Facebook Nation Newton Lee,2022-02-02 This book explores total information awareness empowered by social media. At the FBI Citizens Academy in February 2021, I asked the FBI about the January 6 Capitol riot organized on social media that led to the unprecedented ban of a sitting U.S. President by all major social networks. In March 2021, Facebook CEO Mark Zuckerberg, Google CEO Sundar Pichai, and Twitter CEO Jack Dorsey appeared before Congress to face criticism about their handling of misinformation and online extremism that culminated in the storming of Capitol Hill. With more than three billion monthly active users, Facebook family of apps is by far the world's largest social network. Facebook as a nation is bigger than the top three most populous countries in the world: China, India, and the United States. Social media has enabled its users to inform and misinform the public, to appease and disrupt Wall Street, to mitigate and exacerbate the COVID-19 pandemic, and to unite and divide a country. Mark Zuckerberg once said, We exist at the intersection of technology and social issues. He should have heeded his own words. In October 2021, former Facebook manager-turned-whistleblower Frances Haugen testified at the U.S. Senate that Facebook's products harm children, stoke division, and weaken our democracy. This book offers discourse and practical advice on information and misinformation, cybersecurity and privacy issues, cryptocurrency and business intelligence, social media marketing and caveats, e-government and e-activism, as well as the pros and cons of total information awareness including the Edward Snowden

leaks. Highly recommended. - T. D. Richardson, Choice Magazine A great book for social media experts. - Will M., AdWeek Parents in particular would be well advised to make this book compulsory reading for their teenage children... - David B. Henderson, ACM Computing Reviews

Building Mobile Apps at Scale Gergely Orosz, 2021-04-06 While there is a lot of appreciation for

backend and distributed systems challenges, there tends to be less empathy for why mobile development is hard when done at scale. This book collects challenges engineers face when building iOS and Android apps at scale, and common ways to tackle these. By scale, we mean having numbers of users in the millions and being built by large engineering teams. For mobile engineers, this book is a blueprint for modern app engineering approaches. For non-mobile engineers and managers, it is a resource with which to build empathy and appreciation for the complexity of world-class mobile engineering. The book covers iOS and Android mobile app challenges on these dimensions: Challenges due to the unique nature of mobile applications compared to the web, and to the backend. App complexity challenges. How do you deal with increasingly complicated navigation patterns? What about non-deterministic event combinations? How do you localize across several languages, and how do you scale your automated and manual tests? Challenges due to large engineering teams. The larger the mobile team, the more challenging it becomes to ensure a consistent architecture. If your company builds multiple apps, how do you balance not rewriting everything from scratch while moving at a fast pace, over waiting on centralized teams? Cross-platform approaches. The tooling to build mobile apps keeps changing. New languages, frameworks, and approaches that all promise to address the pain points of mobile engineering keep appearing. But which approach should you choose? Flutter, React Native, Cordova? Native apps? Reuse business logic written in Kotlin, C#, C++ or other languages? What engineering approaches do world-class mobile engineering teams choose in non-functional aspects like code quality, compliance, privacy, compliance, or with experimentation, performance, or app size?

Person-Focused Health Care Management Donald L. Zimmerman, PhD, Denise G. Osborn-Harrison, 2016-12-15 Moves beyond traditional definitions of patient-centered care to improve the experience of a real person as patient How might the entire system for producing, delivering, and paying for health care be changed so that real people fare better than they currently do? This text applies person-focused principles to health management decision-making aimed at improving the personal experience of care within health care institutions to improve outcomes and cost savings. Written and edited by distinguished educators and researchers with decades of health care policy experience, the text examines how health care managers can initiate and direct the process of system transformation by understanding and using a greater person-focus in their decision-making.

It encompasses the key domains of management competencies defined by the AUPHA, CAHME, and NCHL. The text brings together experts across a variety of health care management disciplines to examine how managerial decisions affect the personal experience of patient care. It is based on observations that many of the current problems facing health care managers are caused by lack of attention to what happens when real people are transformed into patients and treated routinely by the US health care system. Moving beyond traditional definitions of patient-centered care, the book explores how our entire system for producing, delivering, and paying for care can be changed so that the internal experience of people receiving care is a positive one. The book helps to develop specific rules for improving the experience of care through better managerial decision-making. Case studies with discussion questions facilitate creative problem solving based on sound decision-making. Also included are extensive links to online content along with an Instructor's Manual, PowerPoint slides and more. Key Features: Describes how the person-focused model leads to better outcomes Discusses the impact of management decisions on the personal experience of clinical care Addresses the personal and clinical problems created through our current system's standard health care delivery and financing Applies basic principles of management decision-making to key operational issues to improve the personal experience of care Fulfills key learning competencies defined by AUPHA, CAHME, and NCHL
