Library Programs Online Thomas A. Peters,2009-10-27 Meet your library patrons where they increasingly live and work-online. This guide introduces you to the exciting possibilities online programs offer, and shows you how to set up online programs in your library-whether one-time stand-alone or half-day, full-day, or multi-day workshops and conferences. Public programs-from lectures, demonstrations, and interviews to book discussions and story hours can be delivered in real time (live) primarily over the web, utilizing a variety of interactive communication tools, including voice-over-IP, text chatting, and co-browsing. Furthermore, online programming can be used for district-wide staff training. The author explains how to integrate pre-recorded components of a program into a live, online public program; shows how to extend the reach and appeal of online public programs with podcasting and

audiorecordings; and explains how to use voice-over-IP and video-over-IP to enhance online programs. In addition to outlining the costs of staring and operating a public online program, Peters also provides cost recovery methods and scenarios. Online public programs can extend your library's reach into the service population, grab the attention of some early adopters and opinion leaders in the community you serve, and convey to patrons and other libraries that your library is moving boldly into the digital future. Plus, many people are more likely to attend an online library program than an in-library public program. And because online programs are easily recorded and redistributed on demand, your library gets more bang for each buck it invests in its public programming outreach. Distance education programs in higher education, corporate and governmental training efforts, and other sectors of society have become commonplace, but this is the first guide to focus on how libraries (public, academic, school, and special) and library-related organizations (associations, consortia, etc.) can and are developing exciting online programs for library users and librarians.

  Digital Is Destroying Everything Andrew V. Edwards,2015-06-01 Every year, perhaps even every week, there is some new gadget, device, service, or other digital offering intended to make our lives easier, better, more fun, or more instantaneous--making it that much harder to question how anything digital can be bad for us. Digital has created some wonderful things and we can hardly imagine life without them. But

digital—the most relentless social and economic juggernaut humanity has unleashed in centuries—is also destroying much we had taken for granted. And what is your place in this brave new world? In Digital Is Destroying Everything, futurist and digital marketing consultant Andrew Edwards tours the "blasted heath" digital is leaving behind and takes a fearless look at the troubled landscape that may lie ahead. The book is not, despite its title, a dystopian rant against all things digital and technological. Instead, expect to find a lively investigation into the ways digital has opened us to new and sometimes quite wonderful experiences, driven down costs for consumers, and given information a chance to be free. But the book also takes a clear-eyed look at many of the good (and sometimes bad) things—businesses and behaviors—digital has destroyed, and how the world may be diminished, compromised, and altered forever in its wake. This tour of the effects of digital technologies on our lives is sure to raise questions, touch a nerve, and enlighten even the most dedicated digital enthusiasts. Fire in the Valley Michael Swaine,Paul Freiberger,2014-10-20 In the 1970s, while their contemporaries were protesting the computer as a tool of dehumanization and oppression, a motley collection of college dropouts, hippies, and electronics fanatics were engaged in something much more subversive. Obsessed with the idea of getting computer power into their own hands, they

launched from their garages a hobbyist movement
that grew into an industry, and ultimately a
social and technological revolution. What they did
was invent the personal computer: not just a new
device, but a watershed in the relationship
between man and machine. This is their story. Fire
in the Valley is the definitive history of the
personal computer, drawn from interviews with the
people who made it happen, written by two veteran
computer writers who were there from the start.
Working at InfoWorld in the early 1980s, Swaine
and Freiberger daily rubbed elbows with people
like Steve Jobs and Bill Gates when they were
creating the personal computer revolution. A rich
story of colorful individuals, Fire in the Valley
profiles these unlikely revolutionaries and
entrepreneurs, such as Ed Roberts of MITS, Lee
Felsenstein at Processor Technology, and Jack
Tramiel of Commodore, as well as Jobs and Gates in
all the innocence of their formative years. This
completely revised and expanded third edition
brings the story to its completion, chronicling
the end of the personal computer revolution and
the beginning of the post-PC era. It covers the
departure from the stage of major players with the
deaths of Steve Jobs and Douglas Engelbart and the
retirements of Bill Gates and Steve Ballmer; the
shift away from the PC to the cloud and portable
devices; and what the end of the PC era means for
issues such as personal freedom and power, and
open source vs. proprietary software.
