This is the one book that every gardener should have on their bookshelf.

Garden Myths Robert Pavlis, 2017-01-26 Garden Myths examines over 120 horticultural urban legends. Turning wisdom on its head, Robert Pavlis dives deep into traditional garden advice and debunks the myths and misconceptions that abound. He asks critical questions and uses science-based information to understand plants and their environment. Armed with the truth, Robert then turns this knowledge into easy-to-follow advice. - Is fall the best time to clean the garden? - Do bloom boosters work? - Will citronella plants reduce mosquitoes in the garden? - Do pine needles acidify soil? - Should tomatoes be suckered? - Should trees be staked at planting time? - Can burlap keep your trees warm in winter? - Will a pebble tray increase humidity for houseplants? Garden Myths is a must-read for anyone who wants to use environmentally sound practices. This fascinating and informative book will help you understand plants better, reduce unnecessary work, convince you to buy fewer products and help you enjoy gardening more.

Sustainable Landscaping For Dummies Owen E. Cracking the Code to Profit Ryan J. Sciamanna, 2018-01-25 What is Cracking the Code to Profit? Cracking the Code to Profit is the complete, start to finish blueprint for building a REAL BUSINESS in the lawn care and landscaping industry. The author, Ryan Sciamanna, shares all his knowledge on how he went from a solo operator to six crews in three years. Who is the book for? Cracking the Code to Profit is for anyone thinking about starting a lawn care business to companies trying to break through the \$200k to \$300k gross revenue barrier. If you would like to, but are not already, making \$100k per year as the owner of your lawn care company, you will benefit from reading this book. Why Ryan wrote the book: In 2016 Ryan narrowed his lawn care companies service offering down to lawn mowing and lawn treatments only. Prior to that, his company was a full-service lawn and landscape service provider offering all of the typical services including mulching, pruning, cleanups, leaf removals, hardscapes, landscape design and installation, and snow removal. He made the change in his business model to increase profit margins and reduce the amount of time required of him as the owner of the business. Naturally, he needed to find referral partners for his lawn care customers because they still had other lawn and landscape needs his company no longer performed. He contacted several other lawn and landscape business owners in his area and told them he wanted to send them referrals for the work his company no longer performed and only asked they don't 'steal' his customers for the services they were still providing. After shooting off the first several referrals, Ryan quickly realized that a lot of these companies needed help and until they improved their business operations, referring his clients to them was only making him look bad! He has since stopped referring work with the exception of a couple companies that proved they would provide his customers quality work at fair prices and actually be reliable. Ryan says, I think most lawn care business owners started their business just like I did...they enjoyed the work and were good at it, so they said, why not work for myself. In the beginning, it usually goes pretty smooth, but as they add more and more customers and eventually need to hire employees, they get in over their heads. I did the same thing, but quickly educated myself on how to run an actual business and not just be self-employed. He organized all of his knowledge into Cracking the Code to Profit in hopes it will save new business owners years of frustration. Ryan read a similar 'book' before he started his business that his father had bought for him online. It was actually just a word document that someone had written on starting a lawn care business and his dad printed it off for him. It cost his father \$79.95 for that! Ryan still has that 'book' and even though it was overpriced, terrible quality and a lot of the information was not good, he still credits that book towards helping him get his business off the ground. What you can expect from Cracking the Code to Profit - How to Start a Lawn Care Business: The book flows in chronological order from starting your business to your exit strategy. Ryan put every detail he could recall from his own experience. You can see the book chapters in the book preview. After each chapter, action steps are included so you know exactly what you need to do. At the end of the book, you will find the resource section for continued learning and execution. You can expect to have a much better understanding of how to start and grow your lawn care business in a healthy, profitable way. Ryan's contact info is also included in the book. He would love to hear from you after you finish it!

Measuring Landscapes Andre Botequilha Leitao, Joseph Miller, Jack Ahern, Kevin McGarigal, 2012-09-26 This practical handbook bridges the gap between those scientists who

study landscapes and the planners and conservationists who must then decide how best to preserve and build environmentally-sound habitats. Until now, only a small portion of the relevant science has influenced the decision-making arenas where the future of our landscapes is debated and decided. The authors explain specific tools and concepts to measure a landscape's structure, form, and change over time. Metrics studied include patch richness, class area proportion, patch number and density, mean patch size, shape, radius of gyration, contagion, edge contrast, nearest neighbor distance, and proximity. These measures will help planners and conservationists make better land use decisions for the future.

Principal 2.0 Matthew Militello, Jennifer Friend, 2013-03-01 This volume of essays provides insights into educational technology from a diverse set of vantage points. Each chapter provides school leaders with both conceptual insights and practical guides. Moreover, the authors of these insights and guides are eclectic including: current K-12 school educators and students, professors and graduate students of educational technology and educational leadership, and technology industry leaders. Our goal was to provide a thoughtful and thought-provoking set of essays that propels your own work in the world of educational technology forward. The audience for this book includes teachers, school and district leaders, educational technologists, educational policymakers, and higher education faculty. Chapters demonstrate a number of specific uses of advanced technologies in schools, in educational leadership, and in leadership preparatory programs. Chapters are accompanied by screen-captured images and links to multimedia examples that are accessible to readers via the Internet, including digital artifacts of leadership and learning that will guide readers to implementation in diverse educational settings.

Learning Landscape Ecology Sarah E. Gergel, Monica G. Turner, 2006-04-18 Filled with numerous exercises this practical guide provides a real hands-on approach to learning the essential concepts and techniques of landscape ecology. The knowledge gained enables students to usefully address landscape- level ecological and management issues. A variety of approaches are presented, including: group discussion, thought problems, written exercises, and modelling. Each exercise is categorised as to whether it is for individual, small group, or whole class study.

The New Landscape of Mobile Learning Charles Miller, Aaron Doering, 2014-02-24 The New Landscape of Mobile Learning is the first book to provide a research based overview of the largely untapped array of potential tools that m-Learning offers educators and students in face-to-face, hybrid, and distance education. This cutting edge guide provides:

- An essential explanation of the emergence and role of Apps in education
- Design guidelines for educational Apps
- Case studies and student narratives from across the US describing successful App integration into both K-12 and Higher Education
- Robust, research-based evaluation criteria for educational Apps

Although many believe that Apps have the potential to create opportunities for transformative mobile education, a disparity currently exists between the individuals responsible for creating Apps (i.e. developers who often have little to no instructional experience) and the ultimate consumers in the classroom (i.e. K-20 educators and students). The New Landscape of Mobile Learning bridges this gap by illuminating critical design, integration, and evaluation narratives from leaders in the instructional design, distance education, and mobile learning fields.

The Real Estate Investor's Pocket Calculator Michael Thomsett, 2017-10-18 The return on real estate investments hinges less on the physical property and more on the math. This invaluable resource helps you analyze the financial picture before shoveling out the money. With real estate investing on the rebound, more people are jumping into the market, although not everyone is finding equal amounts of success. Why do some investments turn into gold mines and some into money pits? If they had taken the right measures beforehand, they would've realized that the numbers just didn't add up. Before your next real estate investment, you need to ask things like: Have you measured every component of value, such as cash flow, income taxes, financing, and investment yield? Do you know which calculations to use on specific properties? Have you weighed all the risks? In The Real Estate Investor's Pocket Calculator, finance expert and author Michael C. Thomsett shows you how to: Gauge supply and demand Project return on investment and equity Analyze present and future value Calculate cash flow Make accurate tax projections Fewer mistakes and less guess work. Larger returns and even more opportunities for additional investments. It's all possible now with the help of The Real Estate Investor's Pocket Calculator!
