Detain and Deport Nancy Hiemstra, 2019 Detention and deportation have become keystones of immigration and border enforcement policies around the world. The United States has built a massive immigration enforcement system that detains and deports more people than any other country. This system is grounded in the assumptions that national borders are territorially fixed and controllable, and that detention and deportation bolster security and deter migration. Nancy Hiemstra's multisited ethnographic research pairs investigation of enforcement practices in the United States with an exploration into conditions migrants face in one country of origin: Ecuador. *Detain and Deport*'s transnational approach reveals how the U.S. immigration enforcement system's chaotic organization and operation distracts from the mismatch between these assumptions and actual outcomes. Hiemstra draws on the experiences of detained and deported migrants, as well as their families and communities in Ecuador, to show convincingly that instead of deterring migrants and improving national security, detention and deportation generate insecurities and forge lasting connections across territorial borders. At the same time, the system's chaos works to curtail rights and maintain detained migrants on a narrow path to deportation. Hiemstra argues that in addition to the racialized ideas of national identity and a fluctuating dependence on immigrant labor that have long propelled U.S. immigration policies, the contemporary emphasis on detention and deportation is fueled by the influence of people and entities that profit from them.

European firms benefit through lower labour costs and access to big new markets in the fields of education and training. At the same time European governments are concerned about jobs disappearing. For the developing world, there is the brightest prospect of new jobs and novel means of education. However, how secure will these new jobs be? Will a more highly educated work force lead to a brain drain?

Open Kimberly Clausing, 2019-03-04 A Financial Times Best Economics Book of the Year A Foreign Affairs Best Book

of the Year “A highly intelligent, fact-based defense of the virtues of an open, competitive economy and society.” –Fareed Zakaria, Global Public Square, CNN “Amid a growing backlash against international economic interdependence, Clausing makes a strong case in favor of foreign trade in goods and services, the cross-border movement of capital, and immigration. This valuable book amounts to a primer on globalization.” –Richard N. Cooper, Foreign Affairs Critics on the Left have long attacked open markets and free trade agreements for exploiting the poor and undermining labor, while those on the Right complain that they unjustly penalize workers back home. Kimberly Clausing takes on both sides in her compelling case that open economies are actually a force for good. Turning to the data to separate substance from spin, she shows how international trade makes countries richer, raises living standards, benefits consumers, and brings nations together, and outlines a progressive agenda to manage globalization more effectively, presenting strategies to equip workers for a modern economy, and establish a better partnership between labor and the business community.

Soda Politics Marion Nestle, 2015-09-07 Sodas are astonishing products. Little more than flavored sugar-water, these drinks cost practically nothing to produce or buy, yet have turned their makers--principally Coca-Cola and PepsiCo--into a multibillion-dollar industry with global recognition, distribution, and political power. Billed as refreshing, tasty, crisp, and the real thing, sodas also happen to be so well established to contribute to poor dental hygiene, higher calorie intake, obesity, and type-2 diabetes that the first line of defense against any of these conditions is to simply stop drinking them. Habitually drinking large volumes of soda not only harms individual health, but also burdens societies with runaway healthcare costs. So how did products containing absurdly inexpensive ingredients become multibillion dollar industries and international brand icons, while also having a devastating impact on public health? In *Soda Politics*, the 2016 James Beard Award for Writing & Literature Winner, Dr. Marion Nestle answers this question by detailing all of the ways that the soft drink industry works overtime to make drinking soda as common and accepted as drinking water, for adults and children. Dr. Nestle, a renowned food and nutrition policy expert and public health advocate, shows how sodas are principally miracles of advertising; Coca-Cola and PepsiCo spend billions of dollars each year to promote their sale to children, minorities, and low-income populations, in developing as well as industrialized nations. And once they have stimulated that demand, they leave no stone unturned to protect profits. That includes lobbying to prevent any measures that would discourage soda sales, strategically donating money to health organizations and researchers who can make the science about sodas appear confusing, and engaging in Corporate Social Responsibility (CSR) activities to create goodwill and silence critics. *Soda Politics* follows the money trail wherever it leads, revealing how hard Big Soda works to sell as much of their products as possible to an increasingly obese world. But *Soda Politics* does more than just diagnose a problem--it encourages readers to help find solutions. From Berkeley to Mexico City and beyond, advocates are successfully countering the relentless marketing, promotion, and political protection of sugary drinks. And their actions are having an impact--for all of the hardball and softball tactics the soft drink industry employs to maintain the status quo, soda consumption has been flat or falling for years. Health advocacy campaigns are now the single greatest threat to soda companies' profits. *Soda Politics* provides readers with the tools they need to keep up pressure on Big Soda in order to build healthier and more sustainable food systems.
