3rd International Conference on Enterprise Management and Economic Development (ICEMED2023) will be held in Xi'an, China on May 12–14, 2023. Enterprise management is the general term for a series of functions such as organizing, planning, commanding, supervising and regulating the production and operation activities of enterprises. Relative to economic growth, economic development is the core concept of development economics. Economic development refers to the high-quality development of the economy, including quality and quantity, rather than merely the growth of quantity. Enterprise management covers economics, management, business management, financial management, human resource management and other aspects, and is a comprehensive interdisciplinary science that spans natural science, engineering science, technical science and humanities and social science. Enterprise management comes into being with the development of modern socialized mass production. The use of modern management means and methods to manage enterprises, ensure the survival and development of enterprises, and play a positive role in promoting economic development. ICEMED2023 will bring together experts and scholars from relevant fields to discuss the relationship between enterprise management and economic development. Reasonable enterprise management is an important way to promote the economic development of enterprises. Scientific and reasonable use of industrial and commercial enterprise management knowledge can reasonably carry out effective macro-control on the enterprise economy and ensure the stable progress and development of the enterprise economy.
