Free Berlin Briana J. Smith,2022-09-20 An alternative history of art in Berlin, detaching artistic innovation from art world narratives and connecting it instead to collective creativity and social solidarity. In pre- and post-reunification Berlin, socially engaged artists championed collective art making and creativity over individual advancement, transforming urban space and civic life in the process. During the Cold War, the city's state of exception invited artists on both sides of the Wall to detour from artistic tradition; post-Wall, art became a tool of resistance against the orthodoxy of economic growth. In Free Berlin, Briana Smith explores the everyday peculiarities, collective joys, and grassroots provocations of experimental artists in late Cold War Berlin and their legacy in today's city. These artists worked intentionally outside the art market, believing that art should be everywhere, freed from its confinement in museums and galleries. They used art as a way to imagine new forms of social and creative life. Smith introduces little-known artists including West Berlin feminist collective Black Chocolate, the artist duo paint the town red (p.t.t.r), and the Office for Unusual Events, creators of satirical urban political theater, as well as East Berlin action art and urban interventionists Erhard Monden, Kurt Buchwald, and others. Artists and artist-led urban coalitions in 1990s Berlin carried on the participatory spirit of the late Cold War, with more overt forms of protest and collaboration at the neighborhood level. The temperament lives on in twenty-first century Berlin, animating artists' resolve to work outside the market and citizens' spirited defenses of green spaces, affordable housing, and collectivist projects. With Free Berlin, Smith offers an alternative history of art in Berlin, detaching artistic innovation from art world narratives and connecting it instead to Berliners' historic embrace of care, solidarity, and cooperation.

African American Urban History since World War II Kenneth L. Kusmer,Joe W. Trotter,2009-08-01 Historians have devoted surprisingly little attention to African American urban history of the postwar period, especially compared with earlier decades. Correcting this imbalance, African American Urban History since World War II features an exciting mix of seasoned scholars and fresh new voices whose combined efforts provide the first comprehensive assessment of this important subject. The first of this volume's five groundbreaking sections focuses on black migration and Latino immigration, examining tensions and alliances that emerged between African Americans and other groups. Exploring the challenges of residential segregation and deindustrialization, later sections tackle such topics as the real estate industry's discriminatory practices, the movement of middle-class blacks to the suburbs, and the influence of black urban activists on national employment and social welfare policies. Another group of contributors examines these themes through the lens of gender, chronicling deindustrialization's disproportionate impact on women and women's leading roles in movements for social change. Concluding with a set of essays on black culture and consumption, this volume fully realizes its goal of linking local transformations with the national and global processes that affect urban class and race relations.

Chicago's New Negroes Davarian L. Baldwin,2009-11-30 As early-twentieth-century Chicago swelled with an influx of at least 250,000 new black urban migrants, the city became a center of consumer capitalism, flourishing with professional sports, beauty shops, film production companies, recording studios, and other black cultural and communal institutions. Davarian Baldwin argues that this mass consumer marketplace generated a vibrant intellectual life and planted seeds of political dissent against the dehumanizing effects of white capitalism. Pushing the traditional boundaries of the Harlem Renaissance to new frontiers, Baldwin identifies a fresh model of urban culture rich with politics, ingenuity, and entrepreneurship. Baldwin explores an abundant archive of cultural formations where an array of white observers, black cultural producers, critics, activists, reformers, and black migrant consumers converged in what he terms a marketplace intellectual life. Here the thoughts and lives of Madam C. J. Walker, Oscar Micheaux, Andrew Rube Foster, Elder Lucy Smith, Jack Johnson, and Thomas Dorsey emerge as individual expressions of a much wider spectrum of black political and intellectual possibilities. By placing consumer-based amusements alongside the more formal arenas of church and academe, Baldwin suggests important new directions for both the historical study and the constructive future of ideas and politics in American life.

She thought that nothing could ever break their bond but life had a way of proving her wrong. When hearts are broken and trust is stripped away, will Yesinia and Grayson be able to overcome their obstacles?

Secrets have a way of being revealed in the most unlikely ways and not everyone will walk away unscathed.

The Anti-Black City Jaime Amparo Alves,2018-02-13 An important new ethnographic study of São Paulo's favelas revealing the widespread use of race-based police repression in Brazil While Black Lives Matter still resonates in the United States, the movement has also become a potent rallying call worldwide, with harsh police tactics and repressive state policies often breaking racial lines. In *The Anti-Black City*, Jaime Amparo Alves delves into the dynamics of racial violence in Brazil, where poverty, unemployment, residential segregation, and a biased criminal justice system create urban conditions of racial precarity. The *Anti-Black City* provocatively offers race as a vital new lens through which to view violence and marginalization in the supposedly "raceless" São Paulo. Ironically, in a context in which racial ambiguity makes it difficult to identify who is black and who is white, racialized access to opportunities and violent police tactics establish hard racial boundaries through subjugation and death. Drawing on two years of ethnographic research in prisons and neighborhoods on the periphery of this mega-city, Alves documents the brutality of police tactics and the complexity of responses deployed by black residents, including self-help initiatives, public campaigns against police violence, ruthless gangs, and self-policing of communities. The *Anti-Black City* reveals the violent and racist ideologies that underlie state fantasies of order and urban peace in modern Brazil. Illustrating how "governing through death" has become the dominant means for managing and controlling ethnic populations in the neoliberal state, Alves shows that these tactics only lead to more marginalization, criminality, and violence. Ultimately, Alves's work points to a need for a new approach to an intractable problem: how to govern populations and territories historically seen as "ungovernable."

Race for Profit Keeanga-Yamahtta Taylor,2019-09-03 LONGLISTED FOR THE 2019 NATIONAL BOOK AWARD FINALIST, 2020 PULITZER PRIZE IN HISTORY By the late 1960s and early 1970s, reeling from a wave of urban uprisings, politicians finally worked to end the practice of redlining. Reasoning that the turbulence could be calmed by turning Black city-dwellers into homeowners, they passed the Housing and Urban Development Act of 1968, and set about establishing policies to induce mortgage lenders and the real estate industry to treat Black homebuyers equally. The disaster that ensued revealed that racist exclusion had not been eradicated, but rather transmuted into a new phenomenon of predatory inclusion. *Race for Profit* uncovers how exploitative real estate practices continued well after housing discrimination was banned. The same racist structures and individuals remained intact after redlining's end, and close relationships between regulators and the industry created incentives to ignore improprieties. Meanwhile, new policies meant to encourage low-income homeownership created new methods to exploit Black homeowners. The federal government guaranteed urban mortgages in an attempt to overcome resistance to lending to Black buyers – as if unprofitability, rather than racism, was the cause of housing segregation. Bankers, investors, and real estate agents took advantage of the perverse incentives, targeting the Black women most likely to fail to keep up their home payments and slip into foreclosure, multiplying their profits. As a result, by the end of the 1970s, the nation's first programs to encourage Black homeownership ended with tens of thousands of foreclosures in Black communities across the country. The push to uplift Black homeownership had descended into a goldmine for realtors and mortgage lenders, and a ready-made cudgel for the champions of deregulation to wield against government intervention of any kind. Narrating the story of a sea-change in housing policy and its dire impact on African Americans, *Race for Profit* reveals how the urban core was transformed into a new frontier of cynical extraction.

Places of Their Own Andrew Wiese,2009-04-24 On Melbenan Drive just west of Atlanta, sunlight falls onto a long row of well-kept lawns. Two dozen homes line the street; behind them wooden decks and living-room windows open onto vast woodland properties. Residents returning from their jobs steer SUVs into long driveways and emerge from their automobiles. They walk to the front doors of their houses past sculptured bushes and flowers in bloom. For most people, this cozy image of suburbia does not immediately evoke images of African Americans. But as this pioneering work demonstrates, the suburbs have provided a home to black residents in increasing numbers for the past hundred years—in the last two decades alone, the numbers have nearly doubled to just under twelve million. *Places of Their Own* begins a hundred years ago, painting an austere portrait of the conditions that early black residents found in isolated, poor suburbs. Andrew Wiese insists, however, that they moved there by choice, withstanding racism and poverty through efforts to shape the landscape to their own needs. Turning then to the 1950s, Wiese illuminates key differences between black suburbanization in the North and South. He considers how African Americans in the South bargained for separate areas where they could develop their own neighborhoods, while many of their northern counterparts transgressed racial boundaries, settling in historically white communities. Ultimately, Wiese explores how the civil rights movement emboldened black families to purchase homes in the suburbs with increased vigor, and how the passage of civil rights legislation helped pave the way for today's black middle class. Tracing the precise contours of black migration to the suburbs over the course of the whole last century and across the entire United States, *Places of Their Own* will be a foundational book for anyone interested in the African American experience or the role of race and class in the making of America's suburbs. Winner of the 2005 John G. Cawelti Book Award from the American Culture Association. Winner of the 2005 Award for Best Book in North American Urban History from the Urban History Association.

Beyond the Boundaries of Childhood Crystal Lynn Webster,2021-04-27 For all that is known about the depth and breadth of African American history, we still understand surprisingly little about the lives of African American children, particularly those affected by northern emancipation. But hidden in institutional records, school primers and penmanship books, biographical sketches, and unpublished documents is a rich archive that reveals the social and affective worlds of northern Black children. Drawing evidence from the urban centers of Boston, New York, and Philadelphia, Crystal Webster's innovative research yields a powerful new history of African American childhood before the Civil War. Webster argues that young African Americans were frequently left outside the nineteenth century's emerging constructions of both race and childhood. They were

marginalized in the development of schooling, ignored in debates over child labor, and presumed to lack the inherent innocence ascribed to white children. But Webster shows that Black children nevertheless carved out physical and social space for play, for learning, and for their own aspirations. Reading her sources against the grain, Webster reveals a complex reality for antebellum Black children. Lacking societal status, they nevertheless found meaningful agency as historical actors, making the most of the limited freedoms and possibilities they enjoyed.

The African American Urban Experience J. Trotter,E. Lewis,T. Hunter,2004-03-17 From the early years of the African slave trade to America, blacks have lived and laboured in urban environments. Yet the transformation of rural blacks into a predominantly urban people is a relatively recent phenomenon - only during World War One did African Americans move into cities in large numbers, and only during World War Two did more blacks reside in cities than in the countryside. By the early 1970s, blacks had not only made the transition from rural to urban settings, but were almost evenly distributed between the cities of the North and the West on the one hand and the South on the other. In their quest for full citizenship rights, economic democracy, and release from an oppressive rural past, black southerners turned to urban migration and employment in the nation's industrial sector as a new 'Promised Land' or 'Flight from Egypt'. In order to illuminate these transformations in African American urban life, this book brings together urban history; contemporary social, cultural, and policy research; and comparative perspectives on race, ethnicity, and nationality within and across national boundaries.

Three Girls from Bronzeville Dawn Turner,2022-06-07 The three girls formed an indelible bond: roaming their community in search of hidden treasures for their 'Thing Finder box,' and hiding under the dining room table, eavesdropping as three generations of relatives gossiped and played the numbers. The girls spent countless afternoons together, ice skating in the nearby Lake Meadows apartment complex, swimming in the pool at the Ida B. Wells housing project, and daydreaming of their futures: Dawn a writer, Debra a doctor, Kim a teacher. Then they came to a precipice, a fraught rite of passage for all girls when the dangers and the harsh realities of the world burst the innocent bubble of childhood, when the choices they made could--and would--have devastating consequences. There was a razor thin margin of error--especially for brown girls
