, Moby, and other musicians while reassessing what makes popular music work and reflecting on how the quest for authenticity has influenced the development of popular music.

Don't Waste Your Cancer John Piper,2011-01-27 How are we as Christians called to respond when cancer invades our lives, whether our own bodies or those of our friends and family? On the eve of his own cancer surgery, John Piper writes about cancer as an opportunity to glorify God. With pastoral sensitivity, compassion, and strength, Piper gently but firmly acknowledges that we can indeed waste our cancer when we don't see how it is God's good plan for us and a hope-filled path for making much of Jesus. *Don't Waste Your Cancer* is for anyone touched by a life-threatening illness. It first appeared as an appendix in *Suffering and the Sovereignty of God*. Repackaged and republished, it will serve as a hope-giving resource for healthcare workers, pastors, counselors, and others caring for those with cancer and other serious illnesses. The booklets are also available in packs of ten.
