The Rise of the Human Digital Brain Beatriz Pacheco, 2018-08-01 Cover Design By: Rebecca Gibson Jones It is estimated that up to sixty-five percent of children entering grade school this year will end up working in careers that have yet to be created. This is a result, in part, of the rapid advances in technology that have occurred since Apple introduced the iPhone just ten years ago. This technology is not only impacting the way that we learn or the jobs that we will hold in the future, but it is literally changing the way that we think. As modern technologies are introduced during formative periods of brain development, they are having an impact on traditionally linear patterns of thought. Today's youth no longer process information in the same linear fashion as past generations. This is creating confusion in educational settings that are specifically designed to meet the needs of linear thinkers. Administrators, educators, and parents must learn to better understand these changes in order to create models that will be viable for 21st century learners. We must work together to create systems that will both support and encourage children who literally think differently than those who teach them. *The Rise of the Human Digital Brain: How Multidirectional Thinking is Changing the Way We Learn* contains information about the history of education, the changes in the systems of education over the years, and the impact of technology on learning for 21st century students. It also contains the results of a unique study regarding the impact of iPad instruction on literacy attainment for struggling readers. The hope is that the information contained in this book

will cause administrators, educators, parents, and developers of new technologies to take a moment to step back and envision a new model that will revolutionize education across the world. Praise for *The Rise of the Human Digital Brain*: Beatriz Pacheco's experience as both a researcher and a practitioner in the field of education lends an authenticity to her writing that is both refreshing and enlightening. She has conducted one of the most comprehensive studies to date concerning the use of the iPad for direct instruction, and the results of her study have the potential to influence the teaching of literacy skills on the national level. I highly recommend this book. ~ Michael Gurian, New York Times bestselling author of *The Wonder of Boys* and *The Minds of Girls* For much of human history adults have looked upon the youth of their era as flawed creatures who fail to measure up to nostalgic standards. Dr. Beatriz Pacheco's *Rise of the Human Digital Brain* guides us to recognize and to understand the elements that make rising generations of young people different from their predecessors. The digital brain prefers collaborative engagement over traditional hierarchy and linear thinking. Anyone with a smart phone has command of massive amounts of data and information, and coming generations will be more creative and more critical. Educational systems must change to meet the needs of a changing time. Any educator would benefit from this book. ~ Tori Murden McClure, President of Spalding University Author of *A Pearl in The Storm* There is no doubt that the accelerated development of digital technology in our day has profoundly transformed the ways in which human beings interact and how we interpret reality. We live in a new paradigm that demands critical assessment of how we educate the new generations, especially in an era of multidimensional thinking. Beatriz Pacheco's well-researched work insightfully names key questions, poses challenges, and offers ways forward. This book promises to be a key tool in defining the what and the how of education during the rest of the 21st century. ~ Hosffman Ospino Associate Professor of Theology and Education Boston College

Avalanche of Leads Dr. Elaine Williams-Morgan, 2023-09-27 In this informative book, Dr. Elaine Williams-Morgan explores social media, one of the greatest innovations of our time, chronicling its development from the early beginnings to the current time when there are over two hundred social networking platforms. The book highlights the disruptive character of social media and its commonalities with other disruptive technologies. The disruption is being experienced across a range of industries, including music, advertising, and the traditional media, as journalists, educators, and businesses take advantage of the critical mass that this innovation delivers. It outlines the avalanche of social media platforms available to users, led by Facebook, YouTube, and WhatsApp, and provides a roadmap for the development of an appropriate social media policy and strategy for navigating the digital era. The power inherent in the adoption of social networking tools to reduce marketing and promotional costs, facilitate efficiency and effectiveness in communication, and drive collaboration and innovation is underscored. These trends predict an increase in the number of social networking platforms and a broadening of the scope of these platforms. There is also an indication that as Internet access expands globally, a higher percentage of the global population will go online using their mobile devices and, specifically, for social networking. These developments, Avalanche of Leads emphasizes, make it imperative for individuals and businesses alike to take the steps necessary to develop a winning social media strategy that employs tools that have become important for life and business. A failure in this regard could mean being left out of the social media ecosystem, an environment rich with opportunities to thrive!

MEDINFO 2021: One World, One Health – Global Partnership for Digital Innovation P. Otero, P. Scott, S.Z. Martin, 2022-08-05 The World Health Organization defines health as “a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity”, and its constitution also asserts that health for all people is “dependent on the fullest co-operation of individuals and States”. The ongoing pandemic has highlighted the power of both healthy and unhealthy information, so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge, social media has shown how unhealthy misinformation can be spread and amplified, reinforcing existing prejudices, conspiracy theories and political biases. This book presents the proceedings of MedInfo 2021, the 18th World Congress of Medical and Health Informatics, held as a virtual event from 2-4 October 2021, with pre-recorded presentations for all accepted submissions. The theme of the conference was One World, One Health – Global Partnership for Digital Innovation and submissions were requested under 5 themes: information and knowledge management; quality, safety and outcomes; health data science; human, organizational and social aspects; and global health informatics. The Programme Committee received 352 submissions from 41 countries across all IMIA regions, and 147 full papers, 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings. Providing an overview of current work in the field over a wide range of disciplines, the book will be of interest

to all those whose work involves some aspect of medical or health informatics.

Give Work Leila Janah, 2017-09-26 Want to end poverty for good? Entrepreneur and Samasource founder Leila Janah has the solution—give work, not aid. “An audacious, inspiring, and practical book. Leila shows how it’s possible to build a successful business that lifts people out of poverty—not by giving them money but by giving them work. It’s required reading for anyone who’s passionate about solving real problems.” —Adam Grant, author of Give and Take and Originals Despite trillions of dollars in Western aid, 2.8 billion people worldwide still struggle in abject poverty. Yet the world’s richest countries continue to send money—mostly to governments—targeting the symptoms, rather than the root causes of poverty. We need a better solution. In Give Work, Leila Janah offers a much-needed solution to solving poverty: incentivize everyone from entrepreneurs to big companies to give dignified, steady, fair-wage work to low-income people. Her social business, Samasource, connects people living below the poverty line—on roughly \$2 a day—to digital work for major tech companies. To date, the organization has provided over \$10 million in direct income to tens of thousands of people the world had written off, dramatically altering the trajectory of entire communities for the better. Janah and her team go into the world’s poorest regions—from refugee camps in Kenya to the Mississippi Delta in Arkansas—and train people to do digital work for companies like Google, Walmart, and Microsoft. Janah has tested various Give Work business models in all corners of the world. She shares poignant stories of people who have benefited from Samasource’s work, where and why it hasn’t worked, and offers a blueprint to fight poverty with an evidence-based, economically sustainable model. We can end extreme poverty in our lifetimes. Give work, and you give the poorest people on the planet a chance at happiness. Give work, and you give people the freedom to choose how to develop their own communities. Give work, and you create infinite possibilities.
