A History of Fake Things on the Internet Walter Scheirer, 2023-12-05 As all aspects of our social and informational lives increasingly migrate online, the line between what is real and what is digitally fabricated grows ever thinner—and that fake content has undeniable real-world consequences. A History of Fake Things on the Internet takes the long view of how advances in technology brought us to the point where faked texts, images, and video content are nearly indistinguishable from what is authentic or true. Computer scientist Walter J. Scheirer takes a deep dive into the origins of fake news, conspiracy theories, reports of the paranormal, and other deviations from reality that have become part of mainstream culture, from image manipulation in the nineteenth-century darkroom to the literary stylings of large language models like ChatGPT. Scheirer investigates the origins of Internet fakes, from early hoaxes that traversed the globe via Bulletin Board Systems (BBSs), USENET, and a new messaging technology called email, to today's hyperrealistic, AI-generated Deepfakes. An expert in machine learning and recognition, Scheirer breaks down the technical advances that made new developments in digital deception possible, and shares behind-the-screens details of early Internet-era pranks that have become touchstones of hacker lore. His story introduces us to the visionaries and mischief-makers who first deployed digital fakery and continue to influence how digital manipulation works—and doesn't—today: computer hackers, digital artists, media forensics specialists, and AI researchers. Ultimately, Scheirer argues that problems associated with fake content are not intrinsic properties of the content itself, but rather stem from human behavior, demonstrating our capacity for both creativity and destruction.

People vs. Donald Trump Mark Pomerantz, 2023-02-07 A fascinating inside account of the attempt to prosecute former US president Donald Trump. Mark Pomerantz was a retired lawyer living a calm suburban life when he accepted an offer to join the staff of the district attorney of New York County in February 2021. His brief: to work on the investigation of former president Donald Trump and the Trump Organisation. Over the next year, Pomerantz interviewed potential witnesses, scrutinised financial records and learned everything he could about Trump’s business practices. He finally gathered enough evidence to support the view—held by many of his colleagues on the case—that Trump should be indicted for a number of financial crimes. But that indictment never happened. This book explains why. In *People vs. Donald Trump*, Pomerantz tells the story of his unprecedented investigation, why he and his colleague Carey Dunne resigned in protest when Manhattan’s district attorney refused to act, and why he believes Donald Trump should be prosecuted. He draws from a lifetime of legal experience to tell a devastating and frequently entertaining story of how prosecutors think, how criminals act, and how the American justice system works—and sometimes doesn’t work. It is a cautionary tale that explores how Trump manages to dance between the raindrops of accountability, and how others might bring him to justice.

Calling Bullshit Carl T. Bergstrom,Jevin D. West,2021-04-20 Bullshit isn't what it used to be. Now, two science professors give us the tools to dismantle misinformation and think clearly in a world of fake news and bad data. "A modern classic . . . a straight-talking survival guide to the mean streets of a dying democracy and a global pandemic."—Wired Misinformation, disinformation, and fake news abound and it's increasingly difficult to know what's true. Our media environment has become hyperpartisan. Science is conducted by press release. Startup culture elevates bullshit to high art. We are fairly well equipped to spot the sort of old-school bullshit that is based in fancy rhetoric and weasel words, but most of us don't feel qualified to challenge the avalanche of new-school bullshit presented in the language of math, science, or statistics. In *Calling Bullshit*, Professors Carl Bergstrom and Jevin West give us a set of powerful tools to cut through the most intimidating data. You don't need a lot of technical expertise to call out problems with data. Are the numbers or results too good or too dramatic to be true? Is the claim comparing like with like? Is it confirming your personal bias? Drawing on a deep well of expertise in statistics and computational biology, Bergstrom and West exuberantly unpack examples of selection bias and muddled data visualization, distinguish between correlation and causation, and examine the susceptibility of science to modern bullshit. We have always needed people who call bullshit when necessary, whether within a circle of friends, a community of scholars, or the citizenry of a nation. Now that bullshit has evolved, we need to relearn the art of skepticism.
