*Connecting America* Barry Leonard, 2010-11 Broadband is the great infrastructure challenge of the early 21st century. Broadband is a foundation for economic growth, job creation, global competitiveness and a better way of life. The number of Americans who have broadband at home has grown from 8 million in 2000 to nearly 200 million last year. But, 100 million Americans do not have broadband at home. In early 2009, Congress directed the FCC to develop a National Broadband Plan to ensure that every American has access to broadband capability. This plan must also include a strategy for achieving affordability and maximizing use of broadband. The plan presented here ensures that the entire broadband ecosystem – networks, devices, content and applications – is healthy. Illus.

*Freenet* Steve Stanton, 1-04-16 A nuanced story about artificial intelligence and digital immortality, *Freenet* plunges readers into the far future, when humans have closed distances in time and space through wormhole tunnels between interplanetary colonies. Consciousness has been digitized and cybersouls uploaded to a near-omniscient data matrix in a world where information is currency and the truth belongs to whoever has the most bandwidth. When Simara Ying crash-lands on the desert planet Bali, she finds herself trapped in a primitive cave-dwelling culture with no social network for support. Her native rescuer, Zen Valda, is yanked into a new universe of complications he can scarcely grasp and into an infinite network of data he never knew existed. When brash V-net anchorman Roni Hendrik starts investigating how Simara became the subject of an interplanetary manhunt, he finds a dangerous emergence in the network that threatens all human life. *Freenet* is an exciting new novel about the power of information, as well as the strength of love, in a post-digital age.
