Giovanni Rigters, 2018 You know that you need to start investing, because you won't be able to work your whole life. You don't want to be the old employee working as a door greeter at your big chain department store. It will also be frustrating and very depressing if you are not financially aware of your future. Time seems to go faster the older you get and it's never too late to get started. But getting started might be one of your problems. There is too much information available and too many scammers are trying to get you to invest in shady companies. You also don't have the time to figure everything out by yourself, because it might seem too hard and complicated. However, getting the investing part of your life handled will improve your life tremendously. You will have peace of mind when you think about your future and you will also have the confidence to make sound investing decisions. You'll also have the knowledge to talk intelligently with your peers and financial advisors, making it easy to spot when someone is giving you wrong information. I begin with the basics, like what are stocks and how the stock market works. I then transition into how you can make money in the stock market, give you some stocks you should have on your watch list and some of the lies and mistakes you will have to deal with as an investor. So, don't wait and get this book now. It's on sale at this moment, but the price will go up!

How to Day Trade Ross Cameron, 2015-10-29 Success as a day trader will only come to 10 percent of those who try. It's important to understand why most traders fail so that you can avoid those mistakes. The day traders who lose money in the market are losing because of a failure to either

choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. In this book, I will teach you trading techniques that I personally use to profit from the market. Before diving into the trading strategies, we will first build your foundation for success as a trader by discussing the two most important skills you can possess. I like to say that a day trader is two things: a hunter of volatility and a manager of risk. I'll explain how to find predictable volatility and how to manage your risk so you can make money and be right only 50 percent of the time. We turn the tables by putting the odds for success in your favor. By picking up this book, you show dedication to improve your trading. This by itself sets you apart from the majority of beginner traders.
