American Kingpin Nick Bilton,2018-05-29 NEW YORK TIMES BESTSELLER. The unbelievable true story of the man who built a billion-dollar online drug empire from his bedroom—and almost got away with it In 2011, a twenty-six-year-old libertarian programmer named Ross Ulbricht launched the ultimate free market: the Silk Road, a clandestine Web site hosted on the Dark Web where anyone could trade anything—drugs, hacking software, forged passports, counterfeit cash, poisons—free of the government’s watchful eye. It wasn’t long before the media got wind of the new Web site where anyone—not just teenagers and weed dealers but terrorists and black hat hackers—could buy and sell contraband detection-free. Spurred by a public outcry, the federal government launched an epic two-year manhunt for the site’s elusive proprietor, with no leads, no witnesses, and no clear jurisdiction. All the investigators knew was that whoever was running the site called himself the Dread Pirate Roberts. The Silk Road quickly ballooned into \$1.2 billion enterprise, and Ross embraced his new role as kingpin. He enlisted a loyal crew of allies in high and low places, all as addicted to the danger and thrill of running an illegal marketplace as their customers were to the heroin they sold. Through his network he got wind of the target on his back and took drastic steps to protect himself—including ordering a hit on a former employee. As Ross made plans to disappear forever, the Feds raced against the clock to catch a man they weren’t sure even existed, searching for a needle in the haystack of the global Internet. Drawing on exclusive access to key players and two billion digital words and images Ross left behind, Vanity Fair correspondent and New York Times bestselling author Nick Bilton offers a tale filled with twists and turns, lucky breaks and unbelievable close calls. It’s a story of the boy next door’s ambition gone criminal, spurred on by the clash between the new world of libertarian-leaning, anonymous, decentralized Web advocates and the old world of government control, order, and the rule of law. Filled with unforgettable characters and capped by an astonishing climax, American Kingpin might be dismissed as too outrageous for fiction. But it’s all too real.

Alas, Babylon Pat Frank,2013-06-04 “An extraordinary real picture of human beings numbed by catastrophe but still driven by the unconquerable determination of living creatures to keep on being alive.” –The New Yorker “Alas, Babylon.” Those fateful words heralded the end. When the unthinkable nightmare of nuclear holocaust ravaged the United States, it was instant death for tens of millions of people; for survivors, it was a nightmare of hunger, sickness, and brutality. Overnight, a thousand years of civilization were stripped away. But for one small Florida town, miraculously spared against all the odds, the struggle was only just beginning, as the isolated survivors—men and women of all ages and races—found the courage to come together and confront the harrowing darkness. This classic apocalyptic novel by Pat Frank, first published in 1959 at the height of the Cold War, includes an introduction by award-winning science fiction writer and scientist David Brin.

The Space Shuttle Decision T. A. Heppenheimer,1999 Long before the NASA was the throes of planning for the Apollo voyages to the Moon, many people had seen the need for a vehicle that could access space routinely. The idea of a reusable space shuttle dates at least to the theoretical rocketplane studies of the 1930s, but by the 1950s it had become an integral part of a master plan for space exploration. The goal of efficient access to space in a heavy-lift booster prompted NASA's commitment to the space shuttle as the vehicle to continue human space flight. By the mid-1960s, NASA engineers concluded that the necessary technology was within reach to enable the creation of a reusable winged space vehicle that could haul scientific and applications satellites of all types into orbit for all users. President Richard M. Nixon approved the effort to build the shuttle in 1972 and the first orbital flight took place in 1981. Although the development program was risky, a talented group of scientists and engineers worked to create this unique space vehicle and their efforts were largely successful. Since 1981, the various orbiters -Atlantis, Columbia, Discovery, Endeavour, and Challenger (lost in 1986 during the only Space Shuttle accident)- have made early 100 flights into space. Through 1998, the space shuttle has carried more than 800 major scientific and technological payloads into orbit and its astronaut crews have conducted more than 50 extravehicular activities, including repairing satellites and the initial building of the International Space Station. The shuttle remains the only vehicle in the world with the dual ability to deliver and return large payloads to and from orbit, and is also the world's most reliable launch system. The design, now almost three decades old, is still state-of-the-art in many areas, including computerized flight control, airframe design, electrical power systems, thermal protection system, and main engines. This significant new study of the decision to build the space shuttle explains the shuttle's origin and early development. In addition to internal NASA discussions, this work details the debates in the late 1960s and early 1970s among policymakers in Congress, the Air Force, and the Office of Management and Budget over the roles and technical designs of the shuttle. Examining the interplay of these organizations with sometimes conflicting goals, the author not only explains how the world's premier space launch vehicle came into being, but also how politics can interact with science, technology, national security, and economics in national government.

U.S. Marines In Vietnam: The Landing And The Buildup, 1965 Dr. Jack Shulimson,Maj. Charles M. Johnson,2016-08-09 This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than its predecessor volume, U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era.

Logical Reasoning Bradley Harris Dowden,1993 This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Raising Cain Dan Kindlon, Ph.D.,Michael Thompson, PhD,2009-08-05 The stunning success of *Reviving Ophelia*, Mary Pipher's landmark book, showed a true and pressing need to address the emotional lives of girls. Now, finally, here is the book that answers our equally timely and critical need to understand our boys. In *Raising Cain*, Dan Kindlon, Ph.D., and Michael Thompson, Ph.D., two of the country's leading child psychologists, share what they have learned in more than thirty-five years of combined experience working with boys and their families. They reveal a nation of boys who are hurting—sad, afraid, angry, and silent. Statistics point to an alarming number of young boys at high risk for suicide, alcohol and drug abuse, violence and loneliness. Kindlon and Thompson set out to answer this basic, crucial question: What do boys need that they're not getting? They illuminate the forces that threaten our boys, teaching them to believe that “cool” equals macho strength and stoicism. Cutting through outdated theories of “mother blame,” “boy biology,” and testosterone,” Kindlon and Thompson shed light on the destructive emotional training our boys receive—the emotional miseducation of boys. Through moving case studies and cutting-edge research, *Raising Cain* paints a portrait of boys systematically steered away from their emotional lives by adults and the peer “culture of cruelty”—boys who receive little encouragement to develop qualities such as

compassion, sensitivity, and warmth. The good news is that this doesn't have to happen. There is much we can do to prevent it. Kindlon and Thompson make a compelling case that emotional literacy is the most valuable gift we can offer our sons, urging parents to recognize the price boys pay when we hold them to an impossible standard of manhood. They identify the social and emotional challenges that boys encounter in school and show how parents can help boys cultivate emotional awareness and empathy—giving them the vital connections and support they need to navigate the social pressures of youth. Powerfully written and deeply felt, *Raising Cain* will forever change the way we see our sons and will transform the way we help them to become happy and fulfilled young men.
