CCTV for Security Professionals Alan Matchett,2002-12-23 CCTV for Security Professionals provides the information necessary to design the ideal CCTV system. The chapters are stand-alone sources of information on their subjects and are presented in logical sequence to guide the reader from basic principles to more complex for a complete system understanding. In his straight-forward and informative text, Alan Matchett approaches the camera systems from the user's point of view, providing the security manager with the knowledge to discuss the system, its desired features, and the areas of design concern within the context of an organization's business model. This can prove to be invaluable when evaluating an existing system, the use and components of a given system, or in evaluating a system design proposed by a vendor. Installers and service personnel will benefit from the functions and possibilities that are available with the various components and by gaining an understanding of their customers' needs. Newer technicians will learn how to set up the system properly, and can familiarize themselves with the technologies that go into a CCTV system. Security equipment sales personnel will also gain a better knowledge of the customer's needs as well as learn to determine exactly what questions they should be asking the customer and what the customer's responses mean. In this manner, the book will offer invaluable tips to ensure customers get exactly what they expect in a system. \* Provides a detailed explanation of CCTV components and the technology behind analog and digital CCTV systems. \* Establishes a common language for security professionals, CCTV system designers and sales personnel to use as a basis for system design. \* Provides a clear explanation of the design process and design principles.

*CCTV Surveillance* Gerard Meurant,2013-10-22 A complete reference on CCTV technology Gives practical advice on the proper uses of CCTV to best protect against crime Contains more than 100 photos of the most modern equipment available.

**Science Set Free** Rupert Sheldrake,2013-09-03 The bestselling author of *Dogs That Know When Their Owners Are Coming Home* offers an intriguing new assessment of modern day science that will radically change the way we view what is possible. In *Science Set Free* (originally published to acclaim in the UK as *The Science Delusion*), Dr. Rupert Sheldrake, one of the world's most innovative scientists, shows the ways in which science is being constricted by assumptions that have, over the years, hardened into dogmas. Such dogmas are not only limiting, but dangerous for the future of humanity. According to these principles, all of reality is material or physical; the world is a machine, made up of inanimate matter; nature is purposeless; consciousness is nothing but the physical activity of the brain; free will is an illusion; God exists only as an idea in human minds, imprisoned within our skulls. But should science be a belief-system, or a method of enquiry? Sheldrake shows that the materialist ideology is moribund; under its sway, increasingly expensive research is reaping diminishing returns while societies around the world are paying the price. In the skeptical spirit of true science, Sheldrake turns the ten fundamental dogmas of materialism into exciting questions, and shows how all of them open up startling new possibilities for discovery. *Science Set Free* will radically change your view of what is real and what is possible.

Journalism and Free Speech John Steel,2013-06-17 Journalism and Free Speech brings together for the first time an historical and theoretical exploration of journalism and its relationship with the idea of free speech. Though freedom of the press is widely regarded as an essential ingredient to democratic societies, the relationship between the idea of freedom of speech and the practice of press freedom is one that is generally taken for

granted. Censorship, in general terms is an anathema. This book explores the philosophical and historical development of free speech and critically examines the ways in which it relates to freedom of the press in practice. The main contention of the book is that the actualisation of press freedom should be seen as encompassing modes of censorship which place pressure upon the principled connection between journalism and freedom of speech. Topics covered include: The Philosophy of Free Speech Journalism and Free Speech Press Freedom and the Democratic Imperative New Media and the Global Public Sphere Regulating Journalism Privacy and Defamation National Security and Insecurity Ownership News, Language Culture and Censorship This book introduces students to a wide range of issues centred around freedom of speech, press freedom and censorship, providing an accessible text for courses on journalism and mass media--

**Media in China** Stephanie Hemelryk Donald, Yin Hong, Michael Keane, 2014-02-04 Multinational media companies increasingly look to China as a highly important market for the future, but with what degree of confidence should they do so? Media in China is about a new kind of revolution in China - a revolution in which rapidly commercializing media industries confront slow-changing power relations between political, social and economic spheres. This interdisciplinary collection draws on the expertise of industry professionals, academic experts and cultural critics. It offers a variety of perspectives on audio-visual industries in the world's largest media market. In particular, the contributors examine television, film, music, commercial and political advertising, and new media such as the internet and multimedia. These essays explore evolving audience demographics, new patterns of media reception in regional centres, and the gradual internationalization of media content and foreign investment in China's broadcasting industries. This book will of use to students and professionals involved in media and communication, as well as anyone interested in contemporary China.

**Free Thoughts About Captive Medicine** Thomas Doctor, 2013-10-02 Everyone, wherever he or she lives, is affected by the health care system and medicine. Have you ever thought how the decisions made by politicians affect you? How they may, one day, change your life? There is no such thing as freedom without free medicine. There is an increasing desire for political control in our hospitals. This limits our freedom, and without our knowing it, will come to change our lives. Hippocrates was a physician in Ancient Greece's Classical period who stood for freedom and patients rights in medicine. By defending him, we are defending ourselves. By becoming aware of the issues we face in today's medicine, we are enabling ourselves to guard and stand up for our own freedom. This book explores those key problems and offers solutions for how to overcome them.

**Reduced Visibility Due to Fog on the Highway** Frank D. Shepard, 1996 This synthesis will be of interest to traffic and safety engineers; highway and bridge designers; police, fire, and emergency personnel; toll authorities; and other officials concerned with roadway safety operations. It describes the forecasting and detection of fog, as well as countermeasures that are used by state and local transportation agencies to dissipate fog and to warn motorists during reduced visibility conditions. The presence of fog has often resulted in serious collisions due to reduced visibility. This publication of the Transportation Research Board presents a generalized background on the causes of fog, fog forecasting and detection methods, and how fog affects the roadway and the driver. The various countermeasures practiced by transportation agencies that are described herein range from techniques to dissipate fog to a variety of warning systems to alert drivers to adverse conditions. The National Transportation Safety Board (NTSB) has held hearings and made recommendations for fog countermeasures, which are described in this synthesis.

**Two Billion Eyes** Ying Zhu, 2010-05-04 "The definitive work on Chinese television . . . A pioneering picture of CCTV and its crucial role in the contemporary Chinese political economy" (Robert W. McChesney, author of *Corporate Media and the Threat to Democracy*). As China navigates the murky waters of a "third way" with liberal economic policies under a strict political regime, the surprising battleground for China's future emerges in the country's highest rated television network—China Central Television, or CCTV. With 16 internationally broadcast channels and over 1.2 billion viewers, CCTV is a powerhouse in conveying Chinese news and entertainment. The hybrid nature of the network has also transformed it into an unexpected site of discourse in a country that has little official space for negotiation. While CCTV programming is state sponsored—and censored—the popularity and profit of the station are determined by the people. And as the Chinese Communist Party seeks to exert its own voice on domestic and international affairs, the prospect of finding an amenable audience becomes increasingly paramount. Through a series of interviews with a fascinating cast of power players including a director of a special topic program that incited the 1989 student movement, current and past presidents of CCTV, and producers at the frontline of the network's rapidly evolving role in Chinese culture, celebrated media analyst Ying Zhu unlocks a doorway to political power that has long been shrouded in mystery. "An indispensable guide to the Chinese media landscape." —The New Inquiry "Up until *Two Billion Eyes*, the view of Chinese media has often been limited . . . Ying Zhu expands the periphery of our vision." —Los Angeles Review of Books

**Communication and Networking** Dominik Slezak, Thanos Vasilakos, MingChu Li, Kouichi Sakurai, 2009-12-01 As future generation information technology (FGIT) becomes specialized and fragmented, it is easy to lose sight

that many topics in FGIT have common threads and, because of this, advances in one discipline may be transmitted to others. Presentation of recent results obtained in different disciplines encourages this interchange for the advancement of FGIT as a whole. Of particular interest are hybrid solutions that combine ideas taken from multiple disciplines in order to achieve something more significant than the sum of the individual parts. Through such hybrid philosophy, a new principle can be discovered, which has the propensity to propagate throughout multifaceted disciplines. FGIT 2009 was the first mega-conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple events related to particular disciplines of IT, conducted by separate scientific committees, but coordinated in order to expose the most important contributions. It included the following international conferences: Advanced Software Engineering and Its Applications (ASEA), Bio-Science and Bio-Technology (BSBT), Control and Automation (CA), Database Theory and Application (DTA), Disaster Recovery and Business Continuity (DRBC; published independently), Future Generation Communication and Networking (FGCN) that was combined with Advanced Communication and Networking (ACN), Grid and Distributed Computing (GDC), Multimedia, Computer Graphics and Broadcasting (MulGraB), Security Technology (SecTech), Signal Processing, Image Processing and Pattern Recognition (SIP), and e-Service, Science and Technology (UNESST).
