*The Oxford Handbook of Mexican Politics* Roderic Ai Camp,2012-01-13 Since achieving independence from Spain and establishing its first constitution in 1824, Mexico has experienced numerous political upheavals. The country's long and turbulent journey toward democratic, representative government has been marked by a tension between centralized, autocratic governments (historically depicted as a legacy of colonial institutions) and federalist structures. The years since Mexico's independence

have seen a major violent social revolution, years of authoritarian rule, and, finally, in the past two decades, the introduction of a fair and democratic electoral process. Over the course of the thirty-one essays in *The Oxford Handbook of Mexican Politics* some of the world's leading scholars of Mexico will provide a comprehensive view of the remarkable transformation of the nation's political system to a democratic model. In turn they will assess the most influential institutions, actors, policies and issues in its current evolution toward democratic consolidation.

Following an introduction by Roderic Ai Camp, sections will explore the current state of Mexico's political development; transformative political institutions; the changing roles of the military, big business, organized labor, and the national political elite; new political actors including the news media, indigenous movements, women, and drug traffickers; electoral politics; demographics and political attitudes; and policy issues.

**Risk Management** Cristina Florio, Monika Wieczorek-Kosmala, Philip Mark Linsley, Philip Shrives, 2022-01-03 This volume offers new, convincing empirical evidence on topical risk- and risk management-related issues in diverse settings, using an interdisciplinary approach. The authors advance compelling arguments, firmly anchored to well-accepted theoretical frameworks, while adopting either qualitative or quantitative research methodologies. The book presents interviews and surveys with risk managers to gather insights on risk management and risk disclosure in practice. Additionally, the book collects and analyzes information contained in public reports to capture risk disclosure and perceptions on risk management impacts on companies' internal organization. It sheds light on financial and market values to understand the effect of risk management on actual and perceived firm's performance, respectively. Further, it examines the impacts of risk and risk management on society and the economy. The book improves awareness and advances knowledge on the complex and changeable risk and risk management fields of study. It interweaves among topical, up-to-date issues, peculiar, under-investigated contexts, and differentiated, complementary viewpoints on the same themes. Therefore, the book is a must-

read for scholars and researchers, as well as practitioners and policy makers, interested in a better understanding of risk and risk management studies in different fields.

Maintenance Benchmarking and Best Practices Ralph W. Peters, 2010-06-14 Over the past decade, companies have redirected their maintenance operational focus from internal cost-cutting to profit-maximization. This approach is referred to as profit centered maintenance. Peters provides maintenance supervisors and managers with a benchmarking/best practices road-map called the Maintenance Operations Scoreboard. The Scoreboard will allow maintenance managers to: a) determine and quantify benefits and savings, b) improve craft productivity and c) define a strategy to improve efficiency and productivity. These things are at the heart of a successful Profit Centered Maintenance organization. The author-devised Maintenance Operations Scoreboard is used to perform over 200 maintenance evaluations in over 5,000 profit centered maintenance organizations. For example, at Honda of America, it was used extensively to direct maintenance strategy. It was later translated into Japanese for presentation to key Japanese executives. Another excellent example is Boeing Commercial Aircraft Inc. Boeing combined elements from this same Scoreboard with their company-wide maintenance goals to develop 'The Boeing Scoreboard for Maintenance Excellence.' Over 60 facility maintenance work units, at region, group and team levels, are evaluated at on-site visits using the Scoreboard criteria.

### **Current Trends in Preparatory Proceedings** Laura

Ervo, Anna Nylund, 2016-04-18 This book explores the regulations, goals and functioning of preparatory proceedings in four Nordic countries and eight former communist countries. The contributions discuss whether, and how the regulation and practice of preparatory proceedings enhance swift civil justice that is both inexpensive and has quality outcomes. A central question is whether the main hearing model of civil justice, in which preclusion of new evidence and claims occur at the end of the preparatory stage, results in greater efficiency, or whether the functioning of civil proceedings largely depends on other factors. It also examines regulation and use of court-connected mediation and judicial settlement efforts. This book offers

comparative insights into the functioning of the preparatory civil proceedings in the countries covered. Preparatory proceedings are considered a key tool for achieving efficient civil proceedings. The claims and factual background of the case are clarified at an early stage, and the main hearing is focused. Judicial settlement efforts and court-connected mediation contribute to early resolution of cases, and are important elements of Nordic civil procedure. The Nordic countries have used the main hearing model of civil proceedings for some decades, and recent reforms have further enhanced the role of the preparatory stage. Former communist countries are reforming their earlier piecemeal-format civil proceedings by introducing and strengthening written and oral preparation, as well as court-connected mediation.

**HC 215 - An Environmental Scorecard** Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2014-09-16 Emissions of a number of airborne pollutants increased in 2013, after being steady between 2010 and 2012 and in a longer term decline before that. The UK failed to meet targets for nitrogen dioxide pollution in 34 of the 43 zones specified in the EU Ambient Air Quality Directive in 2012, resulting in the European Commission launching infraction proceedings against the UK in February 2014 in regard to 16 zones that would not be compliant by 2015. The Committee's report recommends an overarching Environmental Strategy be implemented, to set out strategic principles and good practices; facilitate discussion between central and local government and identify how they can work together and with the wider community; encompass clear environmental assessments; identify work required to fill data gaps in assessments; map appropriate policy levers to environmental areas; and set out how environmental and equality considerations will be addressed in policy areas across Government. The report concludes that the Government should set up an independent body-an 'Office for Environmental Responsibility'-to (i) review the Environment

Strategy we advocate; (ii) advise Government on appropriate targets; (iii) advise Government on policies, both those in Government programmes and new ones that could be brought forward to support the environment; (iv) advise Government about the adequacy of the resources (in both central and local government) made available for delivering the Strategy; and (v) monitor and publish performance against the Strategy and its targets.
