### **NMR · 3D Analysis · Photopolymerization**

,2004-08-19 This series presents critical reviews of the present and future trends in polymer and biopolymer science including chemistry, physical chemistry, physics and materials science. It is addressed to all scientists at universities and in industry who wish to keep abreast of advances in the topics covered. Impact Factor Ranking: Always number one in Polymer Science. **Next-Generation Video Coding and Streaming** Benny Bing,2015-10-01 Reviews the new High Efficiency Video Coding (HEVC) standard and advancements in adaptive streaming technologies for use in broadband networks and the Internet This book describes next-generation video coding and streaming technologies with a comparative assessment of the strengths and weaknesses.

Specific emphasis is placed on the H.265/HEVC video coding standard and adaptive bit rate video streaming. In addition to evaluating the impact of different types of video content and powerful feature sets on HEVC coding efficiency, the text provides an in-depth study on the practical performance of popular adaptive streaming platforms and useful tips for streaming optimization. Readers will learn of new over-the-top (OTT) online TV advancements, the direction of the broadband telecommunications industry, and the latest developments that will help keep implementation costs down and maximize return on infrastructure investment. Reviews the emerging High Efficiency Video Coding (HEVC) standard and compares its coding performance with the MPEG-4 Advanced Video Coding (AVC) and MPEG-2 standards Provides invaluable insights into the intra and inter coding efficiencies of HEVC, such as the impact of hierarchical block partitioning and new prediction modes Evaluates the performance of the Apple and Microsoft adaptive streaming platforms and presents innovative techniques related to aggregate stream bandwidth prediction, duplicate chunk Includes end-of-chapter homework problems and access to instructor slides Next-Generation Video Coding and Streaming is written for students, researchers, and industry professionals working in the field of video communications. Benny Bing has worked in academia for over 20 years. He has published over 80 research papers and 12 books, and has 6 video patents licensed to industry. He has served as a technical editor for several IEEE journals and an IEEE Communications

Society Distinguished lecturer. He also received the National Association of Broadcasters (NAB) Technology Innovation Award for demonstrations of advanced media technologies.

Physics of Relativistic Objects in Compact Binaries: from Birth to Coalescence Monica Colpi, Piergiorgio Casella, Vittorio Gorini, Ugo Moschella, Andrea Possenti, 2009-03-28 A very attractive feature of the theory of general relativity is that it is a perfect example of a "falsifiable" theory: not a tunable parameter is present in the theory and therefore even a single experiment incompatible with a prediction of the theory would immediately lead to its inevitable rejection, at least in the physical regime of application of the aforementioned experiment. This fact provides additional scientific value to one of the boldest and most fascinating achievements of the human intellect ever, and motivates a wealth of efforts in designing and implementing tests aimed at the falsification of the theory. The first historical test on the theory has been the deflection of light grazing the solar surface (Eddington 1919): the compatibility of the theory with this first experiment together with its ability to explain the magnitude of the perihelion advance of Mercury contributed strongly to boost acceptance and worldwide knowledge. However, technological limitations prevented physicists from setting up more constraining tests for several decades after the formulation of the theory. In fact, a relevant problem with experimental general relativity is

that the predicted deviations from the Newtonian theory of gravity are very small when the experiments are carried out in terrestrial laboratories.

**3D Visual Communications** Guan-Ming Su, Yu-chi Lai, Andres Kwasinski, Haohong Wang, 2012-12-12  
Provides coverage of the major theories and technologies involved in the lifecycle of 3D video content delivery. Presenting the technologies used in end-to-end 3D video communication systems, this reference covers 3D graphics and video coding, content creation and display, and communications and networking. It covers the full range of key areas from the fundamentals of 3D visual representation to the latest 3D video coding techniques, relevant communication infrastructure and networks to the 3D quality of experience. The book is structured to logically lead readers through the topic, starting with generic and fundamental information, continuing with a detailed section of different visualisation techniques before concluding with an extensive view of 3D mobile communication systems and trends. The authors give most focus to four important areas: 3D video coding and communications; 3D graphics/gaming and mobile communications; end-to-end 3D ecosystem (including 3D display, 3D player, networking facility and 3D quality issues), and future communications and networks advances for emerging 3D experience. Presents the theory and key concepts behind the latest 3D visual coding framework, standards, and corresponding quality assessment. Provides fundamental material which forms the basis for

future research on enhancing the performance of 3D visual communications over current and future wireless networks Covers important topics including: 3D video coding and communications; 3D graphics/gaming and mobile communications; end-to-end 3D ecosystem; and future communications and networks advances for emerging 3D experience Essential reading for engineers involved in the research, design and development of 3D visual coding and 3D visual transmission systems and technologies, as well as academic and industrial researchers.

**Programming the Mobile Web** Maximiliano

Firtman, 2013-03-15 The market for mobile apps continues to evolve at a breakneck pace, as tablets join the parade of smartphones and feature phones. If you're an experienced web developer, this second edition of this popular book shows you how to build HTML5 and CSS3-based apps that access geolocation, accelerometer, multi touch screens and other features in these mobile devices. You'll learn how to build a standard app core that you can extend to work with specific devices. You'll also discover how to deal with platform variations, browsers, native web platforms, HTML5 compatibility, design patterns for mobile development, and other issues. Learn how to use your existing web skills to move into mobile development Discover the particulars and pitfalls of building mobile apps with HTML5, CSS, and other standard web tools Create effective user interfaces in the mobile environment for touch and non-touch devices Understand variations among iOS, Android, Windows Phone, BlackBerry, and other mobile platforms Bypass the browser to create full screen and native web apps, e-books and Apache Cordova (PhoneGap) applications Build apps for the App Store, Google Play Store, Windows Marketplace, App World, and other online retailers
