Intelligent Systems Vladimir M. Koleshko, 2012-03-02 This book is dedicated to intelligent systems of broad-spectrum application, such as personal and social biosafety or use of intelligent sensory micro-nanosystems such as e-nose, e-tongue and e-eye. In addition to that, effective acquiring information, knowledge management and improved knowledge transfer in any media, as well as modeling its information content using meta- and hyper heuristics and semantic reasoning all benefit from the systems covered in this book. Intelligent systems can also be applied in education and generating the intelligent distributed eLearning architecture, as well as in a large number of technical fields, such as industrial design, manufacturing and utilization, e.g., in precision agriculture, cartography, electric power distribution systems, intelligent building management systems, drilling operations etc. Furthermore, decision making using fuzzy logic models, computational recognition of comprehension uncertainty and the joint synthesis of goals and means of intelligent behavior biosystems, as well as diagnostic and human support in the healthcare environment have also been made easier.

Electronic Health Records Dean F. Sittig, 2013-11-25 This book provides an overview of the challenges in electronic health records (EHR) design and implementation along with an introduction to the best practices that have been identified over the past several years. The book examines concerns surrounding EHR use and proposes eight examples of proper EHR use. It discusses the complex strategic planning that accompanies the systemic organizational changes associated with EHR programs and highlights key lessons learned regarding health information—including technology errors and risk management concerns.

Technology for Physical Educators, Health Educators, and Coaches Seth E. Jenny, Jennifer M. Krause, Tess Armstrong, 2020-03-24 A wide variety of technology is available to physical educators, health teachers, and coaches—but technology is only helpful if people know how to use it effectively. This text will help health and physical education teachers and coaches improve their abilities by learning to effectively use technology in the areas of instruction, assessment, management, communication, professional development, and advocacy. The effective use of technology as outlined in this book can improve student and athlete performance and assessment and motivate active and healthy lifestyles among students. An important distinction with this book is that it goes beyond simply discussing the technology tools—it helps readers understand how to use technology to improve instruction. Practical examples of how to use various technological tools are included for different settings and a variety of age groups (child to adult). Readers will learn about the effective use of technology in physical education, health education, and coaching. *Technology for Physical Educators, Health Educators, and Coaches* is a practical, hands-on text that offers a number of useful tools: What Does the Research Say? sidebars that provide evidence for which technologies do and do not work in physical education, health education, and sport coaching, with accompanying explanations Tips, examples, and interviews from seasoned professionals on various types of technology Chapter objectives, key terms, review questions, and open-ended discussion questions, which could prove useful for online discussion boards Instructor ancillaries, including PowerPoint presentations and learning management system (LMS)-ready quizzes for each chapter, that help instructors organize, plan, teach, and assess content effectively Online web resource that offers a variety of tools, including additional practitioner interviews; links to websites, videos, and podcasts; sample handouts, and other activities and resources

from practicing professionals. The online web resource will be updated annually to keep current with the changing technology. Social media accounts (@Tech4HPECoach) on Twitter and Facebook allow readers to further connect and share ideas. Use the hashtag #Tech4HPECoach across various social media platforms too! (The web resource is included with all new print books and some ebooks. For ebook formats that don't provide access, the web resource is available separately.) The text is organized into six parts. Part I focuses on how technology can assist in meeting specific goals, objectives, and national standards within physical education, health education, and sport coaching. Part II covers technology for class and team management as well as communication technology, while part III explores how to leverage technology to facilitate teaching and learning, including within a traditional classroom, online, and with special populations. The authors address how to use technology for assessment in part IV, and part V delves into how technology can benefit professional development and advocacy. In part VI, the authors detail the all-important legal and financial aspects of technology.

Multigenerational Online Behavior and Media Use: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-02-01 The rapid evolution of technology continuously changes the way people interact, work, and learn. By examining these advances from a sociological perspective, researchers can further understand the impact of cyberspace on human behavior, interaction, and cognition. *Multigenerational Online Behavior and Media Use: Concepts, Methodologies, Tools, and Applications* is a vital reference source covering the impact of social networking platforms on a variety of relationships, including those between individuals, governments, citizens, businesses, and consumers. The publication also highlights the negative behavioral, physical, and mental effects of increased online usage and screen time such as mental health issues, internet addiction, and body image. Showcasing a range of topics including online dating, smartphone dependency, and cyberbullying, this multi-volume book is ideally designed for sociologists, psychologists, computer scientists, engineers, communication specialists, academicians, researchers, and graduate-level students seeking current research on media usage and its behavioral effects.

Manual of Singing Voice Rehabilitation Leda Searce, 2016-04-18 *Manual of Singing Voice Rehabilitation: A Practical Approach to Vocal Health and Wellness* provides speech-language pathologists and singing teachers with the tools to lay the foundation for working with singers who have voice injuries. Singing voice rehabilitation is a hybrid profession that represents a very specific amalgam of voice pedagogy, voice pathology, and voice science. Becoming a singing voice rehabilitation specialist requires in-depth training and thorough preparation across these fields. This text presents a conceptual and practical basis for interacting with singers in an effective and supportive way, identifying factors to address, structuring singing voice rehabilitation sessions, and ensuring that singers are getting adequate exercise while allowing their injuries to heal, as well as resources and materials to provide to singers to optimize the outcome of their rehabilitation. Each chapter exposes readers to important concepts of singing voice rehabilitation and the elements that need to be addressed in the singing voice rehabilitation process, which include medical factors, emotional factors, vocal hygiene, vocal pacing, and vocal coordination and conditioning. This text contains information for developing exercises and interventions to target specific vocal problems and guidance in customizing vocal exercises based on injury, singing style, skill level, professional level, and the particular vocal demands of each singer. Key features include: * Rehabilitation and therapy exercises * Clinical case studies to illustrate real-life examples and practical application While the intended audience for this book is speech-language pathologists and teachers of singing who are accomplished performers, experienced pedagogues, and clinically and scientifically well-informed, there is information herein that will be of value to all singers, physicians interested in learning more about the

behavioral side of singing voice rehabilitation, nonsinging speech-language pathologists, or anyone seeking knowledge about singing health, including music educators, music therapists, conductors, vocal coaches, worship leaders, or music directors. Disclaimer: Please note that ancillary content (such documents, audio, and video) may not be included as published in the original print version of this book.

Positive or Negative? The Effect of Emerging Technologies and Products on Mental Health Chao Guo,Stuart Gilmour,Peige Song,Aiping Fang,2023-11-02 Emerging technologies and products such as digital health technology, computing platforms, wearable devices, smartphone sensors and electronic gadgets have the potential to transform and empower society while simultaneously presenting unprecedented challenges in our life. Some like electronic cigarettes (e-cigarettes) are for entertainment, some like online conference platforms are for convenience and some like social media have become a life necessity. However, there is an ongoing debate about whether the use of physical and virtual digital technology products can do harm to mental health. Some evidence-based research shows that frequent use of social media may cause depression and anxiety, and derived behavioral phenomena like cyberbullying and game addiction, which negatively affect people's lives. Other scholars think digital technology products could provide insights into timely, personalized, engaging and accessible intervention, promotion and improvement of mental health. Given the ubiquity of digital devices and their complex and subtle associations with mental health, more research is needed to bring benefits to both research and daily life practices.

The Flex Diet James Beckerman,2010-12-28 SMALL CHANGES YIELD BIG RESULTS.

Many diet books present readers with a single, inflexible program which forces them to stay on that diet or risk another dieting failure. Rather than teaching you just one way to lose ten or twenty or even fifty pounds, The Flex Diet shows you how to lose a single pound . . . in 200 different ways. A medically proven approach to weight loss from WebMD's heart expert, The Flex Diet allows you to create your own customized weight-loss plan—one that fits your lifestyle, is full of tasty and nutritious meals, boosts energy levels, and keeps the weight off for good. Start TODAY to lose five pounds: The Flex Diet begins with a two-week phase called "Today," when you begin to make small changes to your diet and lifestyle that will help you lose weight right now and create a blueprint to a new you. It's as easy as keeping a food diary, taking a multivitamin, and getting more sleep. Do it EVERY DAY and lose ten more pounds: Next, three weeks of "Every Day Solutions" introduce meal plans for

breakfast, lunch, and dinner with dozens of tasty recipes and complete nutritional information. Heart healthy exercise and lifestyle options let you retool your life. Get yourself started on positive Every Day habits like storing leftovers before you eat, switching to skim milk, and walking during breaks at work. Have it YOUR WAY to keep inches off your waist: The “Your Way” phase offers nearly 100 more lifestyle changes and solutions that you can use to take things to the next level and continue a lifetime of slim and healthy living. The Flex Diet is an exciting new approach to a new you, your way.

Handbook of Research on Education and Technology in a Changing Society Wang, Victor C. X., 2014-05-31 Technology has become an integral part of our everyday lives. This trend in ubiquitous technology has also found its way into the learning process at every level of education. The Handbook of Research on Education and Technology in a Changing Society offers an in-depth description of concepts related to different areas, issues, and trends within education and technological integration in modern society. This handbook includes definitions and terms, as well as explanations of concepts and processes regarding the integration of technology into education. Addressing all pertinent issues and concerns in education and technology in our changing society with a wide breadth of discussion, this handbook is an essential collection for educators, academicians, students, researchers, and librarians.

Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2013 United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies, 2012

50+ Tech Tools for School Counselors Angela Cleveland, Stephen Sharp, 2019-05-08 Digital tools that can transform your practice Educating students in the 21st century is about more than preparing them for work in the digital age; it's also about connecting with the whole student and transcending barriers. 50+ Tech Tools for the 21st Century School Counselors provides insightful descriptions of tools that can be used to not only enrich intervention and instruction but also guide decision making, streamline work, enhance communication, and promote happier students. Readers will find: a framework for leadership and advocacy through the lens of technology vignettes demonstrating implementation and quotes from students and other stakeholders step-by-step guides and checklists Perspectives from counselors around the country that provide a peer-to-peer feel narratives, technical descriptions, and diagrams

Naturalistic Decision Making and Macrocognition Laura Militello, Raanan Lipshitz, Jan Maarten Schraagen, 2017-09-18 This book presents the latest work in the area of naturalistic decision making (NDM) and its extension into the area of macrocognition. It contains 18 chapters relating research centered on the study of expertise in naturalistic settings, written by international experts in NDM and cognitive systems engineering. The objective of the book is to present the reader with exciting new developments in this field of research, which is characterized by its application-oriented focus. The work addresses only real-world problems and issues. For instance, how do multi-national teams collaborate effectively? How can surgeons best be supported by technology? How do detectives make sense of complex criminal cases? In all instances the studies have been carried out on experts within their respective domains. The traditional field of NDM is extended in this work by focusing on macrocognitive functions other than decision making, namely sense-making, coordination and planning. This has broadened the scope of the field. The book also contains a theoretical discussion of the macro-micro distinction. Naturalistic Decision Making and Macrocognition will be relevant to graduate students, researchers and professionals (including professionals and researchers in business, industry and government) who are interested in decision making, expertise, training methods and system design. The material may be used in two ways: theoretically, to advance

understanding of the field of naturalistic decision making; and practically, to gain insight into how experts in various domains solve particular problems, understand and deal with issues and collaborate with others.

Health Informatics Sixth Edition Supplement: Practical Guide for Healthcare and Information Technology Professionals Ann K. Yoshihashi, Robert E.

Hoyt, 2016-11-15 Health Informatics: Practical Guide for Health and Information Technology Professionals Sixth Edition Supplement adds 3 new chapters. The supplement has learning objectives, case studies, recommended reading, future trends, key points, and references. Introduction to Data Science, provides a comprehensive overview with topics including databases, machine learning, big data and predictive analytics. Clinical Decision Support (CDS), covers current and salient aspects of CDS functionality, implementation, benefits, challenges and lessons learned. International Health Informatics, highlights the informatics initiatives of developed and developing countries on each continent. Available as a paperback and eBook. For more information about the textbook, visit www.informaticseducation.org. For instructors, an Instructor Manual, PDF version and PowerPoint slides are available under the Instructor's tab.

The Integrated Medical Library Ms. Helis Miido, 2020-04-15 First published in 1991, Library automation has advanced at such a rapid pace within the last few years that librarians who have been limited by either budget or hardware constraints are today able to automate at least some library functions. Even though presentations at meetings describing individual efforts have been published in the literature, there has not been a comprehensive text discussing the status of integration at all levels of library management as it exists today. The Integrated Medical Library addresses this need by presenting the results of a survey of automated systems currently used in medical libraries as a basis on which to discuss various methods for integrating these systems. This includes serials, cataloging, circulation, acquisitions, internal database management systems, external database search procedures, and management and financial control. The book emphasizes current practices and procedures and proposes methods for libraries to improve their performance and services. Part I defines an integrated online library system and describes the study design and analysis of results. Part II describes commercially available integrated online library systems currently used by medical libraries. Part III discusses the specialized integrated online library systems of the U.S. National Library of Medicine and the Swedish Planning and Rationalization Institute for the Health and Social Services. Part IV describes ad hoc integrated functions currently used by medical libraries, while Part V discusses the various means of integration.

Health Communication and Mass Media Rukhsana Ahmed, Benjamin R.

Bates, 2016-04-22 Health Communication and Mass Media is a much-needed resource for those with a professional or academic interest in the field of health communication. The chapters engage and expand upon significant theories informing efforts at mediated health communication and demonstrate the practical utility of these theories in on-going or completed projects. They consider how to balance the ethical and efficacy demands of mediated health communication efforts, and discuss both traditional media and communication systems and new web-based and mobile media. The book's treatment is broad, reflecting the topical and methodological diversity in the field. It offers an integrated approach to communication theory and application. Readers will be able to appreciate the ways that theory shapes health communication applications and how those applications inform the further construction of theory. They will find practical examples of mediated health communication that can serve as models for their own efforts. While the book serves as an introduction to mediated health communication for students, professionals, and practitioners with limited experience, researchers and advanced practitioners will also appreciate the exemplars and theoretical insights offered by the chapter authors. This book

will be of interest to anyone involved in health communication programs or more generally with communication and allied studies, as well as to those in the health professions and their related fields.

Human-Computer Interaction - INTERACT 2021 Carmelo Ardito, Rosa Lanzilotti, Alessio Malizia, Helen Petrie, Antonio Piccinno, Giuseppe Desolda, Kori Inkpen, 2021-08-26 The five-volume set LNCS 12932-12936 constitutes the proceedings of the 18th IFIP TC 13 International Conference on Human-Computer Interaction, INTERACT 2021, held in Bari, Italy, in August/September 2021. The total of 105 full papers presented together with 72 short papers and 70 other papers in these books was carefully reviewed and selected from 680 submissions. The contributions are organized in topical sections named: Part I: affective computing; assistive technology for cognition and neurodevelopment disorders; assistive technology for mobility and rehabilitation; assistive technology for visually impaired; augmented reality; computer supported cooperative work. Part II: COVID-19 & HCI; crowdsourcing methods in HCI; design for automotive interfaces; design methods; designing for smart devices & IoT; designing for the elderly and accessibility; education and HCI; experiencing sound and music technologies; explainable AI. Part III: games and gamification; gesture interaction; human-centered AI; human-centered development of sustainable technology; human-robot interaction; information visualization; interactive design and cultural development. Part IV: interaction techniques; interaction with conversational agents; interaction with mobile devices; methods for user studies; personalization and recommender systems; social networks and social media; tangible interaction; usable security. Part V: user studies; virtual reality; courses; industrial experiences; interactive demos; panels; posters; workshops. The chapter 'Stress Out: Translating Real-World Stressors into Audio-Visual Stress Cues in VR for Police Training' is open access under a CC BY 4.0 license at link.springer.com. The chapter 'WhatsApp in Politics?! Collaborative Tools Shifting Boundaries' is open access under a CC BY 4.0 license at link.springer.com.
