Guide on digital agricultural extension and advisory services Food and Agriculture Organization of the United Nations,2023-03-30 Digital agricultural extension and advisory services (AEAS) have a great potential to enhance accessibility, delivery, transparency, scope and impacts of information and services for smallholder farmers. However, this potential is often unfully harnessed and the benefits of digital AEAS unequally distributed due to an evident, widening digital divide between rural and urban areas, gender, and different social groups both within and among regions. Due to low-level e-literacy and digital skills, particularly smallholder farmers in rural areas in developing countries have limited access to and utilization of digital AEAS. Considering the above-mentioned benefits of digital AEAS, their poor uptake by smallholder farmers, and the importance of digital empowerment of smallholder farmers in particular, this guide, targeting smallholder farmers in need of digital AEAS as its principal users, provides a set of tools to enhance their digital skills in terms of basic knowledge and skills on using digital tools, methods of access to digital AEAS, methods of access to e-commerce, and capacity building.

Avalanche of Leads Dr. Elaine Williams-Morgan,2023-09-27 In this informative book, Dr. Elaine Williams-Morgan explores social media, one of the greatest innovations of our time, chronicling its development from the early beginnings to the current time when there are over two hundred social networking platforms. The book highlights the disruptive character of social media and its commonalities with other disruptive technologies. The disruption is being experienced across a range of industries, including music, advertising, and the traditional media, as journalists, educators, and businesses take advantage of the critical mass that this innovation delivers. It outlines the avalanche of social media platforms available to users, led by Facebook, YouTube, and WhatsApp, and provides a roadmap for the development of an appropriate social media policy and strategy for navigating the digital era. The power inherent in the adoption of social networking tools to reduce marketing and promotional costs, facilitate efficiency and effectiveness in communication, and drive collaboration and innovation is underscored. These trends predict an increase in the number of social networking platforms and a broadening of the scope of these platforms. There is also an indication that as Internet access expands globally, a higher percentage of the global population will go online using their mobile devices and, specifically, for social networking. These developments, Avalanche of Leads emphasizes, make it imperative for individuals and businesses alike to take the steps necessary to develop a winning social media strategy that employs tools that have become important for life and business. A failure in this regard could mean being left out of the social media ecosystem, an environment rich with opportunities to

thrive!

Studies in Media and Ideological Representation of Herders / Farmers Conflict in Nigeria Gbenga Ibileye, 2023-05-05 This book features articles from a spectrum of perspectives that are considered of direct consequence for the discourse on the conflict between herders and farmers in Nigeria. These perspectives include those from the broad ambit of social sciences and, specifically, views from history and political science in order to provide a broad historical ground for the understanding of the century-old fissures between ethnic nationalities, which have burgeoned into contemporary conflicts and violence.

INTRODUCTION TO INFORMATION TECHNOLOGY RAJARAMAN, V., 2018-01-01 his textbook is designed to teach a first course in Information Technology (IT) to all undergraduate students. In view of the all-pervasive nature of IT in today's world a decision has been taken by many universities to introduce IT as a compulsory core course to all Bachelor's degree students regardless of their specialisation. This book is intended for such a course. The approach taken in this book is to emphasize the fundamental "Science" of Information Technology rather than a cook book of skills. Skills can be learnt easily by practice with a computer and by using instructions given in simple web lessons that have been cited in the References. The book defines Information Technology as the technology that is used to acquire, store, organize, process and disseminate processed data, namely, information. The unique aspect of the book is to examine processing all types of data: numbers, text, images, audio and video data. As IT is a rapidly changing field, we have taken the approach to emphasize reasonably stable, fundamental concepts on which the technology is built. A unique feature of the book is the discussion of topics such as image, audio and video compression technologies from first principles. We have also described the latest technologies such as 'e-wallets' and 'cloud computing'. The book is suitable for all Bachelor's degree students in Science, Arts, Computer Applications, and Commerce. It is also useful for general reading to learn about IT and its latest trends. Those who are curious to know, the principles used to design jpg, mp3 and mpeg4 compression, the image formats-bmp, tiff, gif, png, and jpg, search engines, payment systems such as BHIM and Paytm, and cloud computing, to mention a few of the technologies discussed, will find this book useful. **KEY FEATURES** • Provides comprehensive coverage of all basic concepts of IT from first principles • Explains acquisition, compression, storage, organization, processing and dis-semination of multimedia data • Simple explanation of mp3, jpg, and mpeg4 compression • Explains how computer networks and the Internet work and their applications • Covers business data processing, World Wide Web, e-commerce, and IT laws • Discusses social impacts of IT and career opportunities in IT and IT enabled services • Designed for self-study with every chapter starting with learning objectives and concluding with a comprehensive summary and a large number of exercises.

Transnational Communities in the Smartphone Age Dae Young Kim, 2017-12-20 Transnational Communities in the Smartphone Age: The Korean Community in the Nation's Capital examines the durable ties immigrants maintain with the home country and focuses in particular on their transnational cultural activities. In light of changing technologies, especially information and communication technologies (ICTs), which enable a faster, easier, and greater social and cultural engagement with the home country, this book argues that middle-class immigrants, such as Korean immigrants in the Washington-Baltimore region, sustain more regular connections with the homeland through cultural, rather than economic or political, transnational activities. Though not as conspicuous and contentious as other forms of transnational participation, cultural transnational activities may prove to be more lasting and also serve as a backbone for maintaining longer-lasting connections and identities with the home country.

XaaS: Everything-as-a-service – The Lean And Agile Approach To Business Growth Shantanu Bhattacharya,Lipika Bhattacharya,2021-10-13 XaaS: Everything-as-a-Service: The Lean and Agile Approach to Business Growth takes the reader into the bold new world of pay-per-use for a product or service. From the perspective of the customer, the servitization model yields multiple benefits: the consumer can try out the product/service at a relatively low cost, the risk is mitigated, capital expenses can be converted into operating expenses, it is not needed to forecast how often the product/service is used, and only parts of the product/service needed can be used. Similarly, a provider can benefit by having a larger market coverage, steadier stream of revenues, upgrades as and when needed, sharing of fixed assets across consumers, practicing of value-based pricing, and unbundling or bundling utility for consumers using appropriate pricing techniques. However, this 'nanoization' of products/services is tricky, and has to be designed carefully. This book provides a set of recipes to providers to adopt the XaaS model by changing the provider's mindset: dividing the product/service forces the provider to take a value-driven approach to his product/service, and consequently, eliminate all non-value added activities. The requirements of the XaaS model serve both as an objective to the innovation and internal processes of the provider, and as guide to understanding the customer's needs. The book also covers data acquisition, data analysis and synthesis, and data application needs of the XaaS model, with simple examples and case studies from the business world of firms that achieve these objectives successfully.
