Mobile Technologies for Every Library Ann Whitney Gleason,2015-03-19 If you are wondering what mobile technology adoption means for your library or how to get started, Mobile Technologies for Every Library will answer your questions! Sherlock Holmes for the 21st Century Lynnette Porter,2012-08-08 The 21st century is a good time to be Sherlock Holmes. He stars in the Guy Ritchie films, with Robert Downey, Jr.; an internationally popular BBC television series featuring Benedict Cumberbatch; a novel sanctioned by the Arthur Conan Doyle Estate; and dozens of additional novels and short stories, including two by Neil Gaiman. Add to this the videogames, comic books, and

fan-created works, plus a potent Internet and social media presence. Holmes' London has become a prime destination for cinematic tourists. The evidence is clearly laid out in this collection of 14 new essays: Holmes and Watson are more popular than ever. The detective has been portrayed as hero, and antihero. He's tech savvy, and scientifically detached—even psychologically aberrant. He has been romantically linked to The Woman and bromantically to Watson. Whether Victorian or modern, he continues to fascinate. These essays explain why he is destined to be with us for years to come. Instructors considering this book for use in a course may request an examination copy here.

Specialized Knowledge Mediation Ekaterina Isaeva,2022-03-11 This book provides an integrated approach to cognitive-linguistic mediation, with aims toward the efficiency of knowledge transfer and acquisition. Problems are approached through the prism of cognitive modelling, and mapped to such fields as intercultural and interdisciplinary communication, and second language teaching. The novelty lies in the synergies between linguistics, cognitive science, artificial intelligence, culture, and industry. These fields come together through ontological and metaphorical modelling and the attempts to automate such. This text provides a theoretical background for research on mediation, covering cognitive and communicative perspectives, metaphoricity of terms, and the ontologization of human knowledge. It includes detailed descriptions of methods for different types of cognitive modelling and is intended for students and researchers concerned with terminology, cognitive linguistics, applied linguistics, pragmatics, computational linguistics, literature studies, morphology, syntaxis, and semantics.
