**The Media and Communications Study Skills Student Guide** Doug Specht,2020-11-25 All the tips, ideas and advice given to, and requested by, MA students in Media and Communications, are brought together in an easy-to-use accessible guide to help students study most effectively. Based upon many years of teaching study skills and hundreds of lecture slides and handouts this introduction covers a range of general and generic skills that the author relates specifically towards media and communications studies. As well as the mechanics of writing and presentations, the book also shows how students can work on and engage with the critical and contemplative elements of their degrees whilst retaining motivation and refining timekeeping skills. Of course the nuts and bolts of reading, writing, listening, seminars and the dreaded dissertation and essays are covered too. In addition advice on referencing, citation and academic style is offered for those with concerns over English grammar and expression. Aimed primarily at postgraduate students, there is significant crossover with undergraduate work, so this book will also prove of use to upper level undergraduate readers whether using English as a first or second language.

**Developing Inclusive Mobile Apps** Rob Whitaker,2020-04-25 By failing to consider those with needs different to ourselves, we are telling these people they are not welcome in our app, and therefore that technology as a whole, is not for them. This is not hyperbole—23% of people in the US with a registered disability aren't online at all, that's three times more likely than the general population. When asked why they're not online, disabled respondents say their disability prevents them or that using the internet is too hard. To help your apps combat the issue of digital exclusion, this book covers considerations and tools mobile developers, or anyone creating mobile experiences, can use to make mobile work better for those with disabilities—mental or physical—and how to create a better experience for everyone. Software is not made up of cold, unthinking algorithms. Software is a craft in the truest sense of the word, and one of the greatest tools you can have as a craftsperson is empathy for the people who will be using your app. Each one of whom is an individual with different abilities, experiences, knowledge, and circumstances. What You'll Learn Create mobile experiences that work for as many people as possible Incorporate a worldview of accessibility and customer service into your design Work with accessibility tools and techniques commonly available for developers Who This Book Is For Mobile developers working solo or as part of a team. UX designers, quality engineers, product owners, and anybody working in mobile.
